# List of Acronyms and Abbreviations

## **Acronyms:**

BGA	Banana Growers' Association
BSI	Belize Sugar Industries Limited
BTB	Belize Tourism Board
BTL	Belize Telemedia Limited
CARICOM	Caribbean Community
CBB	Central Bank of Belize
CDB	Caribbean Development Bank
CGA	Citrus Growers' Association
COVID-19	Coronavirus Disease 2019
CPBL	Citrus Products of Belize Limited
CPI	Consumer Price Index
GDP	Gross Domestic Product
IBRD	International Bank for Reconstruction and Development
IDB	Inter-American Development Bank
MOF	Ministry of Finance
SIB	Statistical Institute of Belize
UHS	Universal Health Services
US	United States

## **Abbreviations and Conventions:**

\$	the Belize dollar unless otherwise stated
bn	billion
bp	basis point
mn	million
M-o-M	month-on-month
ps	pound solids
TC/TS	long tons cane to long ton sugar
Y-o-Y	year-on-year
YTD	year-to-date
FY	fiscal year

## **Notes:**

1. Since May of 1976, the Belize dollar has been fixed to the US dollar at the rate of US\$1.00 = BZ\$2.00.
2. The 2021 figures in this report are provisional and the figures for 2020 have been revised.
3. Unless otherwise indicated, the Central Bank of Belize is the source of all tables and charts.
4. Ratios to GDP for 2021 are based on GDP estimates from the Central Bank of Belize.

## Overview

### Money and Credit

- Broad money supply (M2) increased by 9.0% or \$317.2mn for the first seven months of 2021. The marked M2 growth was driven by a rapid accumulation in domestic banks' net foreign assets, as credit growth remained lacklustre.
- The foreign asset holdings of the banking system rose by \$202.0mn over the seven-month period. This was mainly due to a \$181.3mn upsurge in domestic banks' net foreign assets, supported by increased foreign exchange earnings in service-based industries, as the economy rebounded from tight lockdown measures, whilst foreign currency measures to limit outflows remained in place. Concurrently, Central Bank's net foreign assets increased by \$20.7mn, as Central Government's external debt service payment deferrals eased foreign currency outflow pressure.
- Net domestic credit inched up by 1.5% over the first seven months of the year relative to the same period a year ago. The slow growth pace reflected a deceleration in credit uptake by Central Government and the private sector and a decline in borrowings by other public sector entities.
- Aggregate loan balances held by credit unions contracted by \$3.1 mn in July, deepening the year-to-date decline to \$26.4mn.
- Domestic banks' excess liquid assets further expanded during the month, up now by \$198.3mn between January and July, reaching 85.3% above secondary requirements. Simultaneously, aggregate excess cash reserves increased by \$32.3mn to \$384.2mn, standing at 171.2% above the primary reserve requirement. The upward momentum continued to be supported by the rapid growth in domestic banks' foreign assets.
- The upward movement in interest rates persisted. The 12-month rolling weighted average interest rate on new loans increased by eight basis points from January through July to 8.60%. At the same time, the corresponding rate for new deposits increased by one basis point to 2.02%. Hence, the weighted average interest spread widened by seven basis points to 6.58% over the review period.

### Real Sector Developments

- Imports continued to grow at a faster pace than exports in July, widening the trade imbalance in goods. For the year to date, domestic export receipts edged up by \$10.1mn to \$231.7mn, underpinned by increased earnings from banana, animal feed, conch, and molasses. Concurrently, gross imports rose sharply by \$212.5mn to \$1,149.0mn, as the reopening of the economy from stiff lockdown measures spurred spending across all major categories of goods.

- Bona fide stay-over arrivals rebounded by 1.3% to 116,855 for the first seven months of the year relative to the same period last year. Cruise ship port calls resumed in July with four anchorages at the Belize City port.
- The Consumer Price Index (CPI) increased by 2.2% on average year-on-year. The inflationary momentum was supported by price increases for fresh fruits, vegetables, fuel, and liquefied petroleum gas. However, reduced prices for electronic devices, clothing, and hotel accommodations moderated the upward movement.

### **Central Government Operations and Public Debt**

- For the first four months (April to July) of the 2021/2022 fiscal year (FY), Central Government's primary balance turned from a deficit of \$105.8mn to a surplus of \$5.6mn, while its overall deficit contracted by \$109.7mn to \$21.9mn relative to the same period of the previous FY. The improved fiscal performance resulted from a 13.6% increase in revenue and grants, alongside a 16.3% fall in expenditure.
- Reflecting the impact of Government's fiscal consolidation efforts, the total public sector debt grew by only \$31.0mn between January and July to \$4,251.2mn (117.0% of GDP). The marginal rise in outstanding liabilities reflected increases of \$29.0mn and \$2.0mn in the external public sector debt and Central Government's domestic debt, respectively.

# 1 Money and Credit

## Money Supply

M2 grew by 9.0% over the first seven months of 2020 relative to the same period last year. This rapid growth pace was driven by an unprecedented expansion in domestic banks' net foreign assets, while net credit to Central Government and the rest of the economy slowed amid the economic fallout caused by the pandemic.

