Abbreviations and Conventions:

| \$ | refers to the Belize dollar unless otherwise stated |
|-------|---|
| bn | denotes billion |
| mn | denotes million |
| ps | pound solids |
| TC/TS | Tons Cane to Tons Sugar |

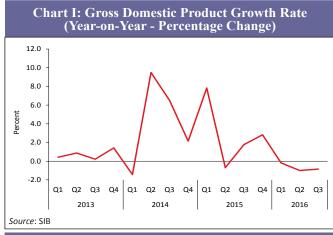

Notes:

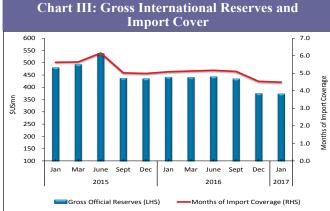

- 1. Since May of 1976, the Belize dollar has been fixed to the US dollar at the rate of US\$1.00 = BZ\$2.00.
- 2. The 2017 figures in this report are provisional and the figures for 2016 have been revised.
- 3. Unless otherwise indicated, the Central Bank of Belize is the source of all tables and charts.
- 4. Ratios to GDP for 2016 and 2017 are based on Central Bank's forecast of annual GDP.

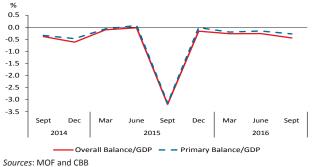

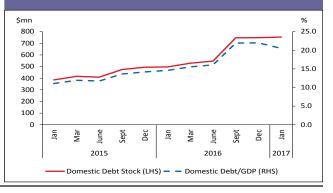

Chart VIII: Central Government Domestic Debt

Overview

- GDP growth is projected to range between 3.0% and 3.5% in 2017 as increased output of sugarcane, banana, corn, farmed shrimp and livestock eclipses a decline in citrus deliveries, while activities in the tertiary sector expands across-the-board. The secondary sector is expected to contract due to lower output of citrus juices, petroleum and domestic electricity.
- During January, the broad money supply (M2) fell by \$18.8mn, as a \$43.0mn decline in net domestic credit outweighed a \$6.3mn increase in the net foreign assets of the banking system.
- The Central Bank's net foreign assets contracted by \$3.3mn, while domestic banks recorded a \$9.6mn increase that reflected a \$5.3mn growth in foreign assets and \$4.3mn fall in foreign liabilities.
- Net credit to Central Government contracted by \$24.9mn, largely due to the Central Bank's sale of Treasury notes to non-bank entities. Domestic bank lending to the private sector also contracted, falling by \$17.6mn as repayments and loan write-offs exceeded disbursements. Lending by the five largest credit unions was marginally up by \$0.3mn.
- The sale of Government's Treasury notes on the secondary market caused a slight dip in liquidity during the month. The domestic banks' holdings of statutory liquid assets stood at 70.1% above the required level, while excess cash reserves were approximately 173.4% above the legal requirement.
- The 12-month (rolling) weighted average interest rates on new loans and new deposits contracted by 13 basis points to 9.42% and by five basis points to 1.77%, respectively, when compared to January 2016. Consequently, the weighted average interest rate spread narrowed by eight basis points to 7.65%.
- At the end of January, the public sector debt edged down by 0.02% to \$3,145.5mn, as the 0.2% decrease in the public sector external debt to \$2,392.5mn just edged out the 0.7% increase in Central Government domestic debt to \$753.0mn.
- Export receipts grew by 51.4% to \$35.4mn, buoyed by increased revenue from sugar, banana, marine products and petroleum. Gross imports (including electricity) rose by 6.8% to \$141.1mn due to higher outlays for all categories of goods, except "Machinery, *Transport and Equipment*" and "*Export Processing Zones*".

