Overview

Money and Credit

- Money supply grew by 2.7% for the first nine months of 2022, supported by a sharp build-up of the Central Bank's net foreign assets and an upswing in net domestic credit.
- The net foreign assets of the banking system increased by \$70.2mn (4.9%) from January to September to \$1,514.4mn. However, the foreign asset accumulation was uneven as the Central Bank's holdings strengthened by \$107.4mn, while domestic banks' position weakened by \$37.2mn. The Central Government's withdrawal of a sizeable portion of its foreign currency deposits from domestic banks to facilitate the settlement payment with the Belize International Services Limited (BISL) in September explained the drop in domestic banks' holdings.
- Net domestic credit grew by \$64.1mn (2.1%) for the first three quarters of 2022. This modest expansion was driven by increases in net lending to the private sector (\$41.6mn) and quasi-government entities (\$31.7mn) amid a modest decline (\$9.2mn) in net advances to Central Government.
- The sizeable reduction in domestic banks' foreign balances precipitated a \$33.3mn decline in excess statutory liquid asset holdings for the year to date to \$665.0mn—85.9% above the secondary reserve requirements. However, as domestic banks' Treasury bill (T-bill) holdings plunged, aggregate excess cash reserves rose by \$65.6mn to \$481.2mn—200.8% above the primary (cash) reserve requirements.
- The 12-month (rolling) weighted average interest rate on new loans rose 17 basis points over the last 12 months to 8.71%, boosted by increased rates on residential construction, personal, and commercial loans. Concurrently, the corresponding rate on new deposits fell 39 basis points to 1.77%, widening the interest rate spread by 56 basis points to 6.94%.
- Lending by credit unions grew by \$10.4mn over the nine months, buoyed by new disbursements for real estate (\$8.7mn), manufacturing (\$2.6mn), and construction (\$1.2mn) activities.

Real Sector Developments

- The value of domestic exports increased by \$48.6mn (14.6%) to \$382.5mn over the review period. The robust revenue growth was supported by heightened exports of sugar, animal feed, and cattle exports, which outweighed the impact of reduced earnings from molasses, citrus juices, and bananas. Outlays for gross imports, however, rose by a more prominent \$503.6mn (32.7%) to \$2,042.6mn, pressured by heightened volume and price impacts associated with the economic recovery from the pandemic.

- Stay-over arrivals almost doubled 2021's figures from January through September at 270,716 persons, representing 76.6% of the visitors received in the same period of 2019. Meanwhile, cruise ship passenger disembarkations continued to ascend, reaching 373,415 persons from 191 port calls.
- The consumer price index (CPI) recorded a 0.2% dip in September but averaged a 6.2% increase for the first nine months of 2022. The upward trend was due mainly to high food and fuel prices linked to headwinds caused by the war in Ukraine and shocks related to the Coronavirus Disease 2019 (COVID-19) .

Central Government Operations and Public Debt

- The total public sector debt rose by \$43.9mn during the first nine months of the year to \$4,036.7mn (69.1% of GDP). The rise in national indebtedness resulted from a \$44.6mn (1.7%) increase in the public sector's external debt to \$2,721.7mn (46.6% of GDP) that was moderated by a \$0.7mn (0.1%) decline in Central Government's domestic debt to \$1,315.1mn (22.5% of GDP).

1 Money and Credit

Money Supply

Money supply grew by 2.7% (\$105.8mn) for the first nine months of 2022, decelerating from an 8.9% expansion in the same period of 2021. Money growth was driven by a substantial build-up in the Central Bank's net foreign assets and, to a lesser extent, increased credit to private entities and quasi-government institutions.