## Net Foreign Assets

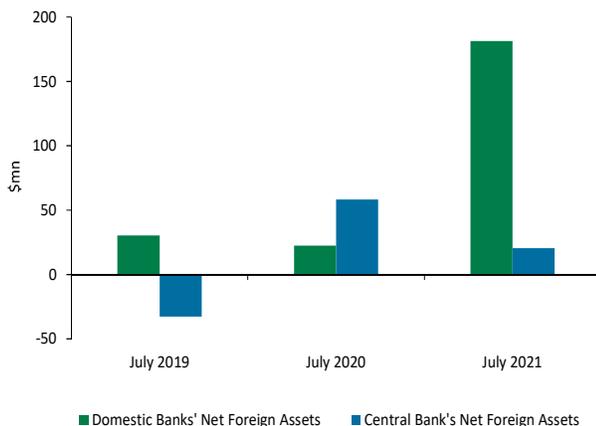

The net foreign assets of the banking system increased by \$202.0mn over the seven-month period to \$1,202.1mn, representing the largest increase over the first seven months of the calendar year since 2015. This sharp build-up was driven by a \$181.3mn rise in domestic banks' net holdings—the largest accumulation between January and July of any year. Gross foreign currency inflows into domestic banks registered a double-digit increase, supported by increased earnings for service-based activities, remittance to households, transfers to regional organisations, and inward foreign direct investments against the backdrop of

the economic recovery. Meanwhile, foreign currency outflows continued to be limited by the temporary suspension of domestic banks' profit/dividend repatriation until the end of 2021 and tightened foreign currency management measures, such as reduced credit card limits to safeguard reserves. In comparison, the Central Bank's net foreign assets increased by \$20.7mn, down from a \$58.2mn expansion over the same period a year ago, owing partially to the falloff in Central Government's external loan proceeds.

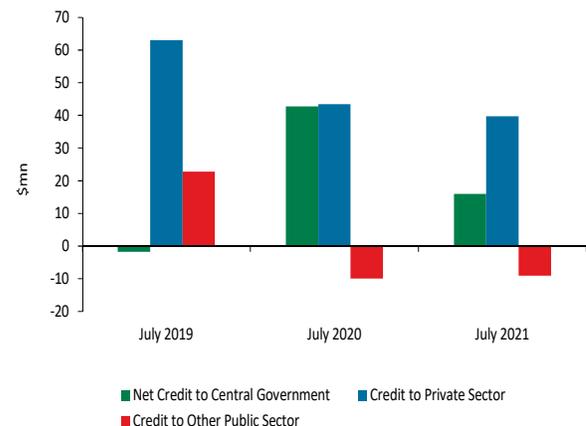

## Net Domestic Credit

Net domestic credit of the banking system grew by 1.5% (\$46.4mn) for the first seven months of 2021 compared to increases of 2.7% and 3.1% in the same period of 2020 and 2019 (pre-pandemic), respectively. The deceleration in credit growth reflected the marginal expansion in net credit to Central Government and the private sector, alongside a reduction in loans to other public sector entities. Shaped by the Government's new debt management strategy, net credit to

**Chart 1.1:** Change in Net Foreign Assets of the Banking System

**Chart 1.2:** Change in Net Domestic Credit of the Banking System

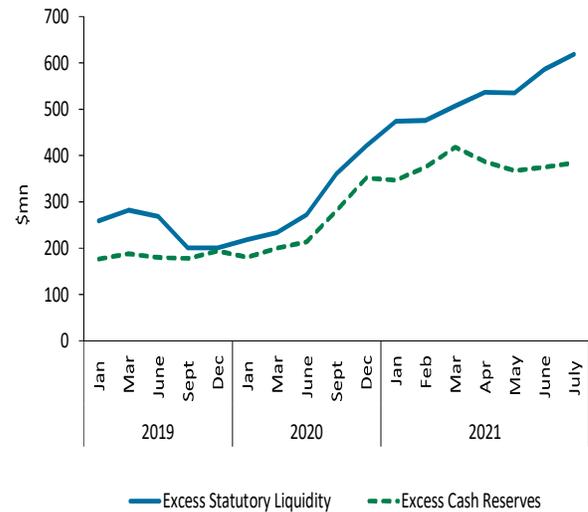

Central Government amounted to \$16.0mn, about two-third less than the amount borrowed in the previous period. The Central Bank provided \$33.5mn in direct financing through the acquisition of Treasuries, whilst Central Government extinguished its overdraft balance of \$61.8mn. Conversely, domestic bank lending to Central Government declined by \$17.5mn, resulting largely from a \$16.9mn increase in Central Government’s commercial bank deposits. Meanwhile, credit to other public corporations contracted by \$9.2mn, owing to a \$10.5mn principal reduction in loans held by public utilities. At \$39.6mn, private sector credit growth weakened, down from \$43.5mn in the comparative period of 2020.

**Bank Liquidity**

The rapid growth in domestic banks' foreign asset holdings contributed significantly to the liquidity build-up in the banking system. Domestic banks’ excess liquid assets ballooned, increasing by \$198.3mn to \$618.6mn and standing at 85.3%

**Chart 1.4:** Excess Statutory Liquidity

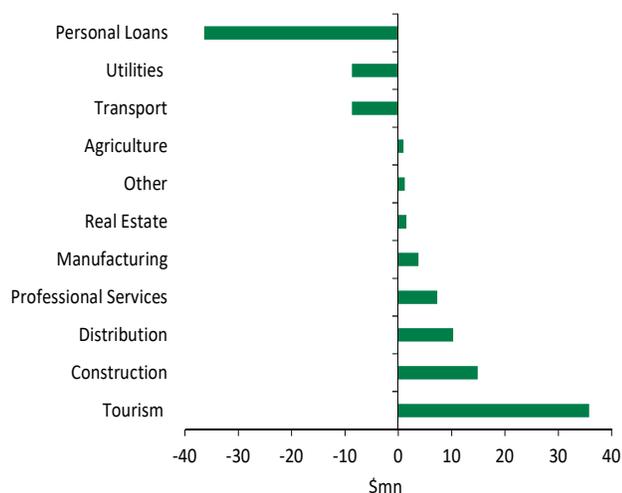

above the secondary reserve requirement. Aggregate excess cash reserves increased by a smaller margin of \$32.3mn to \$384.2mn, underscoring the scale of foreign currency accumulation that contributed to the liquidity upsurge. Nevertheless, excess cash holdings climbed to 171.2% above the primary (cash) reserve requirement.

