Summary of Economic Indicators

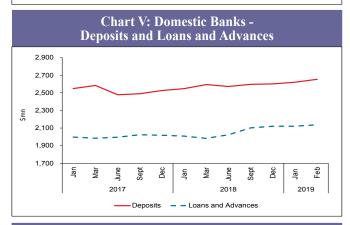

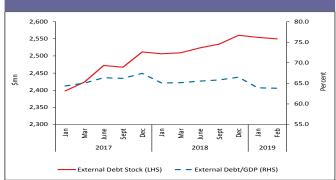

Chart VII: Public Sector External Debt

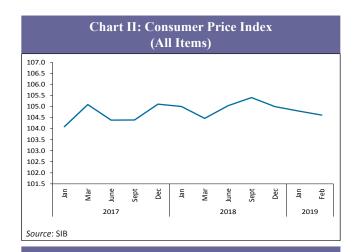

Chart IV: Current Account Balance to GDP

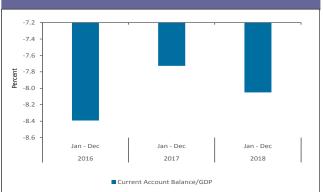

Chart VI: Primary and Overall Balances to GDP

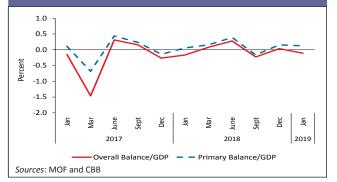

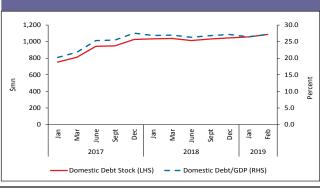

Chart VIII: Central Government Domestic Debt

Overview

- During the first two months of 2019, broad money (M2) supply rose by 1.3% as a result of expansions in both net foreign assets (\$13.3mn) and net domestic credit (\$36.9mn) of the banking system.
- The modest rise in net foreign assets was solely attributable to the \$46.8mn upturn in domestic banks' holdings, resulting largely from the seasonal growth in tourism revenue. This increase was partly offset by the \$33.5mn reduction in Central Bank's holdings, as gross foreign currency outflows of \$71.5mn, which included the first semi-annual interest payment on the 2034 bond, exceeded gross inflows of \$38.1mn.
- The strong expansion in net domestic credit was supported by increases in net credit to Central Government (\$19.9mn), the private sector (\$16.9mn), and, to a much lesser extent, public sector entities (\$0.1mn). In contrast, lending by the five largest credit unions contracted by \$7.3mn.
- Buoyed by the increase in their foreign asset holdings, domestic banks' excess statutory liquidity rose by \$23.8mn to 42.2% above statutory requirements. However, excess cash reserves fell by \$14.8mn, settling at 78.9% above the required level at the end of February.
- The 12-month (rolling) weighted average interest rate on new loans and deposits declined by 21 basis points to 8.69% and by 36 basis points to 1.39%, respectively, when compared to February 2018. As a result, the weighted average interest rate spread widened by 16 basis points to 7.31% year-on-year.
- Merchandise exports grew by 35.2% to \$70.8mn on account of higher receipts from all major commodities, except for petroleum and citrus. Concurrently, merchandise imports (including electricity) increased by 12.5% to \$320.9mn, driven by higher outlays on all categories of goods, except "*Export Processing Zones*" and "*Food, Beverages and Tobacco*".
- Tourism activities were robust with stay-over arrivals expanding by 5.1% to 87,964 and cruise ship disembarkations rising by 25.4% to 282,430 during the first two months of 2019.
- The Consumer Price Index (CPI) declined by 0.2% in February relative to the previous month and was down by 0.1% on average for the first two months of the year. This deflationary year-on-year trend reflected marginal reductions in the sub-indexes for

"Transport", "Furnishing, Household Equipment, and Routine Household Maintenance", and "Clothing and Footwear".