Net Foreign Assets

The net foreign assets of the banking system rose by \$70.2mn (4.9%) during the first three quarters of the year to \$1,514.4mn. This expansion was attributable to a sizeable increase in the Central Bank's foreign assets, which grew by \$107.4mn (12.7%) to \$955.1mn, the highest end-month position since August 2015. Gross foreign currency inflows into the Central Bank amounted to \$322.3mn, arising from a \$40.0mn transfer from a domestic bank, \$41.7mn in international grants, \$75.0mn in sugar export receipts, \$80.3mn in external loan disbursement proceeds, and \$85.3mn from various other sources. Gross inflows exceeded gross outflows of \$216.0mn by \$106.3mn. Central Government used about 86.2% of gross outflows (\$186.2mn) to cover its external debt service payments, the acquisition of foreign goods and services, and damages to BISL in September. The latter was tied to a settlement agreement between the Government of Belize and BISL, signed in August 2022, to pay the claimants US\$38.3mn, of which \$11.5mn was paid in Belize dollars, for the nationalisation of the international ship and company registries

Chart 1.1: Change in Net Foreign Assets of the Banking System

in June 2013. Consequently, the gross international reserves rose by \$105.8mn to \$953.9mn, equivalent to 4.3 months of merchandise import cover.

In contrast, the domestic banks' holdings contracted by \$37.2mn (6.2%) over the nine-month period to \$559.3mn, tempering the overall foreign-asset accumulation in the system. Domestic banks' position weakened after a \$66.6mn decline in September, owing to the Central Government's draw-down of its foreign currency deposits to fund the settlement with BISL. Notwithstanding, domestic banks' foreign balances remained significantly above pre-pandemic levels, supported mainly by the rebound in tourism revenue. At the same time, outflows continued to be dominated by payments for imported goods and profit repatriation.

Net Domestic Credit

Net domestic credit increased by \$64.1mn or 2.1% between January and September 2022 to \$3,111.4mn, reflecting a marked

improvement from the \$16.6mn or 0.5% growth recorded in the same period last year. New disbursements to private entities and quasi-government institutions were chiefly responsible for this outcome. However, net credit to Central Government declined by \$9.2mn (1.3%) to \$677.8mn as a \$61.8mn reduction in domestic banks' net financing to Central Government eclipsed a \$52.6mn increase from the Central Bank. However, credit to other public sector entities almost doubled, rising by \$31.7mn to \$75.6mn, bolstered by a domestic bank's acquisition of a public utility's debentures (\$29.6mn) and, to a lesser degree, increased loan disbursements to local governments (\$4.7mn).

Domestic bank lending to the private sector rose by \$41.6mn (1.8%) to \$2,358.0mn. New credit was extended primarily to support the distribution (\$21.1mn), transport (\$8.0mn), agriculture (\$7.0mn), and manufacturing (\$2.9mn) sectors. Only \$13.2mn in loans were written off within the first nine months of the year, compared to \$27.3mn in 2021.

Chart 1.2: Change in Net Domestic Credit of the Banking System

Chart 1.3: Change in Domestic Banks' Loans

Due to reclassifications, changes in loans for construction, real estate, and personal consumption were omitted from the chart.

Write-offs were mainly applied against non-performing loans issued for construction (\$4.7mn), merchandise trading (\$1.5mn), tourism (\$1.2mn), and real estate (\$1.0mn) activities.

Bank Liquidity

Liquidity conditions tightened in September, owing mainly to the sharp reduction in domestic banks' foreign balances during the month. Consequently, domestic banks' holdings of excess liquid assets contracted by \$33.3mn (4.8%) over the first three-quarters of 2022 to \$665.0mn, settling at 85.9% above secondary reserve requirements. However, domestic banks' excess cash liquidity rose by \$65.6mn (15.8%) over the year to date to \$481.2mn—200.8% above primary (cash) reserve requirements reserves—as a consequence of a sharp decline in their T-bill holdings as yields declined.

Interest Rates

At 8.71%, the 12-month (rolling) weighted average interest rate on new loans was

Chart 1.4: Excess Statutory Liquidity

unchanged in September compared to the previous month but increased by 17 basis points since September 2021. Over the year, lending rates were pressured upward by rate hikes on residential construction, personal, and commercial loans, which rose by 51, 20, and two basis points, respectively. The rising trend was tempered by a 39 basis-point rate

reduction on loans in the “other” category. At 1.77%, the 12-month (rolling) weighted average interest rate on new deposits fell by four basis points during the month, thus increasing the decline over the last 12 months to 39 basis points. The downward trend was due to a 30-basis-point decrease in time deposit rates, which outweighed

Chart 1.5: Weighted Average Interest Rates on New Loans and Deposits

the impact of rate increases on savings/chequing and savings deposits of 84 and two basis points, respectively. Demand deposit rates remained unchanged at 0 basis point. Consequently, the weighted average interest rate spread widened by 56 basis points to 6.94%.