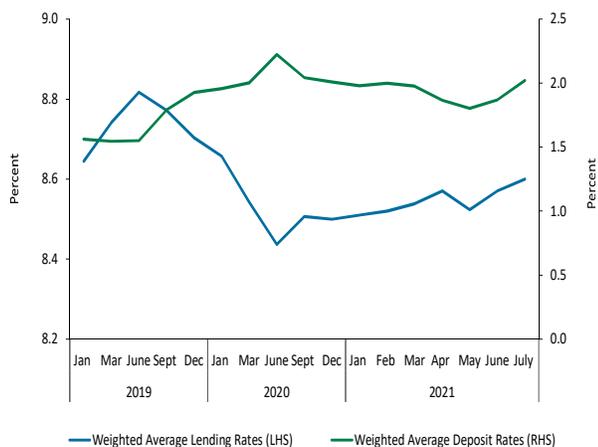

**Interest Rates**

Interest rates continued to trend upward. At 8.60%, the 12-month rolling weighted average interest rate on new loans inched up by one basis point in July relative to June, augmenting an eight-basis-point increase for the first seven months of 2021. Except for the commercial loan category, which dipped by four basis points, the three other major loan categories registered modest rate increases over the year to date. Rates in the “*Personal Loans*” and “*Residential Construction*” categories grew by 26 basis points each, while “*Other*” loans crept up by 18 basis points.

**Chart 1.3:** Change in Domestic Banks' Loans

**Chart 1.5:** Weighted Average Interest Rates on New Loans and Deposits

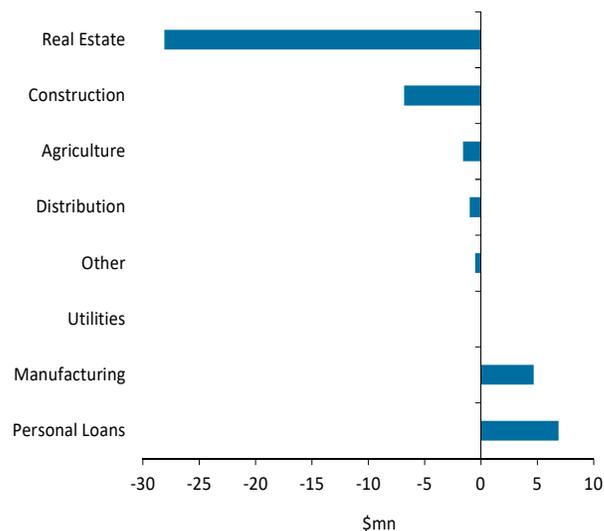

Meanwhile, the 12-month rolling weighted average interest rate on new deposits increased by 11 basis points in July compared to June, yielding a one-basis-point lift between January and July to 2.02%. This outcome resulted as a six-basis-point increase in time deposit rates outweighed declines of nine and 19 basis points in “Savings/chequing” and “Savings” rates, respectively. Demand deposit rates remained at zero basis point. Thus, the weighted average interest spread widened by seven basis points over the review period to 6.58%.

**Credit Union Lending**

Aggregate credit union lending fell by \$3.1mn in July, precipitating a \$26.4mn year-to-date decline. The overall downturn reflected marked reductions in outstanding balances for real estate (\$28.1mn) and home improvement (\$8.5mn) loans. The falloff in these categories eclipsed increased disbursements for personal (\$6.9mn) and manufacturing (\$4.7mn) activities.

**Chart 1.6:** Change in Credit Unions' Loans

## 2 Real Sector Developments

### Commodity Production

Production of majority of Belize’s key export commodities strengthened over the review period. Improved weather conditions contributed to higher outturns of conch, sugar, and banana output, while citrus juice and petroleum production were adversely impacted by other supply-side factors.

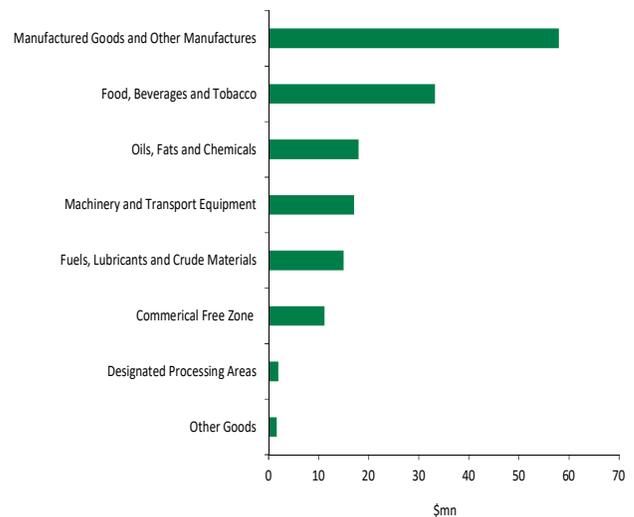

### Domestic Exports

Between January and July, domestic export receipts increased by 4.6% or \$10.1mn to \$231.7mn. Heightened earnings from banana, other domestic exports, conch (captured in marine products), molasses, and petroleum underpinned this expansion. However, a falloff in sugar and citrus juice export receipts tempered the overall growth in revenue.

### Gross Imports

Stimulated by the easing of COVID-19 restrictions, gross imports grew by 22.7% (\$212.5mn) to \$1,149.0mn. The value of imports across all major categories rose, with the majority recording strong double-digit gains. “*Manufactured Goods and Other Manufactures*” grew by the largest amount, up \$66.5mn because of increased purchases of steel pipes, corrugated steel rods, and cement to support the resurgence of construction activities. Concurrently, “*Fuels, Lubricants, and Crude Materials*” rose by \$37.8mn, reflecting both price and volume increases in fuel purchases. “*Food, Beverages, and Tobacco*” was next, expanding by \$33.8mn, owing mainly to beer imports for transshipment to neighbouring

Chart 2.1: Gross Imports

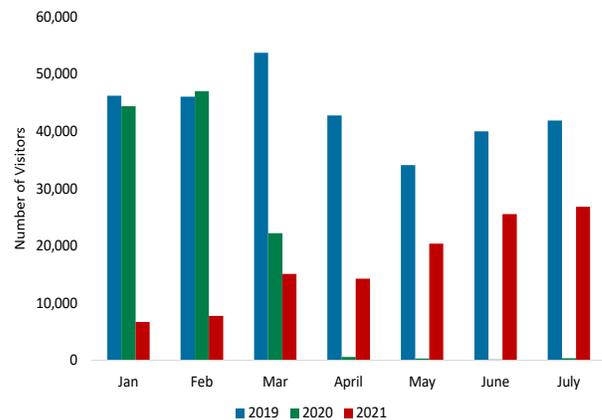

Source: SIB

countries. Lastly, “*Commercial Free Zone*” and “*Machinery and Transport Equipment*” were \$26.8mn and \$23.9mn greater than the previous period, respectively, attributable to higher imports of footwear and tractors, respectively.

