List of Acronyms and Abbreviations

Acronyms:

BGA	Banana Growers' Association
BSI	Belize Sugar Industries Limited
BTB	Belize Tourism Board
BTL	Belize Telemedia Limited
CARICOM	Caribbean Community
CBB	Central Bank of Belize
CDB	Caribbean Development Bank
CGA	Citrus Growers' Association
COVID-19	Coronavirus Disease 2019
CPBL	Citrus Products of Belize Limited
CPI	Consumer Price Index
GDP	Gross Domestic Product
IDB	Inter-American Development Bank
MOF	Ministry of Finance
SIB	Statistical Institute of Belize
UHS	Universal Health Services
US	United States

Abbreviations and Conventions:

\$	the Belize dollar unless otherwise stated
bn	billion
bp	basis point
mn	million
M-o-M	month-on-month
ps	pound solids
TC/TS	long tons cane to long ton sugar
Y-o-Y	year-on-year
YTD	year-to-date

Notes:

1. Since May of 1976, the Belize dollar has been fixed to the US dollar at the rate of US\$1.00 = BZ\$2.00.
2. The 2021 figures in this report are provisional and the figures for 2020 have been revised.
3. Unless otherwise indicated, the Central Bank of Belize is the source of all tables and charts.
4. Ratios to GDP for 2021 are based on GDP estimates from the Central Bank of Belize.

Overview

Money and Credit

- Broad money supply (M2) grew by 7.9% (\$277.6mn) between January and May. The strong growth in M2 was supported by a sharp rise in domestic banks' net foreign assets and modest growth in credit to Central Government (net) and the private sector.
- The net foreign assets of the banking system rose by \$114.8mn over the five-month period, supported by a \$116.5mn expansion in the net foreign asset holdings of the domestic banks as those of the Central Bank declined by \$1.7mn. This rapid accumulation of domestic banks' foreign assets was partly influenced by the post-pandemic rebound in foreign currency inflows in some industries as well as the impact of stricter foreign currency management measures instituted at the onset of the coronavirus disease (COVID-19) outbreak.
- Net domestic credit rose by 2.3% (\$69.8mn) over the year to date. Central Government accounted for nearly two-thirds (\$47.2mn) of the total credit growth, while the balance went to the private sector, primarily to service-oriented firms.
- Credit union lending contracted further by \$26.2mn for the first five months of 2021 following a \$1.5mn dip in May.
- Domestic bank liquidity remained elevated, fueled in part by the buildup in foreign assets. Over the review period, domestic banks' holdings of excess statutory liquid assets expanded by \$115.0mn to \$535.3mn (75.8% above secondary reserve requirements), and excess cash reserves increased by a much smaller \$15.6mn to \$367.4mn (168.1% above primary reserve requirements).
- Interest rates continued on a downward path. The 12-month rolling weighted average interest rate on new loans fell by 3 basis points to 8.52%, and the corresponding rate for new deposits fell by 14 basis points to 1.80% over the last six months through May.

Real Sector Developments

- Belize's GDP contracted by 8.4% in the first quarter of 2021 compared with the same quarter a year ago, owing mainly to economic losses attributable to the pandemic and, to a much lesser extent, a decline in agricultural and fishing output.
- From January to May, domestic export revenue rose by 15.0% (\$22.5mn) to \$172.2mn with most commodities registering higher receipts, save for citrus and molasses. Similarly, gross imports increased by 9.5% (\$67.6mn) to \$777.6mn, spurred by the gradual recovery in economic activity from the adverse effect of the pandemic.

- Bona fide stay-over arrivals rose by 42.6% month on month in May but fell by 43.7% year on year for the first five months of 2021 to 64,440 visitors. There were no cruise ship port calls in May.
- The Consumer Price Index (CPI) rose by 1.8% on average over the first five months of the year. The mild inflationary pressure was attributable to price hikes for fresh fruits and vegetables, fuel, and liquefied petroleum gas. However, reduced prices for cell phone charges, female garments, and hotel accommodation rates tempered the upward momentum.

Central Government Operations and Public Debt

- Total public sector debt increased by \$50.5mn to \$4,270.6mn over the first five months of the year. Central Government's domestic debt rose by 2.9% (\$38.7mn) to \$1,351.9mn, while the public sector's external debt grew by a lesser 0.4% (\$11.8mn) to \$2,918.7mn.

1 Money and Credit

Money Supply

For the first five months of 2021, M2 increased by 7.9% year on year, compared to a more modest 2.6% growth rate registered in same period of 2020. The fast growth in money was fuelled by a sharp rise in domestic banks' foreign assets, alongside smaller increases in credit to Central Government (net) and the private sector. In addition, the conversion of a former domestic bank's equity into deposits also boosted money growth.

Net Foreign Assets

The net foreign assets of the banking system expanded by \$114.8mn to \$1,114.8mn between January and May. This strong performance was driven by an upsurge in domestic banks' net foreign asset holdings, while those of the Central Bank declined. Over the review period, domestic banks' net foreign assets increased by \$116.5mn (38.7%) to a record high \$417.3mn, following a \$37.7mn build-up in May. The strong outturn reflected increased foreign currency earnings from business outsourcing

activities, remittances, and foreign direct investments, as well as a resurgence in tourism and re-export receipts after restrictions eased at select border points. Furthermore, measures implemented to curb foreign currency outflows remained in place to protect the banking system amid heightened risks arising from COVID-19.