- During the first 10 months of the 2018/2019 fiscal year (FY), Central Government's revenue and grants grew by 6.5% to \$971.9mn, while expenditure rose at a slower pace of 3.6% to \$980.4mn. Consequently, the primary surplus improved to 2.0% of GDP from 1.2% of GDP, while the overall deficit narrowed to 0.2% of GDP from 0.9% of GDP when compared to the corresponding 10-month period of the FY 2017/2018. The overall shortfall was funded solely from external sources.
- For the year to date, the total public sector debt inched up by 0.8% to \$3,636.4mn (95.0% of GDP), as the 3.9% increase in Central Government's domestic debt to \$1,086.6mn outweighed the 0.5% decline in the public sector's external debt to \$2,549.8mn.

Money and Credit

- For the first two months of 2019, broad money supply grew by \$39.5mn (1.3%), owing to a \$36.9mn expansion in net domestic credit and a \$13.3mn growth in the net foreign assets of the banking system.
- Domestic banks' net foreign assets grew by \$46.8mn, driven largely by the seasonal upturn in tourism earnings.
- However, the Central Bank's net foreign asset position declined by \$33.5mn to \$558.9mn, moderating the overall accumulation of net foreign assets in the banking system. During the two-month period, gross foreign currency inflows of \$38.1mn, stemming largely from receipts (\$10.4mn), export loan sugar disbursements (\$7.6mn), and the international ship registry (\$5.4mn), were exceeded by gross outflows of \$71.5mn. Of total outflows, 83.2% was sold to Central Government, majority of which was used for external debt servicing, inclusive of the \$26.0mn semi-annual interest payment on the 2034 bond in February. Consequently, the gross official international reserves declined from the equivalent of 3.6 months of merchandise imports in December to 3.2 months of merchandise imports in February.
- Net domestic credit rose by \$36.9mn to \$2,739.8mn over the first two months of the year, buttressed by robust growth in net lending to the private sector and Central Government. Net credit to the private sector rose by \$16.9mn, with net disbursements primarily for distribution (\$12.8mn), professional services (\$4.9mn), utilities (\$1.3mn), and other

Chart 1.1: Net Foreign Assets and Net Domestic Credit of the Banking System

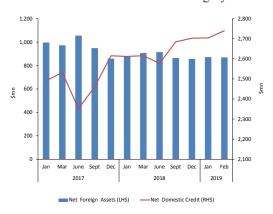

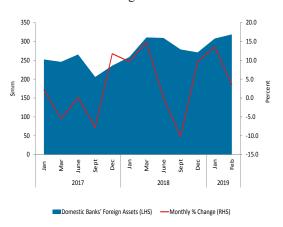

Table 1.1: Central Bank's Foreign Asset Flows

| | | \$mn |
|--------------------|-------------------|-------------------|
| | Jan - Feb 2018 | Jan - Feb 2019 |
| Total Inflows | 27.1 | 38.1 |
| Loan Disbursements | 4.1 | 7.6 |
| Sugar Receipts | 11.9 | 10.4 |
| Banks | 0.0 | 0.0 |
| Other | 11.2 | 20.2 |

| Banks | 0.0 | 0.0 |
| Other | 3.4 | 12.0 |

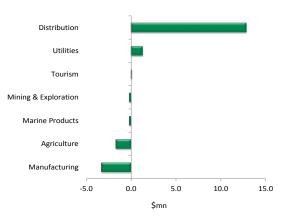

Chart 1.2: Domestic Banks' Foreign Assets

agricultural production (\$1.3mn). However, these expansions were partly offset by net repayments in other loan categories and loan write-offs of \$5.2mn, of which 73.1% was applied against construction loans (\$3.8mn).