### Tourist Arrivals

The number of stay-over visitors rose by 1.3% to 116,855 for the first seven months of the year, marking the first year-to-date

Chart 2.2: Stay-Over Arrivals<sup>(1)</sup>

Sources: BTB, CBB, and Immigration and Nationality Department.

<sup>(1)</sup> Data for June and July 2021 excludes Big Creek Port.

increase for 2021. Underpinned by the easing of international travel restrictions, the turnaround in air arrivals drove the tourism rebound. Air arrivals rose in each month of 2021 through July, while accounting for 93.2% (108,863) of total stay-over.

Cruise line services to Belize resumed in July after being suspended for about 16 months dating back to 13 March 2020. The phased restart was limited to four anchorages at the Belize City port whilst Harvest Caye remained closed. Thus, cruise ship disembarkations for the month amounted to only 10,261 visitors and plummeted by 96.7% over the review period relative to the first seven months of 2020.

### Consumer Price Index

CPI, a measure of price changes for a basket of household goods and services, increased by 0.4% in July relative to June and by 2.2% on average from January to July of 2021 relative to the same period of 2020. The modest rise in price level over the seven-month period was the largest percentage change over the same calendar period since 2008. The upward price momentum was largely attributable to increased costs of imported petroleum products and fresh produce. Accordingly, price hikes were observed for automobile fuel in “*Transport*” (5.8%), fresh fruits and vegetables in “*Food and Non-Alcoholic Beverages*” (4.6%), and liquefied petroleum gas in “*Housing, Water, Electricity, Gas, and Other Fuels*” (1.1%). Price declines for tablets, external storage devices, and television sets in “*Information and Communication*” (3.9%); men’s and

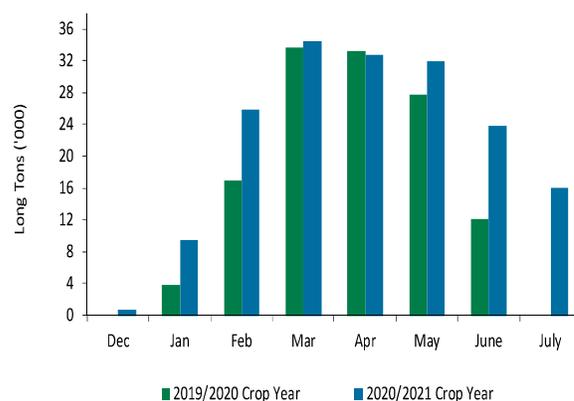

women’s clothing in “*Clothing and Footwear*” (0.9%); and hotel accommodation in “*Restaurants and Accommodation Services*” (7.6%) partially offsetted the inflationary trend.

### Sugarcane and Sugar

Aggregate sugarcane deliveries skyrocketed, up 23.2% to an all-time high of 1,863,756 long tons for the 2020/2021 harvest season. This extraordinary performance reflected the rebound from drought damages in the north and harvests from increased investments in new production acreage out west.

The 2020/2021 northern sugarcane harvest ended on 28 July, spanning 213 days starting on 28 December 2020. Sugarcane deliveries rose sharply by 36.2% to 1,198,072 long tons this crop year relative to the previous crop that was shorter in duration (lasting only 189 days) and scarred by drought damages. Improved cane quality caused sugar production to rise by 40.9% to 121,751 long tons. Consequently, key performance indicators, particularly, factory time efficiency and cane purity strengthened by 5.1% and

**Chart 2.3:** Monthly Sugar Production

Sources: BSI and Santander Group

1.0%, respectively. This outcome supported a 3.3% improvement in the long tons cane to long ton sugar (TC/TS) ratio to 9.8.

The 2021 harvest season out west ran for 178 days, ending on 21 July 2021. Sugarcane deliveries grew by 5.2% to 665,685 long tons, owing to increased production acreage. Notwithstanding, sugar production was down 3.7% to 53,314 long tons, as heavy rains inundated cane fields and weakened cane quality in the process. This raised fungal infection in fields, which contributed to a 0.9% downturn in cane purity and an 8.9% deterioration in the TC/TS ratio to 12.5.

Sugar export volume increased by 10.1% to 88,954 long tons for the first seven months of the year. However, revenues fell by 7.1% to \$67.7mn, owing to a sharp falloff in bulk raw sugar prices, which comprised 77.4% of total international sales. Europe accounted for 92.3% of total sugar exports, having purchased 82,142 long tons valued at \$60.1mn. Only 13,307 long tons of the region's uptake was value-added bagged

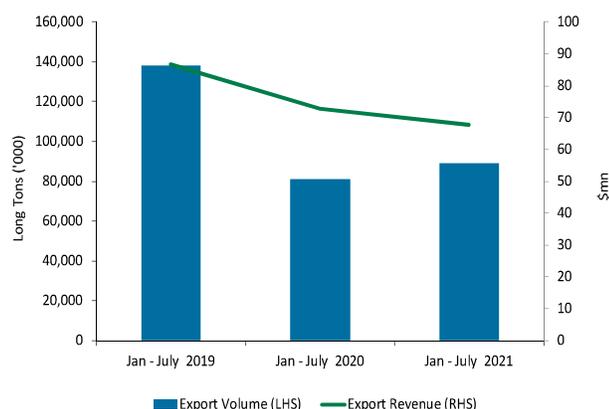

sugar, while 68,835 long tons was raw bulk sugar. The larger share of bulk sugar in the export mix contributed to a 14.2% year-on-year decline in the average export price to \$0.33 per long ton. The remaining export destinations purchased only bagged sugar. More specifically, CARICOM and Canada bought 6,790 long tons and 22 long tons, valued at \$7.5mn and \$0.1mn, respectively. Notably, value-added direct consumption sugar prices rose 5.8% to \$0.50 per pound. Lastly, molasses exports surged by 63.9% to 45,657 long tons, valued at \$12.0mn.