Credit Union Lending

Credit union lending continued to pick up this month, contributing to the \$10.4mn (1.6%) expansion for the year to date. New lending was channelled mainly to the real estate (\$8.7mn), manufacturing (\$2.6mn), and construction (\$1.2mn) industries. These were partially offset by loan declines to households (\$3.2mn) and the agricultural (\$1.4mn) industry. Write-offs amounted to \$4.1mn, applied against personal (\$1.4mn), construction (\$1.3mn), and real estate (\$0.7mn) loans.

Chart 1.6: Change in Credit Unions' Loans

2 Real Sector Developments

Commodity Production

Production of the country’s major agricultural exports remained mixed. For the first nine months of the year, the production of marine goods, citrus juices, and sugar increased, while outturns of molasses and banana declined.

Domestic Exports

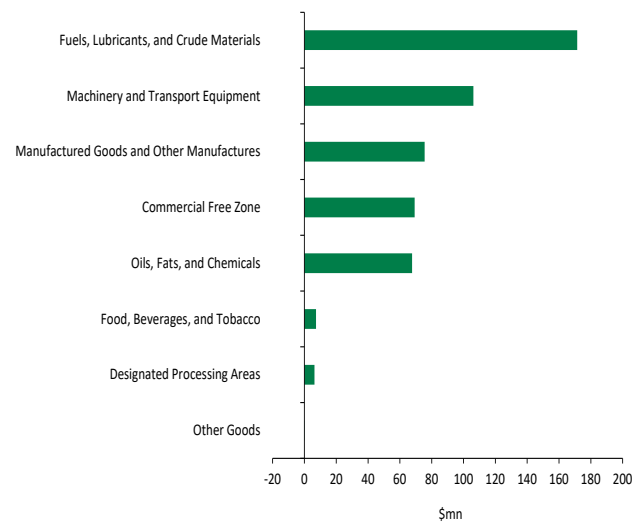

Export earnings grew by 39.4% month-on-month in September, contributing to a 14.6% (\$48.6mn) year-on-year increase from January to September 2022 to \$382.5mn. Receipts were bolstered by heightened exports of sugar, “other domestic exports”—particularly, animal feed and cattle—and marine products. However, revenues from molasses, citrus juices, and bananas declined relative to the same period in 2021.

Gross Imports

Gross imports climbed by 16.3% (\$31.9mn) in September and 32.7% (\$503.6mn) between January and September to \$2,042.6mn relative to the same period a year ago. Reflecting the impact of increased volume and price effects, the nominal value of imports has already exceeded 2019’s pre-pandemic level by 34.2%. The rise in imports was virtually broad-based; however, five major categories accounted for 97.3% of the overall increase in import value.

- First, “*Fuels, Lubricants, and Crude Materials*” led all categories, increasing by 70.3% or \$171.5mn, due to skyrocketing world market prices for petroleum products.

Chart 2.1: Change in Gross Imports

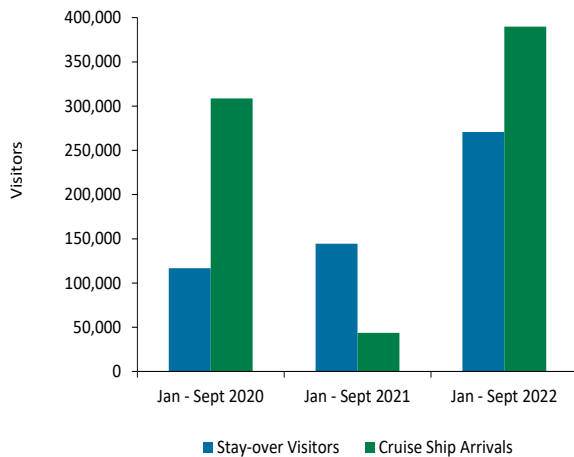

Source: SIB

- Second, “*Machinery and Transport Equipment*” widened 36.4% or \$106.2mn, propped up by additional purchases of aviation equipment and vehicles.
- Third, “*Manufactured Goods and Other Manufactures*” rose 21.5% or \$75.5mn, with increased acquisition of cement clinkers, galvalume steel coils, tubes, medical supplies, plastic articles, and jewellery.
- Fourth, “*Commercial Free Zone*” grew 33.3% or \$69.3mn because of heightened imports of cigarettes, tennis shoes, and t-shirts.
- Fifth, “*Oils, Fats, and Chemicals*” rose 37.8% or \$67.7mn, driven by increased imports of cooking oils, vaccines, and fertilisers.