Concurrently, the Central Bank's net foreign assets dipped by \$1.7mn (0.2%) to \$697.5mn. Gross foreign currency outflows amounted to \$91.0mn, reflecting a \$20.5mn (18.4%) decline when compared to the same period in 2020. This reduction was largely due to the debt-service-payment deferrals received on the 2034 US dollar bond. Notwithstanding, 64.0% of total outflows went to Central Government, most of which included debt service payments on its external liabilities. Gross foreign currency inflows were slightly less than outflows at \$89.4mn. Up 1.2%, inflows stemmed mainly from loan disbursement proceeds (\$42.7mn) and sugar export receipts (\$37.2mn). The gross official international reserves inched up by 0.2% to \$697.8mn. However, the merchandise import cover ratio fell from 5.2 months in December 2020 to 5.0 months this month, as imports picked up in line with the rebound in economic activities.

Net Domestic Credit

From January to May, net domestic credit rose by \$69.8mn (2.3%) to \$3,109.6mn, spurred by increased credit to Central Government (net) and the private sector, as lending to other public sector entities declined. Accounting for about two-thirds of

Chart 1.1: Change in Net Foreign Assets of the Banking System

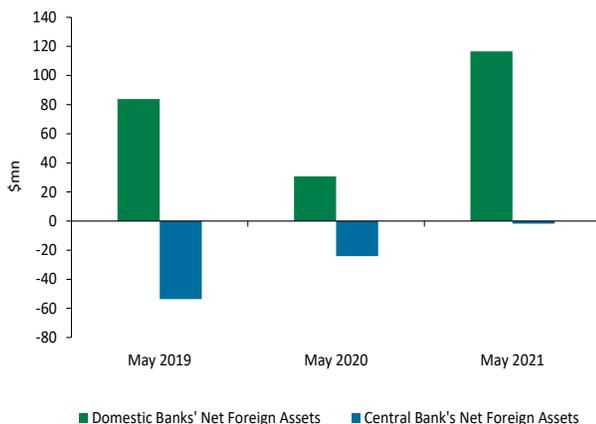

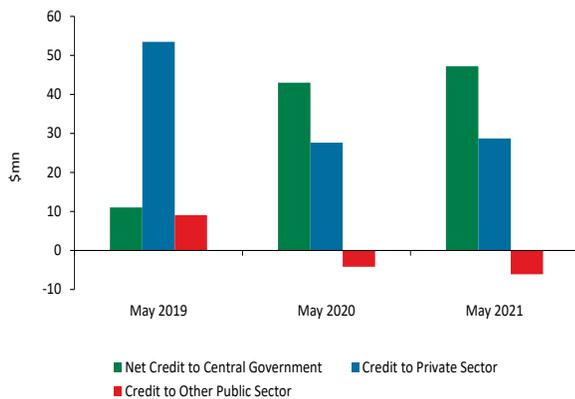

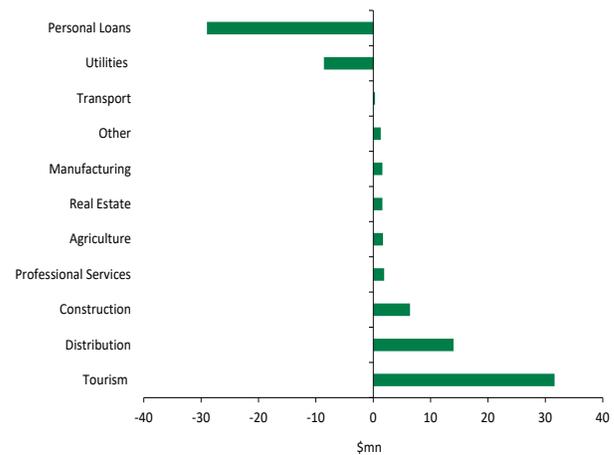

Chart 1.2: Change in Net Domestic Credit of the Banking System

the total credit growth, net credit to Central Government grew by \$47.2mn (6.5%) to \$769.4mn. Of this amount, the Central Bank advanced \$36.6mn (77.5%) after purchasing \$50.3mn worth of Treasury securities, while Central Government withdrew \$11.5mn from its deposits. These were partly offset by a \$25.2mn reduction in Central Government’s overdraft balance at the Central Bank. At May-end, the overdraft balance was reduced to \$36.6mn, 34.9% of the statutory limit. In addition, domestic banks’ net credit to Central Government increased by \$10.6mn, as \$24.0mn in aggregate Treasury security purchases were partly offset by a \$13.4mn increase in Government’s commercial bank deposits.

Meanwhile, domestic banks’ lending to other public sector entities contracted for the fourth consecutive month, down \$2.8mn in May and \$6.1mn over the first five months of the year. The overall decline resulted as net loan repayments of \$7.8mn by public utilities exceeded net disbursements of \$1.7mn to local governments.

Chart 1.3: Change in Domestic Banks' Loans

Domestic bank lending to the private sector rose by \$8.5mn in May, increasing the year-to-date total to \$28.7mn. Net disbursements were concentrated in the tertiary sector, with credit increases of \$31.6mn, \$14.0mn, \$1.9mn, and \$1.6mn to the tourism, distributive, professional, and real estate industries, respectively. Furthermore, credit to the secondary sector entailed \$6.4mn and \$1.6mn for construction and manufacturing activities, respectively. The primary sector received only \$1.7mn for agriculture, while outstanding balances on personal loans contracted by \$29.0mn.