### Citrus

Citrus deliveries nosedived by 38.4% to 1,374,525 boxes for the 2020/2021 crop year to date (October 2020 to July 2021), owing to the deleterious effects of citrus greening. Hence, orange and grapefruit deliveries contracted by 39.2% to 1,259,496 boxes, and by 28.9% to 115,029 boxes, respectively.

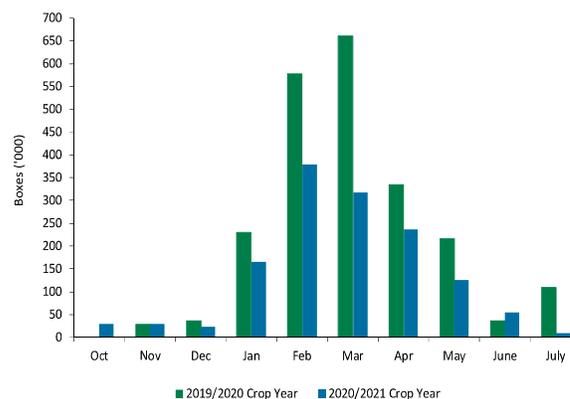

Lower fruit quality exacerbated citrus juice production, which plummeted by 41.4% to 7.6mn ps. The average juice outturn

**Chart 2.4: Sugar Exports**

Sources: BSI and Santander Group

**Chart 2.5: Citrus Deliveries**

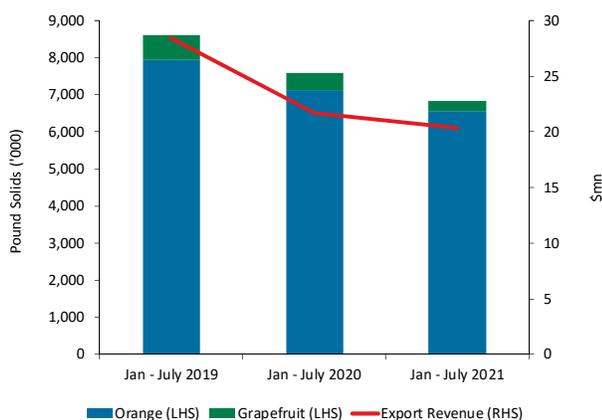

Source: CPBL

per box of fruit fell by 4.9%, with orange and grapefruit yields down by 4.1% and 11.1%, respectively. Orange concentrates constituted 92.1% or 7.0mn ps of total juice production, while the remainder was split between grapefruit concentrate (0.4mn ps) and not-from-concentrate juices (0.2mn ps).

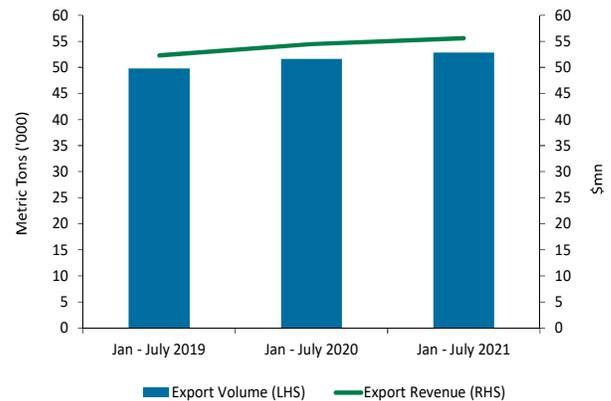

Despite the 10.0% fall in citrus juice export volume to 6.8mn ps, citrus juice earnings declined by a lesser 5.9% to \$20.4mn, ameliorated by a 7.5% uptick in average orange concentrate prices. The bulk of orange concentrates was shipped to CARICOM. That region accounted for 48.4% of total product sales, which amounted to 3.2mn ps, valued at \$11.0mn. The US purchased 34.0%, the second largest share of orange concentrate exports, having bought 2.2mn ps valued at \$4.9mn. Notably, prices on that market surged, up 16.4% amid heightened demand for vitamin-C-rich food during the pandemic. The remaining 1.1mn ps and 0.01mn ps of orange concentrates were sold to Europe and Latin America, garnering \$2.8mn and \$0.04mn, respectively. Grapefruit concentrate sales were minimal

**Chart 2.6:** Citrus Juice Export Volume and Revenue

Source: CPBL

**Chart 2.7:** Banana Exports

Source: BGA

with only 0.3mn ps sold across major markets for \$1.5mn.

**Banana**

Banana exports expanded by 2.3% to 52,846 metric tons for the first seven months of the year. The modest improvement reflected the extent of the industry’s recovery from Hurricane Nana’s damages in September 2020. Meanwhile, banana export revenue grew by 2.1% to \$55.6mn, reflecting a slight 0.3% decline in the average unit price.

**Petroleum**

Crude oil extraction fell by 14.8% over the seven-month period to 99,652 barrels with the average extraction rate down 79 barrels to 470 barrels per day. Most of the oil extracted was from Spanish Lookout. Never Delay, the next commercial field, produced only 312 barrels since resuming operations in April 2021 after 13 months of dormancy.