Tourist Arrivals

The recovery in tourist arrivals further strengthened, now at 76.6% of 2019’s pre-pandemic level. Stay-over arrivals amounted to 270,716 visitors between

Chart 2.2: Tourist Arrivals

Sources: BTB, CBB, and Immigration and Nationality Department.

January and September, nearly doubling the amount recorded in the same period of 2021. Although the number of stay-over arrivals was the lowest so far for this offseason, it was 42.4% higher than the count in September 2021, underscoring the strong recovery pace from the pandemic.

Cruise ship disembarkations also trended upward, with 373,415 passengers visiting Belize’s shores between January and September. Moving through the low season, port calls increased by one from 11 in August to 12 in September. Notwithstanding, cruise ships have made 191 port calls, of which, 129 anchored at the Fort Street Tourism Village and 62 docked at the Harvest Caye Port. This outcome compares well to 43,662 disembarkations from 27 port calls in the comparable period last year.

Consumer Price Index

The consumer price index (CPI) dipped 0.2% in September, halting seven consecutive month-on-month increases from February to August of this year. Notwithstanding, the

Chart 2.3: Average Year-on-Year Change in Consumer Price Index

all-items index averaged a 6.2% increase between January and September, well above the preceding 10-year average (2012-2021) of 0.8%. The inflationary momentum was driven by soaring energy and food costs, which accounted for three-fourths of the price level changes over the nine months. The escalating price level was pressured by the adverse effects of the Russia-Ukraine war, lingering COVID-19-related shocks, and COVID-19-related stimulus measures in advanced countries. For the year to date, the “*Transport*” subindex increased by the most significant margin, up 19.1%, spurred by increased costs for motor vehicle fuel, new vehicles, and passenger transport services. Additionally, the “*Food and Non-Alcoholic Beverages*” subindex rose 6.7%, underpinned by higher prices for dairy products, meats, cooking oils, fresh produce, fish, and other seafood. However, reduced internet service costs caused the “*Information and Communications*” subindex to drop 0.8% somewhat softening the inflationary pressure.

Chart 2.4: Sugar Exports

Sources: BSI and Santander Group

Sugarcane and Sugar

There were no sugar cane deliveries or production in September.

Sugar exports from January to September amounted to 132,475 long tons, reflecting a 7.0% year-on-year volume decline. However, sugar prices strengthened in Europe (EU), the United States (US), and CARICOM, leading to a 19.1% revenue increase to \$140.4mn. Furthermore, average bulk and bagged sugar prices rose 28.0% (\$0.04) to \$0.20 per pound and 14.0% (\$0.04) to \$0.29 per pound, respectively. The EU remained the primary destination for sugar exports. About 76.5% of the total (101,377 long tons), valued at \$98.8mn, went to the continent. Additionally, CARICOM purchased 13.6% (18,011 long tons) of total shipments, valued at \$24.4mn. Meanwhile, molasses exports contracted by 23.5% in volume to 42,383 long tons, resulting in a 6.8% drop in earnings to \$13.7mn.

Citrus

After starting on 1 October 2021, the 2021/2022 citrus harvest season ended on

Chart 2.5: Citrus Deliveries

Source: CPBL

5 August 2022. The cycle spanned 309 days, finishing 57 days earlier than the previous crop year, which was extended to capture fruits from off-season blooming trees. Notwithstanding, citrus deliveries increased by 3.6% to 1,451,255 boxes, a notable turnaround from the 45.3% contraction in the previous crop year. Harvests from green-resistant trees and favourable weather conditions contributed to the upturn in fruit outturn. In more detail, orange and grapefruit deliveries increased by 1.9% to 1,308,067 boxes and 21.9% to 143,188 boxes of fruits, respectively. Consequently, total citrus juice production rose 5.2% to 8.1mn pound solids (ps), comprising 7.5mn ps of orange and 0.6mn ps of grapefruit juices. This outturn generated a 1.5% improvement in average juice yields to 5.6 ps.