Loan write-offs increased to \$13.5mn for the first five months of the year, which was \$4.0mn higher than the amount recorded in the same period last year. Write-offs were applied mainly against non-performing loans issued for personal (\$10.4mn), construction (\$2.7mn), and merchandise trade (\$0.3mn) activities. The month-on-month growth pace of COVID-19 loan forbearances slowed to 0.5% in May, raising the total by \$4.5mn to \$830.4mn, equivalent to 36.1% of domestic banks’ total loan portfolio.

Chart 1.4: Excess Statutory Liquidity

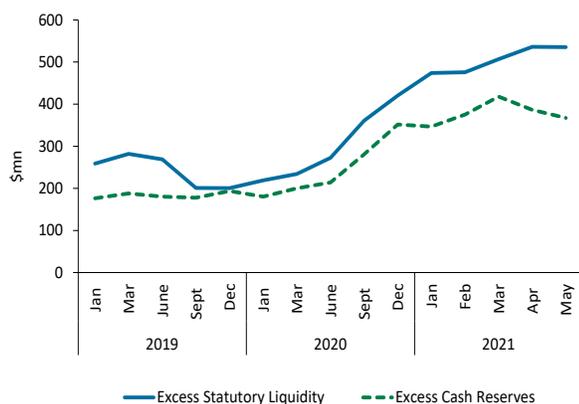

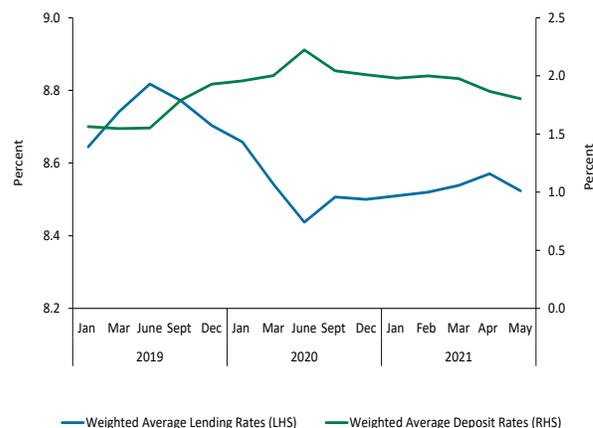

Chart 1.5: Weighted Average Interest Rates on New Loans and Deposits

Other Items (Net)

The sale of Scotiabank (Belize) Limited, which took effect on 1 April, led to the conversion of its retained earnings to demand and time deposits with another domestic bank. This caused other items net to contract by \$93.2mn.

Bank Liquidity

Despite falling marginally in May, bank liquidity remained elevated during the first five months of 2021. At month end, domestic banks’ excess statutory liquidity was \$115.0mn above its 2020 year-end position at \$535.3mn (75.8% above secondary reserve requirements). Similarly, excess cash reserves were \$15.6mn higher at \$367.4mn (168.1% above primary reserve requirements). Excess cash holdings grew by a lesser margin, as domestic banks invested cash balances in Government securities given that loan conditions tightened amid the pandemic.

Interest Rates

The spill-over effects of the COVID-19 pandemic continued to shape interest rate developments. Against a backdrop of

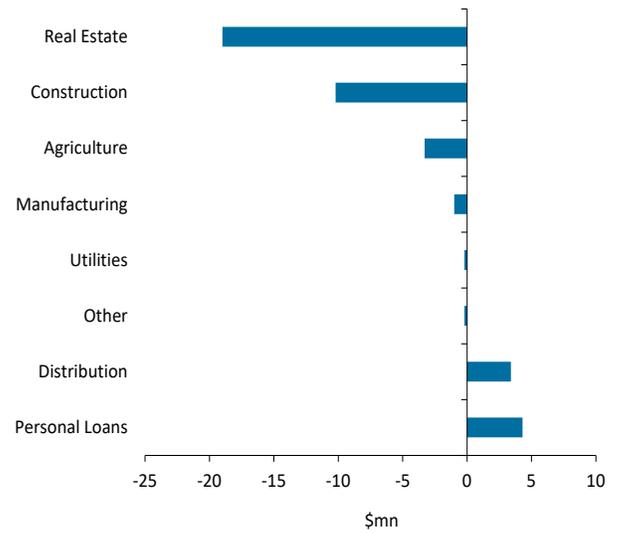

waning aggregate demand, the 12-month rolling weighted average interest rate on new loans fell by five basis points month-on-month and by three basis points when compared to November 2020 to 8.52%. The downward trend over the six-month period was attributable to a six-point reduction in commercial loan rates, which outweighed rate increases of four, seven, and 34 basis points for personal, residential construction, and “other” loans, respectively.

The corresponding rate on new deposits fell by six basis points month on month in May and by 14 basis points since November 2020 to 1.80%. The sharp rise in bank liquidity reduced rates on savings and chequing and savings deposits by 24 and 23 basis points, respectively, over the last six months. Underscoring the skewed distribution of bank deposits, time deposits rates still grew by four basis points, while demand deposits rates remained unchanged. Thus, the 12-month rolling weighted average interest rate spread widened by 12 basis points to 6.72% over the six-month period.