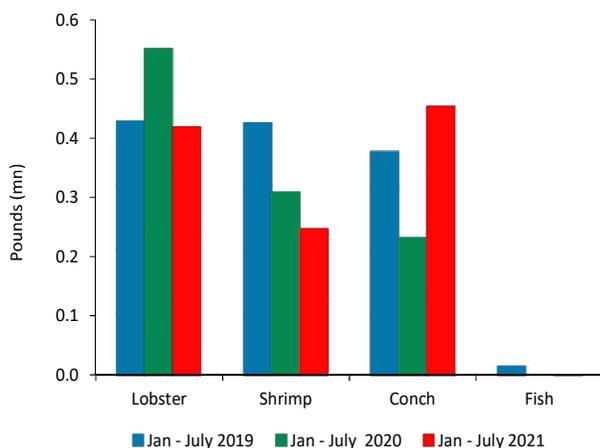

Over the review period, 4,679 barrels of crude oil valued at \$0.5mn were exported to Guatemala, yielding an average price of

US\$51.67 per barrel. There were no crude oil exports in the comparable period of 2020.

### Marine Exports

Marine export volume was up by 2.6% to 1.1mn pounds. The modest increase in export volume was driven by an upsurge in conch sales, which countered marked falloffs in lobster and farmed shrimp export volume. Marine export receipts rose by an even larger margin, up 9.2% to \$22.1mn, owing to substantial price improvements for lobster and conch. Thus, conch revenue more than doubled to \$6.6mn, as a 96.3% expansion in export volume was augmented by an 11.4% uptick in average unit price. Meanwhile, lobster sales plunged by 24.1% to 0.4mn pounds on account of cyclical reproductive factors. However, a 21.9% boost in the average unit price softened the overall decline in lobster earnings to 7.5% at \$14.3mn. Lastly, farmed shrimp continued to be impeded by the early mortality syndrome disease, down 19.7% to 0.2mn pounds. Its revenue declined by a larger 34.3%, following an 18.1% price downturn.

**Chart 2.8:** Marine Export Volume

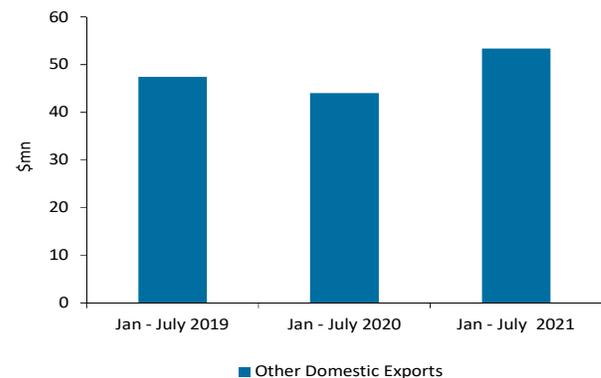

Sources: CBB and SIB

### Other Domestic Exports

Other domestic export receipts increased by 21.2% to \$53.4mn over the first seven months of the year. The surge in revenue was propelled by higher sales of animal feed (\$7.2mn), other miscellaneous domestic exports (\$5.2mn), sawn wood (\$1.0mn), and pepper sauces (\$0.8mn). Increased earnings from these items outweighed relatively smaller contractions from red kidney beans (\$2.3mn), black-eyed peas (\$1.7mn), and fresh oranges (\$0.7mn).

**Chart 2.9:** Other Domestic Exports

Source: SIB

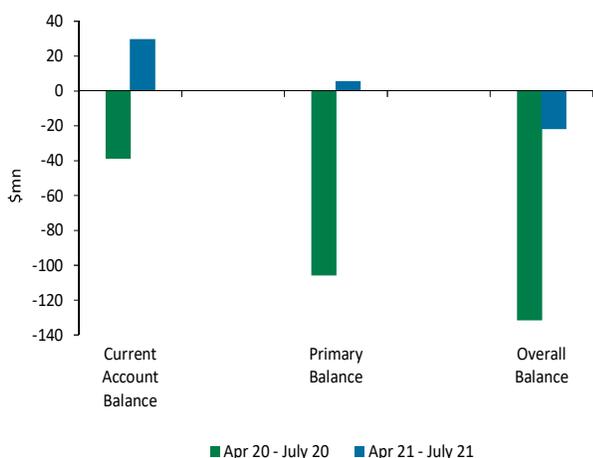

### 3 Central Government Finance

#### Central Government Operations

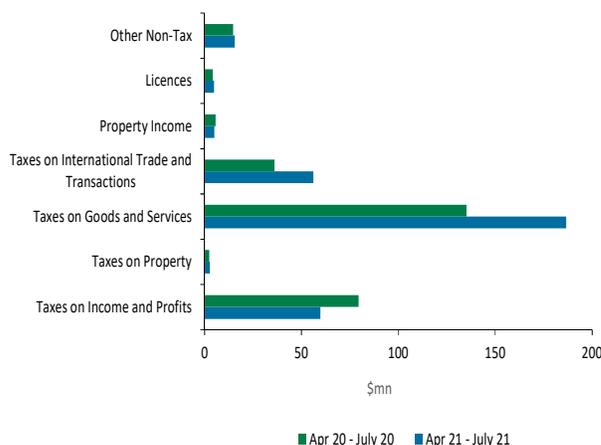

Central Government’s fiscal performance improved markedly during the first four months of the FY 2021/22 (April-July). The revenue boost (stemming from reopening the economy), alongside reduced spending (emanating from new fiscal consolidation measures), yielded a primary surplus of \$5.6mn (0.2% of GDP) and an overall deficit of \$22.0mn (0.6% of GDP). These metrics of fiscal performance were significantly stronger than primary and overall deficits of \$105.8mn (3.1% of GDP) and \$131.6mn (3.8% of GDP), respectively, achieved in the same period of the previous FY when the pandemic struck.