- Net credit to Central Government rose by \$19.9mn to \$599.1mn, as the \$21.3mn deposit buildup at banks was overshadowed by Central Government's issuance of \$20.0mn one-year Treasury notes and a \$21.4mn overdraft balance increase at the Central Bank. Notably, the overdraft balance rose to \$73.5mn, representing 80.2% of the legal threshold. Meanwhile, net credit to other public sector entities rose by a marginal \$0.1mn.
- In contrast, lending by the five largest credit unions declined by \$7.3mn in the first two months of the year, which was slightly less than the \$7.4mn reduction recorded in the same period of 2018. This decline resulted as net repayments on real estate (\$3.3mn), personal (\$2.8mn), and sugar (\$0.7mn) loans exceeded the \$0.6mn uptick in credit for grain production.
- Driven by the foreign asset expansion, domestic banks' excess statutory liquidity rose by \$23.8mn to \$264.4mn, 42.2% above statutory requirements. However, excess cash reserves fell by \$14.8mn to \$182.5mn, but remained 78.9% above required levels.
- The 12-month (rolling) weighted average interest rate on new loans rose by five basis points to 8.69% during the month but declined by 21 basis points relative to February 2018. The year-on-year decline reflected 43 and 19 basis-point reductions on commercial and

⁽¹⁾ For analytical purposes, loans for Building and Construction (\$128.4mn) and Transport (\$24.4mn) that were reclassified as Real Estate (\$14.3mn) and Personal Loans (\$126.2mn) in January 2019 were excluded from the text and chart.

Chart 1.4: Loans for Top Five Credit Unions

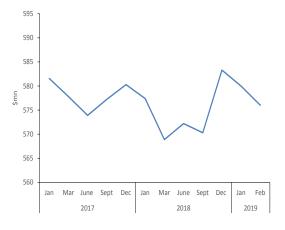

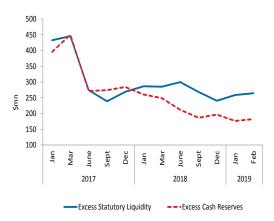

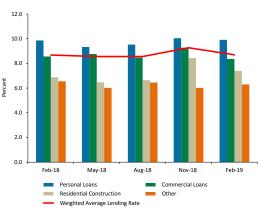

Chart 1.5: Excess Statutory Liquidity

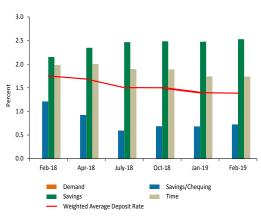

other miscellaneous loans, respectively, which outweighed a 39 basis-points increase in residential construction rates.

• The corresponding 12-month (rolling) weighted average interest rate on new deposits fell by one basis point to 1.39% relative to January 2019 and by 36 basis points compared to February 2018. The decline over the 12-month period was due to reduced rates on savings/ chequing and time deposits of 49 and 24 basis points, respectively, as savings deposit rates rose by 38 basis points. Consequently, the weighted average interest rate spread widened by 16 basis points to 7.31%.

Real Sector Developments

- For the first two months of 2019, the production of all major commodities increased, except for petroleum and citrus juices. While crude oil extraction continued to decline as the major oil field nears the end of its life cycle, the adverse impact of citrus diseases was responsible for the downturns in citrus deliveries and citrus juice production.
- Over the two-month period, export receipts increased by 35.2% to \$70.8mn. Higher export earnings were reported for all major commodities, except for petroleum and citrus juices.
- Gross imports (including electricity) expanded by 12.5% to \$320.9mn, driven by increases in most categories, including "Fuels, Lubricants, and Crude Materials" (\$15.7mn), "Manufactured Goods and Other Manufactures" (\$8.8mn), and "Oils, Fats, and Chemicals" (\$8.2mn). Notably, only the "Export Processing Zones" (\$2.4mn) and "Food, Beverages, and Tobacco" (\$2.0mn) categories recorded declines.
- Stay-over arrivals for the year to date increased by 5.1% to 87,964 tourists, as the growth in winter season arrivals was supported by increased airlift capacity, sustained marketing efforts, and economic growth in key source markets. In addition, cruise ship disembarkations rose by 25.4% to 282,430 visitors, buoyed by 11 additional calls totalling 108 ships. Of this increase, 10 additional ships made calls to the Belize City port, while only one more went to the Harvest Caye port.