Credit Union Lending

Lending by credit unions continued its downward path, declining by \$26.2mn across the five-month period after sliding by \$1.5mn in May. The downturn was attributable to net repayments and write-offs on real estate (\$19.0mn), construction (\$10.2mn), and agricultural (\$3.3mn) loans. These declines overshadowed net disbursements of \$4.3mn and \$3.4mn for personal and distributive trade purposes. Write-offs totalled \$12.8mn, significantly higher than the \$1.8mn registered during the same period a year ago. Loans with principal value of \$0.8mn received forbearances because of COVID-19 in May, nudging up the total to \$151.4mn, the equivalent of 24.7% of credit unions' aggregate loan portfolio.

Chart 1.6: Change in Credit Unions' Loans

2 Real Sector Developments

Quarterly GDP: January to March 2021

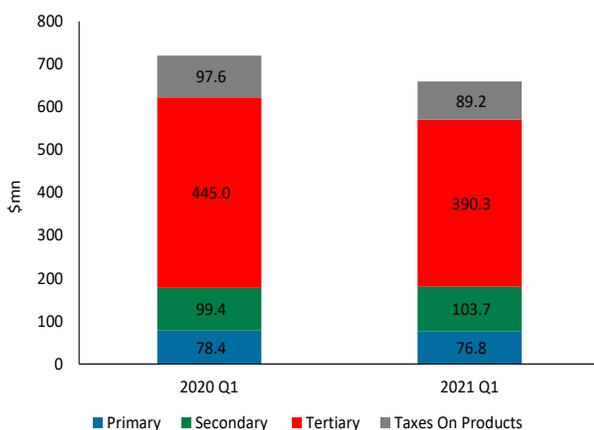

One year into the pandemic, Belize’s GDP is estimated to have contracted by 8.4% in the first quarter of 2021 compared with the same quarter a year ago. As a result, the level of GDP over the last year (April 2020 to March 2021) had declined by 14.6% in the four preceding quarters before the pandemic struck.

The largest contributor to the quarterly output decline was the 12.3% contraction in the tertiary (services) sector. Governmental restrictions to contain the spread of COVID-19 continued to suppress tourism-related activities, causing output in “*Hotels and Restaurants*” and “*Transport and Communication*” to contract by 81.7% and 14.3%, respectively. Concurrently, the shock to domestic consumption promulgated a 7.3% decline in “*Wholesale and Retail Trade*,” while tightened Government spending on public workers’ wages yielded a 4.6% decline in “*Producers of Government Services*.”

Output in the primary sector contracted by 2.1%, slowed mainly by the adverse impact of diseases and storm damages on agriculture crops, aquaculture production, and marine activities. Output in the “*Agriculture, Hunting, and Forestry*” industry dipped 0.8%, as marked declines in citrus and banana outweighed a resurgence in sugarcane yields. “*Fishing*” collapsed even more severely, down 18.3% with value-added losses stemming from declines in farmed shrimp production and wild-lobster catches overshadowing positive contributions from a strong conch haul.

However, secondary sector activity increased by 4.3%. This upturn was supported by a resurgence in hydroelectricity generation, which was stifled by below average rainfall during 2020, and in construction activities, which was inhibited by COVID-19-lockdown measures. Consequently, output in the “*Electricity and Water*” and “*Construction*” subsectors grew by 24.5% and 15.7%, respectively. These strong performances were partly offset by a 9.8% reduction in

Chart 2.1: Quarterly GDP

Sources: SIB

Chart 2.2: Domestic Exports

Sources: BSI, BGA, CPBL, SIB, Geology and Petroleum Department

“Manufacturing,” precipitated by reduced outturns of citrus juices, petroleum, and beverages.

Real Sectors Activities: January to May 2021

For the first five months of the year, the production of sugar, molasses, banana, and marine products expanded. Conversely, outturns of citrus juices and petroleum narrowed.

Domestic Exports

Domestic export revenues increased by 15.0% (\$22.5mn) from January to May to \$172.2mn. The boost in earnings was driven largely by increased sugar sales to the United Kingdom and corn by-products (animal feed) to Guatemala. Revenues from marine products and banana also rose slightly, while receipts from molasses and citrus juices dipped.

Gross Imports

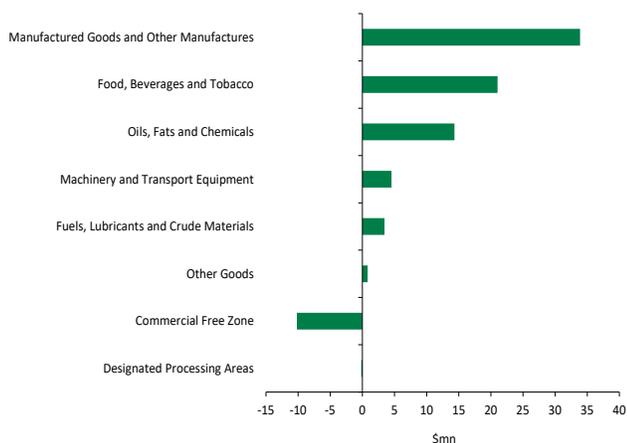

Gross imports rose by 9.5% (\$67.6mn) to \$777.6mn over the five-month period, as production and consumption activities

began to pick up following the easing of COVID-19 lockdown measures. The strong rise in level of imports was boosted by increased outlays on construction material, surveying equipment, and prefabricated buildings recorded in “Manufactured Goods and Other Manufactures” (\$33.9mn); beer for transshipment captured in “Food, Beverages, and Tobacco” (\$21.0mn); and fertilizers and biodiesel logged in “Oils, Fats, and Chemicals” (\$14.3mn). However, reduced importation of clothing and handbags led to a \$10.2mn decline in “Commercial Free Zone”, while goods destined for “Designated Processing Areas” fell by \$1.3mn.