Total revenue and grants rose by \$40.1mn to \$334.2mn, representing 28.3% of the approved budget. The revenue increase was driven by higher tax collections, which grew by 20.5% or \$51.9mn to \$305.2mn. The resurgence in economic activity spurred a \$51.3mn growth in taxes on goods and services, with significant increases in

**Chart 3.1:** Central Government Operations

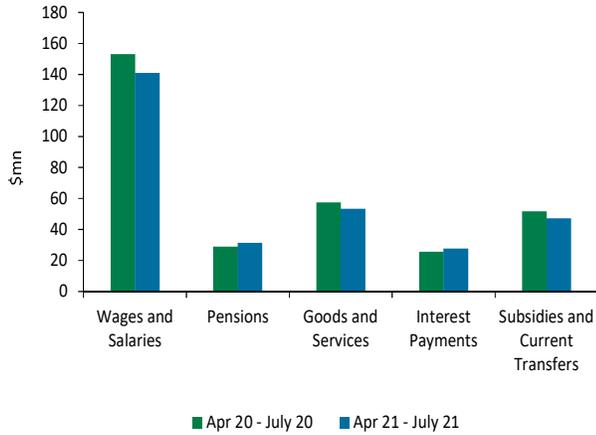

**Chart 3.2:** Central Government Current Revenue

collections of general sales tax (\$16.7mn), excise duties (\$17.9mn), and stamp duties (\$11.4mn). Furthermore, taxes on international trade and transactions increased by \$20.0mn to \$56.1mn, propped up by a \$14.3mn expansion in import tax receipts. However, income and business taxes declined by \$5.3mn and \$12.5mn, respectively, underscoring the lingering adverse effects of health crisis on the economy. Meanwhile, non-tax revenue edged up by \$0.7mn to \$25.4mn, while grants declined by \$5.7mn to \$2.5mn on account of the slowdown in COVID-19-related intergovernmental donations.

Total expenditure fell by \$69.6mn to \$356.1mn, driven by cuts in current expenditure and, to a greater extent, capital spending. Current expenditure contracted by \$16.2mn to \$300.7mn, underpinned by declines across all major expenditure categories, except “Pensions” and “Interest Payments.” “Wages and Salaries” fell by \$12.1mn due to the 10.0% public sector

**Chart 3.3:** Central Government Current Expenditure

wage cut that came into effect in June. This was followed by “*Transfers and Subsidies*” and “*Goods and Services*,” which slid by \$4.6mn and \$3.9mn, respectively. Total outlays on capital II and capital III projects plunged 49.3% (\$53.4mn) to \$55.0mn mostly on account of a lessening in COVID-19-related spending. Expenditure on infrastructural works accounted for 45.6% of capital outlays and comprised road and drain maintenance, as well as the George Price and Southern Highways upgrades.

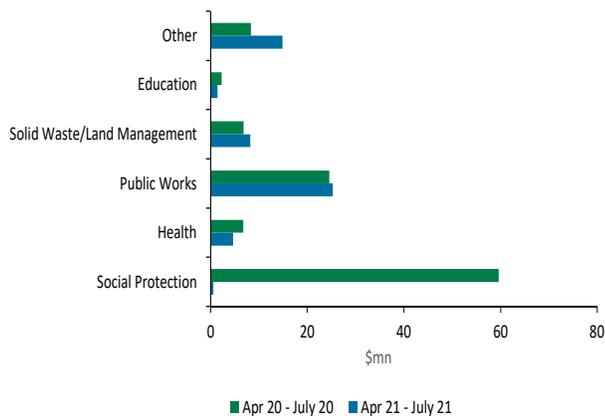

Environmental and land management projects accounted for 20.5% combined, while 8.4% was allocated to the health sector to support the combat of COVID-19.

**Central Government Domestic Debt**

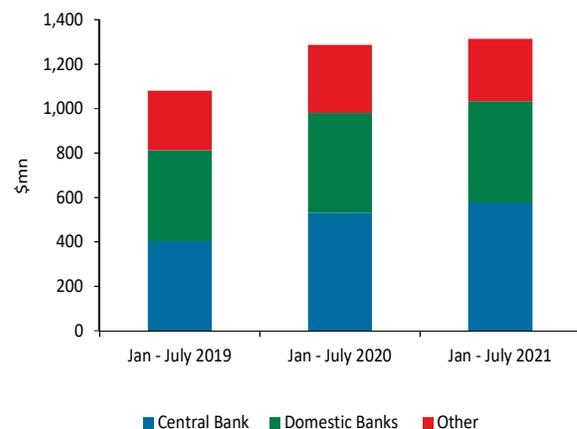

Despite issuing \$40.0mn worth of new Treasury Notes (T-notes) in March and Central Bank’s acquisition of \$24.0mn worth of Treasury bills (T-bills) from a regional organisation, Central Government’s domestic debt rose by only \$2.0mn (0.2%) to \$1,315.2mn over the first seven months of 2021. This outcome was primarily due to the clearing of Central Government’s \$61.8mn overdraft balance with the Central Bank in June.

Nevertheless, the Central Bank’s holdings of T-bills rose by \$27.8mn over the period. In contrast, the amount held by non-bank entities and domestic banks slid by \$3.4mn and \$0.4mn, respectively. Additionally, the Central Bank acquired \$9.9mn in T-notes from a non-bank financial institution on the secondary market.