Money and Credit

- The broad measure of money supply (M2) contracted by \$18.8mn in January due to a \$43.0mn decline in net domestic credit that outweighed the \$6.3mn increase in net foreign assets of the banking system.
- The Central Bank's net foreign assets fell by \$3.3mn. Inflows were less than half the January 2016 receipts, which had been inflated by a substantial one-off transfer from a statutory body. As customary, Central Government accounted for the majority of foreign currency outflows (71.2%), most of which was used for external debt servicing.
- The net foreign assets of domestic banks rose by \$9.6mn, reflecting a modest increase in foreign assets and decrease in liabilities.
- Net credit to Central Government contracted by \$24.9mn, as Government increased its deposits with banks by \$5.3mn, and the Central Bank reduced its holdings of Government securities by \$28.0mn with sales to non-bank entities on the secondary market. These were partially offset by a \$3.2mn increase in domestic banks' holdings of Treasury notes and a \$5.3mn increase in Government's overdraft facility at the Central Bank, which stood at 64.7% of the statutory limit.
- Credit to the private sector fell by \$17.6mn, as new loan disbursements, particularly for banana (\$3.3mn) and other agricultural production (\$3.2mn), were outweighed by repayments and write-offs. The latter summed to \$12.2mn, which included write-offs for construction (\$4.2mn), residential real estate (\$2.2mn) and personal loans (\$3.7mn).

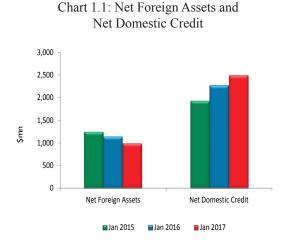

Table 1.1: Central Bank's Foreign Asset Flows

| | | \$mn |
|--------------------|-------------|-------------|
| | Jan 2016 | Jan 2017 |
| Total Inflows | 39.2 | 17.8 |
| Loan Disbursements | 2.1 | 2.8 |
| Sugar Receipts | 6.2 | 6.4 |
| Banks | 11.5 | 6.4 |
| Other | 19.4 | 2.3 |
| Total Outflows | 27.5 | 20.8 |
| Central Government | 13.3 | 14.8 |
| Banks | 10.5 | 0.9 |
| Other | 3.7 | 5.1 |

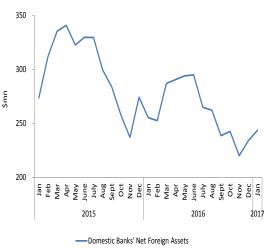

Chart 1.2: Domestic Banks' Net Foreign Assets

- Lending by the five largest credit unions grew by \$0.3mn with new disbursements being mainly for grain production, residential construction and personal loans.
- With increased purchases of Government securities by banks and private sector entities in January, the excess statutory liquid assets of the domestic banks fell by \$11.0mn to \$432.7mn (70.1% above the required level). Their excess cash reserves fell by \$30.6mn to \$395.5mn (173.4% above the legal requirement).
- The 12-month (rolling) weighted average interest rate on new loans of 9.42% was unchanged from the previous month but was 13 basis points lower than the rate in January 2016. This was due to a 46 and 21 basis-point reduction on loans for commercial and other miscellaneous purposes, respectively. On the other hand, rates for personal and residential construction loans rose by 11 and 16 basis points, respectively.
- The corresponding 12-month (rolling) weighted average interest rate on new deposits fell by two basis points in January and by five basis points to 1.77%, when compared to January 2016. The decline in the latter was due to reduction in rates for time and saving/chequing deposits of three and 47 basis points, respectively, which were partly offset by a 27 basis-point increase in rates on savings deposits. The weighted average interest rate spread, consequently, narrowed by eight basis points to 7.65%.

Real Sector Developments

- GDP growth is projected to range between 3.0% to 3.5% in 2017, as the primary sector rebounds in 2016, notwithstanding lower citrus fruit output due to the impact of Hurricane Earl and citrus greening. The recovery will be principally driven by increased production of sugarcane, banana, corn, farmed shrimp and livestock. Growth in the tertiary sector should be buoyed by across-the-board expansions in service-based industries despite a tighter fiscal stance and a marked deceleration in stay-over tourist arrivals. The secondary sector is expected to contract due to lower production of citrus juices, petroleum and domestic electricity.
- In the month of January, production of the major export commodities was down, except for sugar and banana.
- Stay-over visitors dipped by 0.1% to 35,087 due to a 1.7% reduction in air arrivals and 5.8% fall-off in tourists from the US. However, cruise ship disembarkations rose by 22.4% to 114,555, as port calls to Belize City and Harvest Caye rose by a combined seven ships.
- The Consumer Price Index (CPI) increased by 0.1% during the month and was 0.9% above the January 2016 level. The rise in the annual price level was largely driven by hikes in international airfares and bus fares, which pushed the "*Transport*" sub-index up by 9.4%.
- Export receipts rose by 51.4% to \$35.4mn, buoyed by increased earnings from sugar, banana, marine products and petroleum, which contrasted with declines in earnings

 Gross imports (including electricity) rose by 6.8% to \$141.1mn with increased outlays on most categories of goods, except for "Machinery, Transport and Equipment" and "Export Processing Zones".