Tourist Arrivals

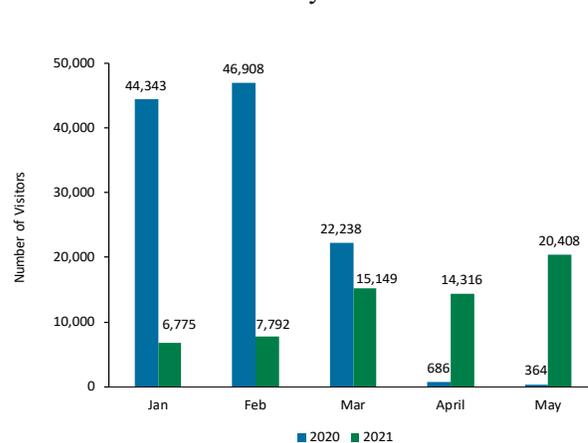

The number of stay-over arrivals increased by 42.6% month-on-month in May to 20,408 visitors. This amount represents the largest number of visitors received for any month since full lockdown measures were instituted in April 2020. Given that the PGIA was the only border point that was open for the full duration of the month, air arrivals comprised 93.8% (19,150) of total visitors. On 31 May, other land and sea border points

Chart 2.3: Gross Imports

Source: SIB

Chart 2.4: Stay-Over Arrivals

Sources: BTB, CBB, and Immigration and Nationality Department.

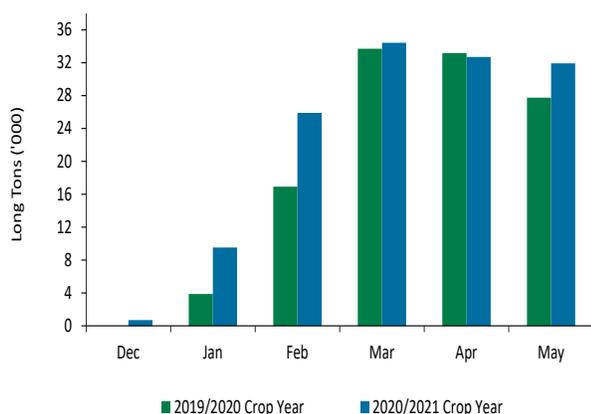

(namely, the Santa Elena Northern Border, Benque Viejo del Carmen Western Border, San Pedro and Punta Gorda borders) were reopened for international tourists, visiting the country for recreation and vacation purposes. When compared to the first five months of 2020, stay-over arrivals declined by 43.7% to 63,840 visitors.

Cruise ship port calls remained suspended in May dating back to mid-March 2020.

Consumer Price Index

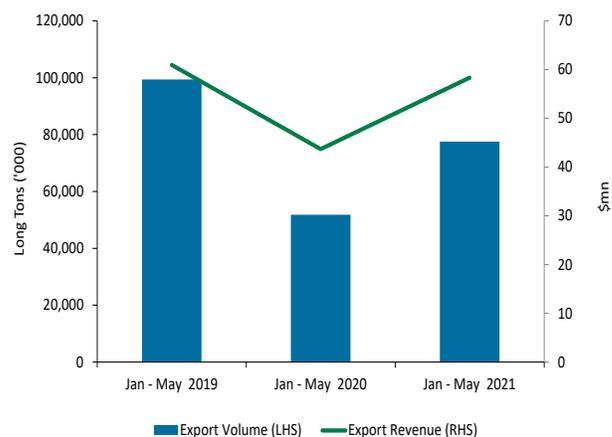

CPI rose by 0.1% month-on-month in May and by an average of 1.8% year-on-year over the first five months of 2021. The upward price momentum through May was attributed to price hikes for fresh fruits and vegetables in “*Food and Non-Alcoholic Beverages*” (4.8%), automobile fuel in “*Transport*” (3.4%), and liquefied petroleum gas in “*Housing, Water, Electricity, Gas, and Other Fuels*” (1.2%). However, reduced prices for cell phone charges in “*Information and Communication*” (3.6%), female garments in “*Clothing and Footwear*” (1.2%), and hotel accommodation in “*Restaurants and*

Chart 2.5: Monthly Sugar Production

Sources: BSI and Santander Group

Chart 2.6: Sugar Exports

Sources: BSI and Santander Group

“*Accommodation Services*” (9.6%) softened the inflationary pressure.

Sugarcane and Sugar

National sugarcane deliveries increased by 21.4% for this crop period to 1,429,022 long tons. The upsurge in yields reflected a strong recovery from adverse weather conditions in the north and a larger harvest from increased production acreage in the west. Consequently, sugar production rose by 17.2% to 135,166 long tons.

Sugarcane deliveries to the northern mill rose by 21.5% over the crop year to date (December 2020 to May 2021) to 877,530 long tons. Sugar production grew by 25.9% to 91,443 long tons, amplified by improvements in factory time efficiency and cane purity, which strengthened the long tons cane to long ton sugar (TC/TS) ratio by 1.9% to 9.6. Molasses output, which is inversely related to sugar outturn, fell by 4.9% relative to the previous crop at 28,119 long tons.