Even though production rose, citrus juice exports contracted by 26.3% in volume to 6.2mn ps compared to 2021 when additional sales were made from inventories. As a result, citrus juice earnings fell 20.0% to \$21.2mn during this nine-month period

relative to last year's. Orange concentrates dominated exports, with 5.8mn ps sold (94.0%), garnering \$19.0mn in receipts. The Caribbean was the primary export market for orange concentrates. The region purchased 80.7% of the total, amounting to 4.7mn ps, valued at \$16.3mn. Next was the US, purchasing 0.7mn ps (12.7% of the total), valued at \$1.8mn. The remainder went to the EU (0.3mn ps) and other destinations (0.1mn ps), netting \$0.9mn.

Banana

Banana output edged down 7.0% over the year to date to 66,519 metric tons, exacerbated by a 23.2% month-on-month decline in September. Banana production continued to underperform due to pronounced labour shortages as well as escalating fertiliser and fuel costs. As a result, banana receipts narrowed by 7.2% to \$65.3mn.

Marine Exports

From January to September, marine export volume inched up 2.6% to 1.5mn pounds. In turn, marine export earnings increased 9.2% to \$36.4mn, owing to a 36.7% lift in conch prices. While conch export volume rose marginally to 0.5mn pounds, its receipts ballooned, increasing by 48.6% to \$9.9mn, as demand strengthened in key export markets. However, the overall revenue growth was tempered by downturns of 3.8% and 0.6% in lobster and shrimp prices, respectively. Consequently, lobster receipts slid 0.1% to \$25.4mn, despite a 3.9% boost in export volume to 0.7mn pounds. Furthermore, farmed shrimp earnings plunged 19.4% to \$1.0mn on account of a 19.0% drop in export volume

Chart 2.8: Marine Export Volume

Source: SIB

to 0.2mn as the adverse effects of the early mortality syndrome disease linger.

Other Domestic Exports

Other domestic exports grew by 47.8% or \$34.0mn for the first nine months of the year to \$105.2mn. Substantial gains in animal feed (\$17.8mn), cattle (\$3.6mn), orange oil (\$2.5mn), sorghum (\$2.3mn), petroleum (\$2.2mn), rum (\$1.9mn), and pineapple (\$1.3mn) exports contributed to the solid outturn. However, downturns in red kidney beans (\$1.5mn) and black-eyed peas (\$1.2mn) moderated the overall growth.

Chart 2.9: Other Domestic Exports

Source: SIB

3 Central Government Finance

Information on Central Government's Operations after August 2022 estimates is not available.

Central Government Domestic Debt

Central Government's domestic debt edged down by \$0.7mn to \$1,315.1mn during the first nine months of 2022. This dip reflected small loan repayments to the Social Security Board, the Debt for Nature Swap programme, and Fort Street Tourism Village. Notably, Central Government's current account has remained in a surplus since June 2021. Therefore, Central Government has no current overdraft balance with the Central Bank.

Interest payments amounted to \$30.2mn to date. The Central Bank got the largest portion, earning \$14.4mn on its Treasury securities. Nonbank entities and domestic banks received \$10.4mn and \$5.4mn, respectively, on their Government investments.