Sugarcane & Sugar

- In the North, the 2016/2017 crop year began on schedule, aiming to produce 130,900 long tons of sugar from 1.31mn long tons of sugarcane within a 28-week period.
- Sugarcane deliveries for the 2016/2017 crop year to date were up by 1.5% to 345,970 long tons, while sugar production rose by 17.8% to 33,926 long tons, reflecting a 10.9% improvement in the cane/sugar ratio. The improved performance was supported by increases of 3.3% and 3.4% in factory time efficiency and cane juice purity, respectively. Conversely, molasses production dipped by 15.4% to 8,907 long tons.
- In January, sugar exports increased from 1,789 long tons to 15,306 long tons valued at \$11.9mn. Of the total, 15,281 long tons of raw sugar went to the European Union (EU), and 25 long tons of bagged sugar was sold to CARICOM at an average price that was 24.3% lower than that received in the same period in 2016.

Citrus

6

• The 2016/2017 citrus crop was damaged by Hurricane Earl and also marked by low sugar content, which caused the factory to increase fruit rejections. Consequently, citrus deliveries

(1) Imports are valued at cost, insurance and freight

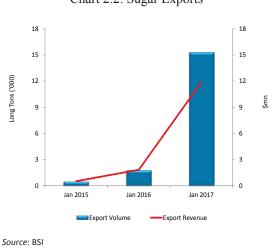

Chart 2.2: Sugar Exports

shrank by 55.0% to 512,868 boxes, with orange and grapefruit deliveries contracting by 55.6% and 51.6% to 421,909 boxes and 90,959 boxes, respectively.

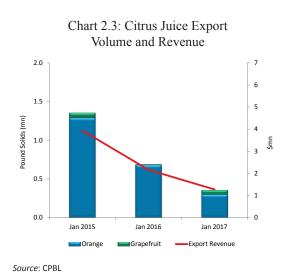

- Output of citrus juices plummeted by 57.2% to 2.8mn pound solids (ps) with declines in orange and grapefruit concentrates of 57.9% and 51.5% to 2.4mn ps and 0.4mn ps, respectively. The average juice outturn dipped by 4.9%, as the combined impact of the hurricane and citrus greening caused a deterioration in fruit quality.
- In January, citrus export volume fell by 47.9% to 0.4mn ps, while receipts were down by 58.8% to \$1.3mn. All the orange concentrate sold (0.3mn ps) went to CARICOM, where the price rose by 5.7%. In contrast, the average price of grapefruit concentrate, all of which was sold to the EU and CARICOM, fell by 4.1%.

Banana

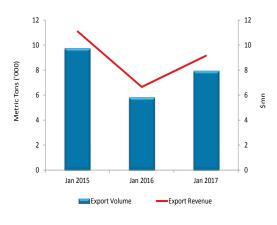

• Banana production rebounded, rising by 36.3% to 7,930 metric tons. Revenues were up by 37.6% to \$9.2mn as more shelf-ready packages, which garner a higher premium, were in the export mix. The five-year commercial agreement between the Banana Grower's Association and Fyffes is scheduled to expire at the end of 2017.

Petroleum

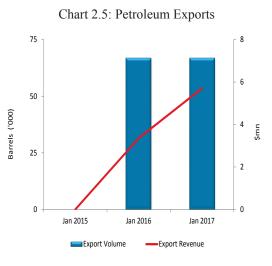

• Petroleum extraction at the Spanish Lookout field fell by 15.1% to 34,257 barrels, with the average daily extraction rate down by 15.1% (or 197 barrels) to 1,105.1 barrels per day, compared to January 2016.

Source: BGA

Source: Geology and Petroleum Department

 Although crude oil exports dipped by 19 barrels to 66,971 barrels, earnings rose by 69.9% to \$5.7mn, compared to January 2016. The latter reflected an increase in the average export price from US\$25.06 to US\$42.59 per barrel, as oil prices rallied after the Organization of Petroleum Exporting Countries (OPEC) announced production cuts in November 2016.