Out west, sugarcane deliveries increased by 21.2% from January through May to 551,492 long tons. Notwithstanding, sugar production grew by only 2.3%, as heavy rainfall saturated cane fields early in the year, weakening cane quality in the process. The adverse weather contributed to a 1.8% reduction in cane purity and an 18.4% worsening of the TC/TS ratio to 12.6. Molasses output grew by 13.4% to 20,702 long tons.

Between January and May, sugar export volume skyrocketed, up 49.8% to 77,551 long tons. Total sugar receipts rose disproportionately, increasing by 33.5% to \$58.3mn, owing to a dip in international market prices for bulk sugar on account of weakened global consumption. About 94.6% of total sugar exports (73,399 long tons) went to Europe, entailing 61,896 long tons of bulk sugar and 11,502 long tons of bagged sugar. Sugar receipts from Europe amounted to \$53.7mn, reflecting an 11.6% decline in the average unit price to \$0.33 per pound. In addition, the Caribbean

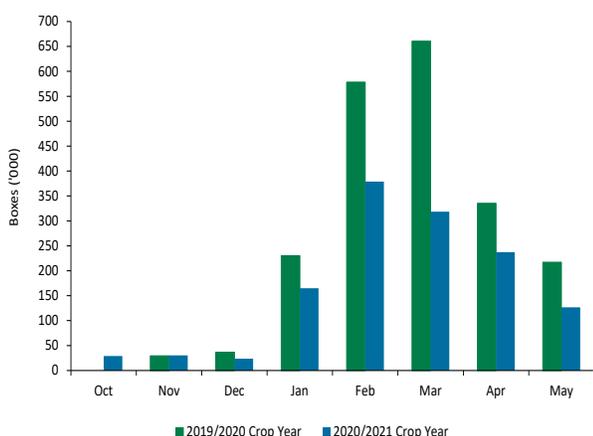

Community (CARICOM) bought 4,133 long tons of direct consumption sugar, valued \$4.6mn, while Canada purchased the remaining 20 long tons of bagged sugar. Molasses exports dipped by 14.5% to 17,077 long tons, valued at \$4.5mn.

Citrus

Citrus deliveries fell sharply by 37.3% to 1,308,928 boxes for the 2020/2021 crop year to date (October 2020 to May 2021) on account of the adverse effects of citrus greening. When disaggregated, orange deliveries declined by 37.4% to 1,204,313 boxes, and grapefruit deliveries fell by 35.3% to 104,615 boxes.

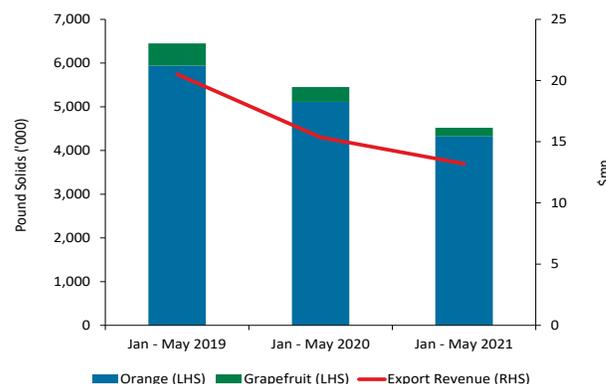

A deterioration in fruit quality caused citrus juice production to fall by a larger margin of 40.9% at 7.2mn pound solids (ps). This amount comprised 6.7mn ps of orange concentrates, 0.3mn ps of grapefruit concentrates, and 0.2mn ps of not-from-concentrates. The average juice outturn per box of fruit contracted by 5.8% with orange and grapefruit juice yields declining by 5.3% and 12.8%, respectively.

Chart 2.7: Citrus Deliveries

Source: CPBL

Chart 2.8: Citrus Juice Export Volume and Revenue

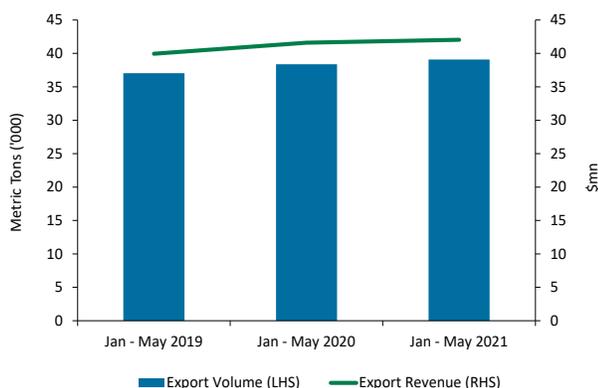

Source: CPBL

From January to May, citrus juice export volume declined by 17.1% to 4.5mn ps with receipts down 14.0% to \$13.2mn. Majority of the export mix comprised of orange concentrates, which totalled 4.3mn ps, valued at \$12.0mn. CARICOM, the main export market for citrus juices, accounted for 47.3% of total orange concentrate sales, which amounted to 2.0mn ps, valued at \$7.1mn. The next major market was the US who accounted for 34.4%, having purchased 1.5mn ps that garnered \$3.0mn. Notably, orange concentrate prices on the US markets had strengthened by 11.1% in response to a rise in consumer demand for vitamin-C-rich foods amid the pandemic. Additionally, Europe purchased 0.8mn ps of the product for \$1.9mn. Meanwhile, grapefruit concentrate sales totalled 0.2mn ps valued at \$1.1mn.