Table 2.1: Production of Main Domestic Exports

⁽¹⁾ Imports are valued at cost, insurance and freight

The Consumer Price Index (CPI) edged down by 0.2% in February and averaged a 0.1%contraction for the year to date. This weak deflationary pressure over the two-month period reflected price reductions in "Transport" (3.8%), owing to lower international airfares, as well as falloffs in other categories, specifically "Furnishing, Household Equipment, and Routine Household Maintenance" (1.2%) and "Clothing and Footwear" (0.2%). Price declines in these categories were partly offset by increased costs for liquefied petroleum gas and house rent, which supported a 0.8% rise in "Housing, Water, Electricity, Gas, and Other Fuels". Costs for outpatient services also rose, underpinning a 2.7% uptick in "Health".

Sugarcane and Sugar

- Sugarcane deliveries in the North declined by 8.6% to 473,045 long tons for the crop year to date, resulting from a later harvest start. This crop year sugarcane harvest commenced on 13 December verses 6 December in the previous crop year. Sugar production fell by a smaller margin of 5.3% to 51,239 long tons, reflecting a 4.6% improvement in the long tons cane-tolong ton sugar (TC/TS) ratio to 9.0.
- Sugarcane harvest out West began on 21 February, which was earlier than the 7 March start in 2018 that was delayed by rain. Deliveries amounted to 32,888 long tons, of which 2,232 long tons of sugar were produced, resulting in a significant 21.4% drop in the TC/TS ratio to 14.7.
- Total sugar deliveries declined by 2.2% to 505,934 long tons, while total sugar production was down by 1.2% to 53,471 long tons relative to the same period of the previous crop

Chart 2.1: Tourist Arrivals

Sources: BTB and CBB

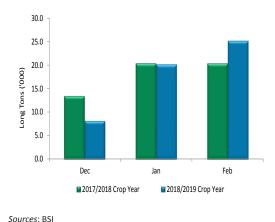

Chart 2.2: Monthly Sugar Production

year. The difficulties out West led to a 0.2%reduction in the industry's overall TC/TS ratio to 9.5. Total molasses output also contracted, falling by 2.0% to 12,710 long tons.

Sugar export volume amounted to 43,654 long tons in the first two months of 2019, reflecting a sharp increase in raw sugar exports early this year on account of changes in the marketer's shipping schedule. Of total exports, 93.7% was sold to the European Union (EU), while CARICOM purchased the remaining 6.3%. At \$26.5mn, sugar earnings were eroded by a 28.8% reduction in the average unit price to US\$0.14 per pound for the first two months of 2019 compared to an average of US\$0.19 per pound in the same period last year.

Citrus deliveries for the 2018/2019 crop year

to date increased by 3.7% to 1,319,603 boxes,

comprising 1,137,230 boxes of orange and

182,373 boxes of grapefruit. A sharp upturn

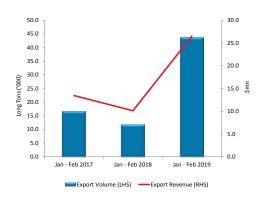

in harvest due to favourable agronomic

conditions early in the crop year lifted orange

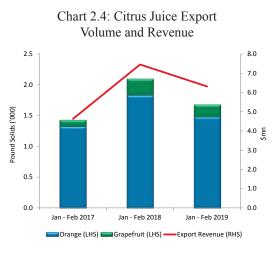

and grapefruit deliveries by 0.4% and 29.9%,

respectively, compared to the period before.

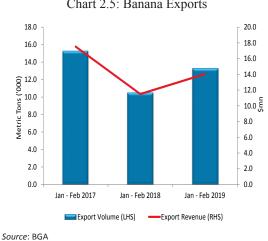

Chart 2.3: Sugar Exports

Sources: BSI and Santander Group

Source: CPBL

- Helped by improved fruit quality, citrus juice production rose by 5.9% to 7.4mn pound solids (ps). Consequently, orange juice production increased by 2.5% to 6.6mn ps, reflecting a 2.0% uptick in the average outturn per box of orange. Likewise grapefruit juice output almost doubled to 0.8mn ps, benefiting from a 13.1% expansion in the average yield per box of grapefruit.
- However, citrus juice exports contracted by 19.6% to 1.7mn ps for the year to date with lower orange concentrate sales to the US and EU. Export receipts fell by a smaller margin of 15.3% to \$6.3mn, owing to better prices for

Citrus

•

orange concentrates in the Caribbean and for grapefruit concentrates in the EU.