Chart 3.1: Distribution of Central Government's Domestic Debt

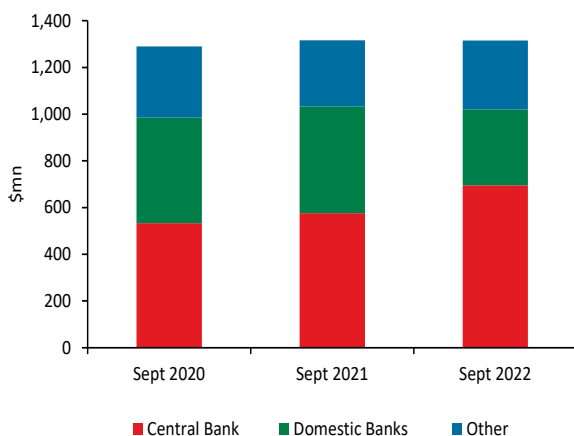

Chart 3.2: Distribution of Interest Payments on Central Government's Domestic Debt

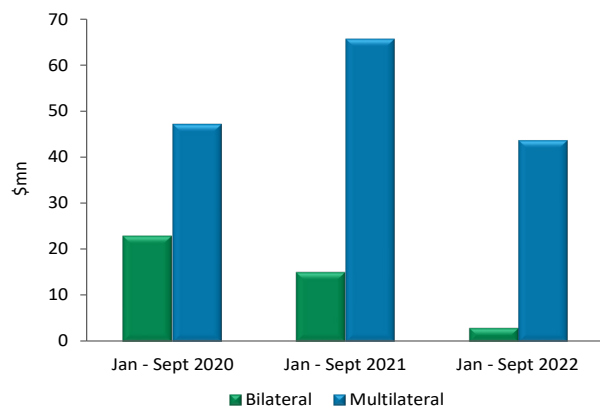

In securities trading, the Central Bank increased its T-bill holdings by \$75.1mn over several rollover auctions this year as yields declined in response to efforts to actively manage the yield curve. In contrast, the amounts held by domestic banks and nonbank entities contracted by \$72.5mn and \$2.5mn, respectively. Furthermore, the Central Bank and nonbank entities purchased \$8.6mn and \$10.4mn worth of Treasury notes on the secondary market.

The Central Bank remained the largest domestic creditor to Central Government. At September-end, its share of domestic liabilities increased by 6.4 percentage points to 52.8%. In addition, nonbank entities' portion rose 0.6 percentage points to 22.4%, while domestic banks' share fell by 6.9 percentage points to 24.7%.

Public Sector External Debt

The public sector's external debt increased by 1.7% (\$44.6mn) to \$2,721.7mn. The debt level rose as disbursements of \$109.6mn outweighed principal payments

Chart 3.3: External Disbursements to Central Government by Creditor Type

of \$55.3mn and downward valuation adjustments of \$9.6mn. The latter mainly reflected an appreciation of the US dollar against holdings of Special Drawing Rights.

External loan proceeds to Central Government summed to \$102.2mn during the review period, all of which stemmed from concessional bilateral and multilateral sources. Bilateral creditors disbursed \$10.6mn, comprising \$8.7mn from the Republic of China/Taiwan for upgrading the Sarteneja Road and constructing the Laguna Seca Bridge. Additionally, the Government of Kuwait disbursed \$1.9mn toward the Caracol Road Upgrading Project. Furthermore, multilateral institutions disbursed \$91.6mn for various projects including:

- the Haulover Bridge Replacement Project,
- the Social Investment Fund,
- the Philip Goldson Highway and Remate Bypass Project,
- the Coastal Road Upgrading Project, and
- the Caracol Road Upgrading Project.

Chart 3.4: External Debt Service Payments

In the non-financial public sector, the Belize Electricity Limited received \$1.3mn from CDB to fund their ongoing Electricity System Upgrade and Expansion Project. Meanwhile, in the financial public sector, the Development Finance Corporation received \$6.0mn to support its loan programme to the productive sector and shore up its consolidated line of credit.

Central Government's amortisation payments totalled \$46.7mn, of which \$43.8mn was paid to multilateral creditors and the balance to bilateral creditors. The non-financial and financial public sector loan repayments were more modest, at \$7.2mn and \$1.3mn, respectively.

Interest and other payments summed to \$34.3mn. Of this amount, \$10.1mn was paid on the blue loan, while multilateral and bilateral partners received \$17.1mn and \$7.1mn, respectively.

Statistical Appendix

Table A.1: Factors Responsible for Money Supply Movements⁽¹⁾

	Position as at Sept 2022	Changes During		
		Aug 2022 to Sept 2022	Dec 2021 to Sept 2022	Dec 2020 to Sept 2021