Banana

Reflecting the gradual recovery from Hurricane Nana's damages, which occurred in September 2020, banana exports expanded by 42.1% in May relative to the same month a year ago to 10,553 metric tons.

Chart 2.9: Banana Exports

Source: BGA

This month's outturn drove banana exports up by 1.9% year-on-year from January to May to 39,092 metric tons. Concurrently, banana receipts climbed 1.0% to \$42.0mn, reflecting a 0.8% decline in the average unit price.

Petroleum

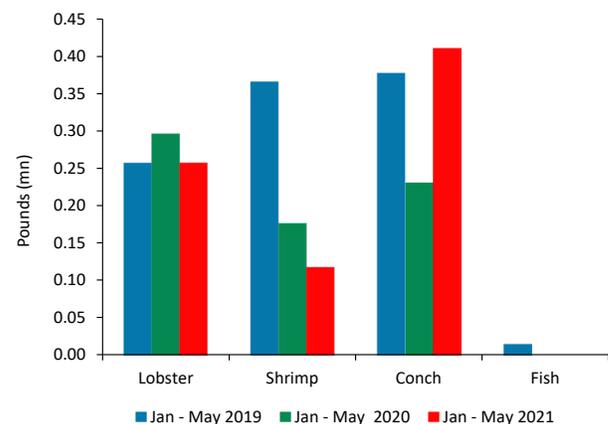

Crude oil production declined by 23.7% to 70,322 barrels over the review period. Spanish Lookout accounted for virtually all, with Never Delay producing only 26 barrels. Notably, May marked the first month of production for Never Delay since March 2020.

Over the review period, 557 barrels of crude oil were sold to Guatemala for \$0.1mn at an average unit price of \$US59.39. There were no crude oil exports during the same period in 2020.

Marine Exports

Marine exports increased by 11.8% to 0.8mn pounds in volume and by 14.0% to \$13.9mn in value. The favourable outcome reflected gains from a marked increase in conch sales

Chart 2.10: Marine Export Volume

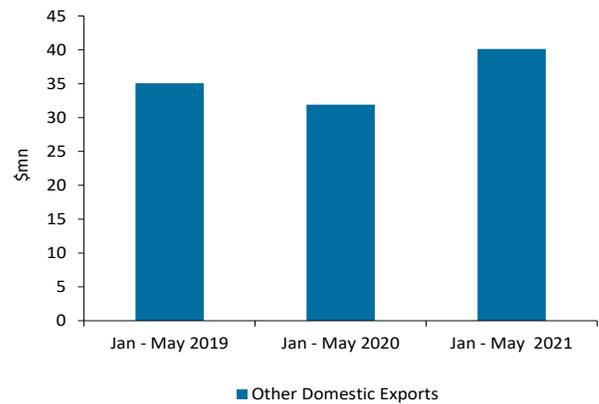

Sources: CBB and SIB

that overshadowed losses in lobster and farmed shrimp. For the first five months of the year, conch export volume rose by 78.0% to 0.4mn pounds, while its revenue soared, up 96.3% to \$6.0mn on account of a 10.3% average unit price increase. Conversely, cyclical production factors hindered lobster export volume, which fell by 13.0% to 0.3mn pounds. Lobster receipts fell by a slightly lower margin of 9.5% to \$7.5mn, reflecting a 4.1% improvement in its unit price. Shrimp export volume collapsed by 33.1% to 0.1mn pounds with receipts of \$0.5mn.

Other Domestic Exports

Other domestic export earnings grew by 25.8% over the five-month period to \$40.1mn. The boost in earnings was propelled by increased sales of animal feed (\$6.9mn), other miscellaneous domestic exports (\$4.9mn), and pepper sauces (\$1.0mn). These outcomes were partly offset by lower earnings from red kidney beans (\$3.5mn), black-eyed peas (\$1.4mn), and fresh oranges (\$0.6mn).

3 Central Government Finance

Information on Central Government's Operations after March 2021 is not available.

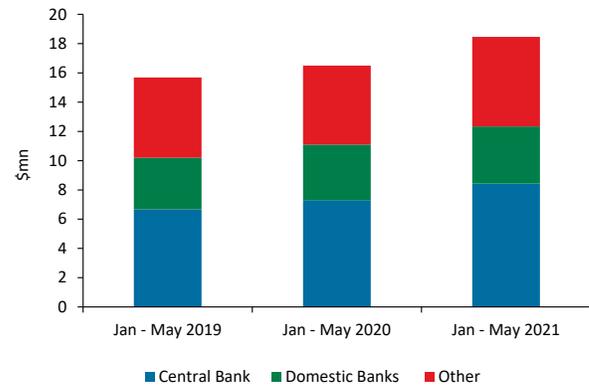

Central Government Domestic Debt

During the first five months of 2021, Central Government's domestic debt rose by 2.9% (\$38.7mn) to \$1,351.9mn. The marginal increase was due to the issuance of \$40.0mn worth of Treasury Notes (T-notes) in March. Of this amount, \$30.0mn was for fiscal budgetary support and \$10.0mn was earmarked to fund a COVID-19 emergency programme.