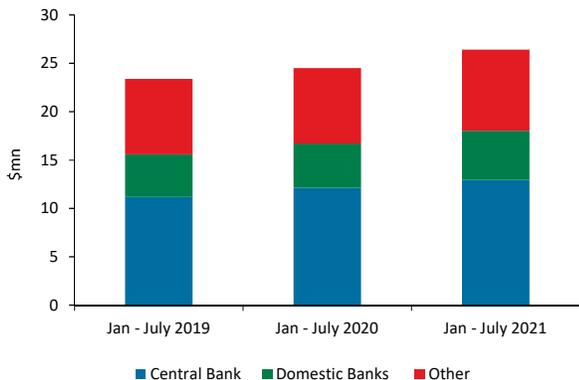

**Chart 3.4:** Main Development Expenditure Categories

**Chart 3.5:** Distribution of Central Government's Domestic Debt

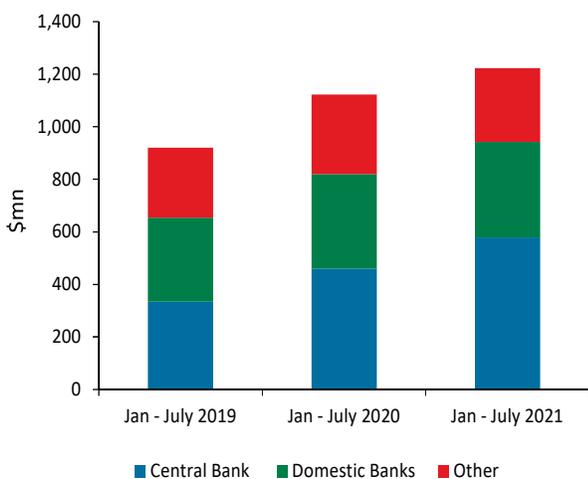

**Chart 3.6:** Distribution of Interest Payments on Central Government's Domestic Debt

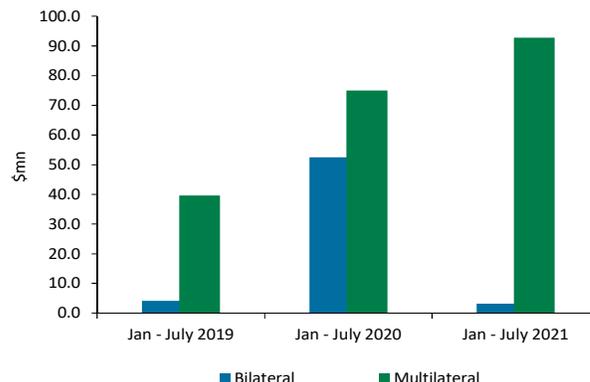

Of the \$26.4mn in total interest payments, the Central Bank received the largest portion, earning \$13.0mn on its securities holdings and overdraft facility. Furthermore, Central Government paid domestic banks and non-bank entities \$5.0mn and \$8.4mn, respectively, on their investments.

The Central Bank remained the largest domestic creditor to Central Government. At July-end, its share of domestic liabilities expanded by 1.1 percentage points to 44.0%. Conversely, the shares held by domestic banks and non-bank entities contracted by

**Chart 3.7:** Distribution of Central Government's Domestic Securities

**Chart 3.8:** External Disbursements to Central Government by Creditor Type

0.1 and 1.1 percentage points to 34.6% and 21.4%, respectively.

**Public Sector External Debt**

The public sector's external debt stock edged up by 1.0% or \$29.0mn over the first seven months of 2021 to \$2,935.9mn. This outcome resulted as loan disbursements of \$112.1mn exceeded principal repayments of \$83.4mn.

Central Government received \$109.4mn (97.6%) of total disbursements, all of which was sourced from multilateral and bilateral agencies. Proceeds on COVID-19-related measures amounted to \$63.2mn, including:

- \$6.8mn from the Organisation of the Petroleum Exporting Countries to finance the Food Assistance Programme,
- \$16.1mn from the Caribbean Development Bank (CDB) to cover debt service payment deferrals,
- \$20.3mn from the International Bank for Reconstruction and Development (IBRD) to finance the Belize COVID-19 Cash Transfer Program and to support agricultural households, and

- \$13.5mn to capitalise February’s interest payment that fell due on the 2034 US dollar bond.

Central Government borrowings for capital investment projects totalled \$46.1mn, including:

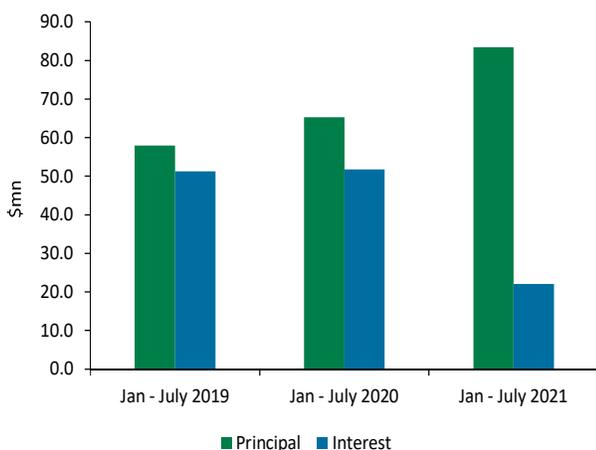

- \$11.9mn for the Caracol Road Upgrade Project,
- \$6.2mn for the Coastal Highway Project,
- \$4.6mn for the Strengthening of Tax Administration Project,
- \$4.1mn for the Education Sector Reform Project, and
- \$3.0mn for the Sarteneja Road Upgrade Project.

Loan disbursements to the non-financial sector summed to \$0.4mn. All of this amount went to the Belize Electricity Limited to fund their ongoing Electricity System Upgrade and Expansion Project. Concurrently, the Development Finance Corporation borrowed \$2.3mn to supplement their consolidated line of credit.

Principal repayments summed to \$83.4mn over the period, with Central Government accounting for 92.7% (\$77.4mn) of the total. When disaggregated, \$14.6mn went to bilateral creditors and \$62.8mn to multilateral lenders, including the redemption of \$24.0mn in T-bills by the Caribbean Community Climate Change Centre. Meanwhile, the non-financial and financial public sectors repaid \$4.9mn and \$1.2mn, respectively, on their loans from CDB.

Interest and other payments amounted to \$22.1mn, excluding the \$13.5mn in interest expense on the 2034 US dollar bond that was capitalised earlier in the year. Interest payments to multilateral creditors amounted to \$14.7mn; bilateral creditors, \$6.2mn; and commercial creditors, \$1.2mn.

<sup>R</sup> - Revised<sup>P</sup> - Provisional

<sup>(1)</sup> Since September 2017, debt service payments for oil imports have been suspended due to U.S. sanctions on Petroleos de Venezuela, S.A. Unpaid debt service payments up to the end of July 2021 amounted to principal of \$65.9mn and interest of \$14.4mn.

<sup>(2)</sup> In accordance with the agreed amendments set forth in the Consent Solicitation Statement dated August 2020, disbursement of \$13.5mn represents the capitalised interest for quarter one, 2021.