Banana

 Recovering from weather damages suffered in late 2017 into early 2018, banana exports rose by 26.3% to 13,286 metric tons. Meanwhile, banana export receipts increased by 22.1% to \$14.0mn, dampened by a 3.3% decline in the average unit price.

Petroleum

- For the year to date, crude oil production decreased by 15.4% to 44,403 barrels, reflecting a 137-barrel reduction in the daily extraction rate to 753 barrels per day. When disaggregated, production from the Spanish Lookout and Never Delay oilfields declined by 15.3% to 43,772 barrels and by 26.2% to 631 barrels, respectively.
- Despite a 0.7% uptick in crude oil export volume to 67,522 barrels, earnings contracted by 21.6% to \$6.0mn on account of a 22.1% plunge in the average price per barrel from US\$56.78 to US\$44.22.

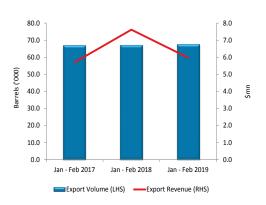

Marine Exports

• Marine export volume increased by 61.2% to 0.6mn pounds with increased sales of shrimp, conch, fish, and lobster. Export receipts grew by a lesser margin of 41.6% to \$7.4mn, as shrimp and lobster prices weakened by 4.9% and 0.3%, respectively.

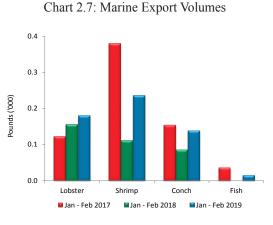

Other Domestic Products

• Earnings from other domestic exports edged up by 1.2% to \$10.6mn, underpinned by increased earnings from grapefruit oil, corn meal, and black-eyed pea, which outweighed reduced sales of red kidney bean, orange oil, and animal feed.

Chart 2.6: Petroleum Exports

Source: Geology and Petroleum Department

Sources: SIB and CBB

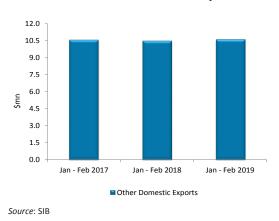

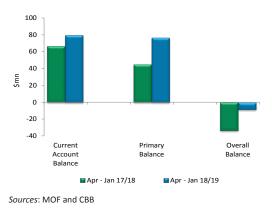

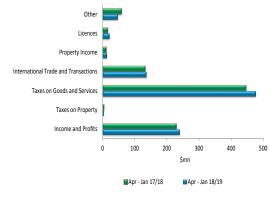

Chart 2.8: Other Domestic Exports

Central Government Operations

- During the first 10 months of the 2018/2019 fiscal year (FY), Central Government's revenue and grants rose by 6.5% to \$971.9mn, while expenditure rose by 3.6% to \$980.4mn. Reflecting a tighter fiscal stance, the primary surplus improved to 2.0% of GDP from 1.2% of GDP, while the overall deficit narrowed to 0.2% of GDP from 0.9% of GDP when compared to the same period of the 2017/2018 FY.
- The \$59.5mn increase in revenue was driven mainly by higher tax collections and grants, as non-tax revenue declined by \$4.1mn to \$83.3mn on account of lower income from the ship registry. Buoyed by tax enhancements implemented at the start of the current FY (April 2018), tax revenue rose by 5.4% to \$855.7mn, arising from higher collections of General Sales Tax (GST), stamp duties, social fees, and income tax. Grants almost tripled to \$30.1mn, most of which were donated by the EU to fund banana and sugar support programmes, as well as rehabilitation of the George Price Highway.
- Total expenditure was up by \$34.5mn, underpinned by increases in current and capital spending. Current spending rose by 3.2% to \$859.6mn because of higher outlays on wages and salaries, interest payments, and goods and services. Meanwhile, capital expenditure increased by 6.7% to \$120.8mn on account of a \$12.1mn upturn in capital transfer and net lending to \$13.3mn, while development expenditure dipped by \$4.5mn to \$107.5mn. The expansion in capital transfers reflected outlays of \$6.0mn towards the NEWCO Belize Ltd. arbitration award settlement in October and \$5.0mn to settle the GDG Acquisitions Ltd.