Marine

 Partly due to the fact that there were no fish exports in January, marine export volume contracted by 5.6% to 0.3mn pounds. Earnings totalled \$3.7mn, up 46.8% over the same period of 2016.

Other Domestic Products

• Revenues from other domestic products almost halved to \$3.7mn, as lower receipts from animal feed (\$2.9mn), papaya (\$0.7mn) and red kidney beans (\$0.7mn) outweighed increases in black eye peas (\$0.6mn) and pepper sauce.

Central Government Operations

Information on Central Government's operations after September 2016 has not yet been made available.

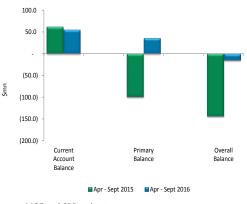

Central Government Domestic Debt

- In January, Central Government's domestic debt rose by 0.7% to \$753.0mn due to a \$5.3mn increase in its overdraft facility with the Central Bank.
- Amortization payments amounted to \$0.1mn and were shared between a domestic bank and the Fort Street Tourism Village.
- The Central Bank's share of domestic debt fell from 49.5% to 46.2%, as it sold \$37.5mn worth of Treasury notes on the secondary market and bought \$9.5mn worth of Treasury bills. The shares held by the domestic banks and nonbank entities inched up from 30.9% to 31.1% and from 19.5% to 22.7%, respectively.
- Interest payments totalled \$7.0mn, with \$5.5mn paid to the Central Bank on the overdraft facility and on its holdings of government securities, while non-bank entities received \$1.4mn.

Public Sector External Debt

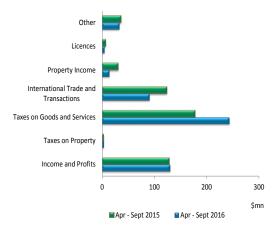

- With amortization exceeding disbursements in January, the public sector external debt fell by 0.2% (\$5.8mn) to \$2,392.5mn.
- All loan disbursements, which totalled \$3.4mn, went to Central Government. Of this amount, \$3.1mn was from the Caribbean Development Bank.

Chart 3.1: Central Government Operations

Sources: MOF and CBB estimates

Chart 3.2: Central Government Current Revenue

Sources: MOF and CBB estimates

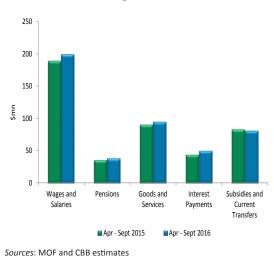

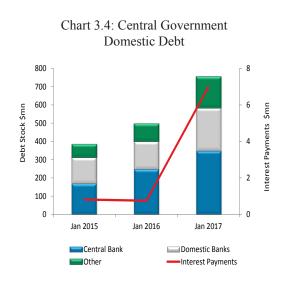

Chart 3.3: Central Government Current Expenditure

- Central Government amortized \$9.3mn, of which \$5.6mn was paid to multilateral creditors and \$3.7mn to bilateral lenders, particularly the Republic of China (ROC) and Government of Venezuela.
- Loan repayments by the non-financial public sector amounted to \$0.5mn, while the financial public sector repaid \$0.2mn.
- Interest and other payments totalled \$3.2mn, with \$2.2mn paid to multilateral lenders and \$1.0mn to bilateral creditors.

Table A.19: Central Government Domestic Debt 2017⁽¹⁾

^R - Revised

P - Provisional
 ⁽¹⁾ Transactions associated with the Universal Health Services (UHS) loan with the Belize Bank Limited are not included in this table, as no action has been taken to enforce the claim.

⁽²⁾ Government has outstanding loan with BSSB for Hopeville Housing Project.

Table A.20: Public Sector External Debt 2017

^R - Revised ^P - Provisional

(1) Effective 21 June 2011, the nationalization of Belize Electricity Limited caused an increase (\$23.1mn) in debt, which was matched by Government's acquisition of assets of equal value.

⁽²⁾ Effective 3 October 2005, loans to BWSL were reclassified as public sector debt as a result of Government of Belize's repurchase of the company.
 ⁽³⁾ International Monetary Fund Special Drawing Rights allocation is included as part of the financial public sector external debt obligation.