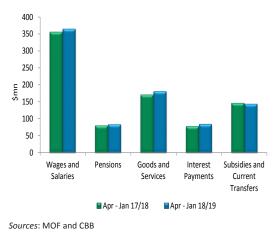

Sources: MOF and CBB

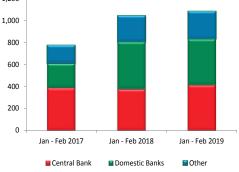

claim in December. Meanwhile, 41.7% of total development expenditure was channelled into infrastructural projects, such as rehabilitation of the Philip Goldson and George Price Highways.

• Central Government's operations recorded an overall deficit of \$8.5mn, which was financed solely from external sources.

Central Government Domestic Debt

- During the first two months of 2019, Central Government's domestic debt rose by 3.9% to \$1,086.6mn, as a result of a \$21.4mn increase in its Central Bank overdraft facility and the issuance of \$20.0mn one-year Treasury notes.
- Amortisation payments amounted to \$0.2mn and were shared between the Belize Social Security Board and one domestic bank.
- In securities trading, the Central Bank and non-bank entities increased their Treasury bill holdings by \$9.8mn and \$0.7mn, respectively, while domestic banks reduced their holdings by \$10.4mn. Furthermore, Central Bank's Treasury note holdings rose by \$20.0mn because it held onto the entire amount of the new issuance.
- Domestic banks remained the largest domestic creditor to Central Government despite a marginal dip in their share from 41.2% at the end of December 2018 to 38.7% at the end of February. During the same period, Central Bank's portion rose from 34.9% to 38.3%, and non-bank entities' amount narrowed marginally from 23.9% to 23.0%.

Şmn

Chart 3.5: Distribution of Interest Payments on Central Government's Domestic Debt

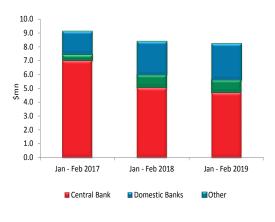

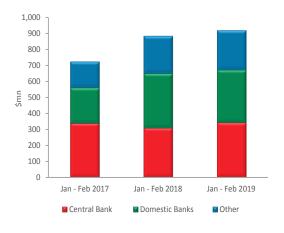

Chart 3.6: Distribution of Central Government's Domestic Securities

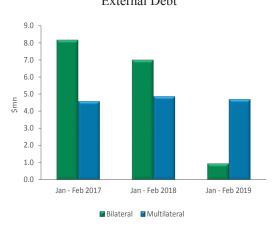

• Interest payments totalled \$8.2mn. Of this amount, Central Bank received \$4.7mn on its overdraft facility and securities holdings, while domestic banks and non-bank entities earned \$0.9mn and \$2.6mn, respectively.

Public Sector External Debt

- With amortisation payments exceeding new disbursements, the public sector external debt fell by 0.5% (\$12.1mn) during the first two months of the year to \$2,549.8mn.
- Disbursements totalled \$5.7mn. Central Government received \$5.6mn, comprising \$4.7mn from the Caribbean Development Bank (CDB) and \$0.9mn from the Republic of China (ROC)/Taiwan for the downtown rejuvenation project. In the non-financial public sector, Belize Water Services Limited obtained \$0.1mn from CDB for the Placencia Peninsula Waste Water Project.
- Loan repayments amounted to \$18.1mn. Central Government made \$17.1mn in principal payments, consisting of \$9.6mn to ROC/Taiwan and \$7.5mn to multilateral creditors. In addition, the non-financial and financial public sectors repaid \$0.9mn to the CDB.
- Interest and other payments summed to \$34.0mn with \$4.5mn paid to bilateral lenders, \$3.5mn to multilateral creditors, and \$26.0mn to the 2034 bond holders.