In securities trading, domestic banks acquired \$24.0mn in T-bills from the Caribbean Community Climate Change Centre (CCCCC) and \$0.2mn from a non-bank entity. Furthermore, the Central Bank acquired \$9.9mn in T-notes that was relinquished by a non-bank financial institution.

However, the rise in domestic liabilities were partly offset by a \$25.3mn decrease

Chart 3.2: Distribution of Interest Payments on Central Government's Domestic Debt

in Central Government's overdraft balance with the Central Bank.

Interest payments amounted to \$18.5mn. Central Government paid Central Bank \$8.4mn on its overdraft facility and securities holdings, domestic banks, \$3.9mn, and non-bank entities, \$6.1mn.

Central Bank held the bulk of Central Government's domestic debt at the end of May. Over the five-month period, its portion rose by 0.6 percentage points to 43.5% and domestic banks' share edged up by

Chart 3.1: Distribution of Central Government's Domestic Debt

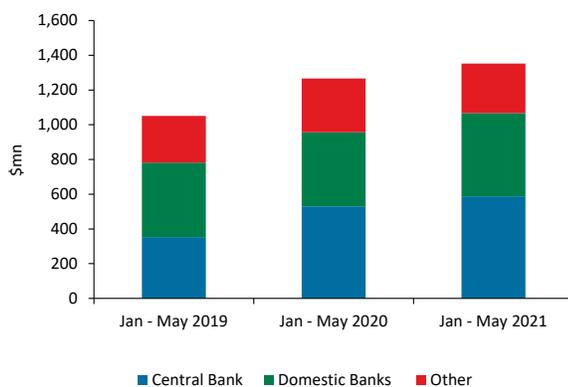

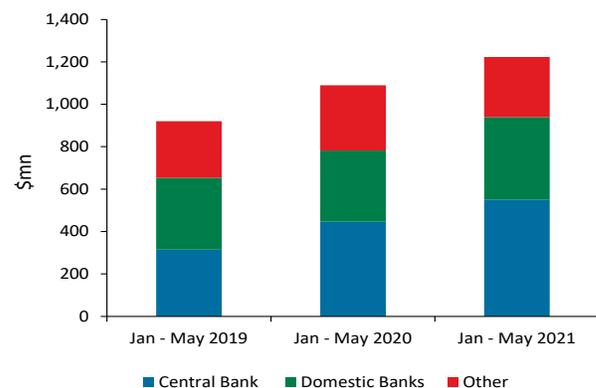

Chart 3.3: Distribution of Central Government's Domestic Securities

0.8 percentage points to 35.5%, while non-bank entities' amount narrowed by 1.4 percentage points to 21.1%.

Public Sector External Debt

From January to May, the public sector's external debt expanded by \$11.8mn (0.4%) to \$2,918.7mn. This outcome resulted as loan disbursement receipts of \$76.6mn and upward valuation adjustments of \$0.6mn surpassed \$65.4mn in amortization payments.

Central Government received \$75.0mn in new disbursements, accounting for 97.9% of the public sector's total loan proceeds. About \$36.4mn of this amount was linked to COVID-19-related expenditures, comprising:

- \$6.8mn from the Organization of the Petroleum Exporting Countries to finance the Food Assistance Programme,
- \$16.1mn from the Caribbean Development Bank (CDB) to cover debt service payment deferrals on their loans, and

Chart 3.4: External Disbursements to Central Government by Creditor Type

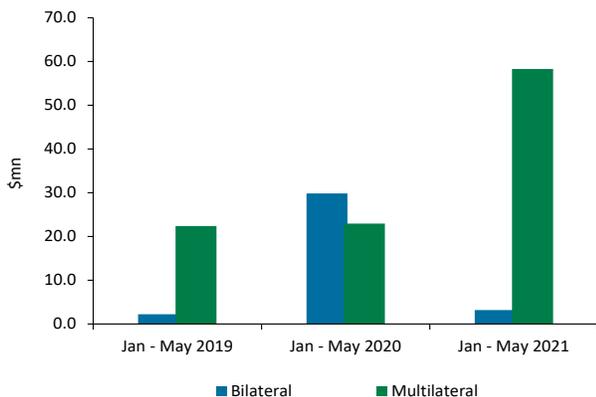

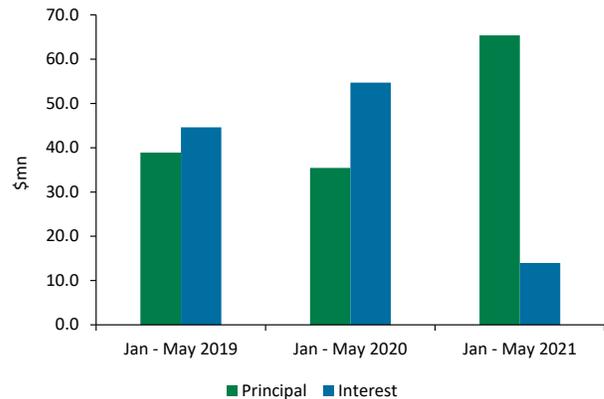

Chart 3.5: External Debt Service Payments

- \$13.5mn from bondholders to capitalize the February interest payment on the 2034 US dollar bond that was deferred.

Central Government also received loan proceeds of \$35.4mn and \$3.2mn from multilateral and bilateral creditors, respectively. These funds were allocated to various capital investment projects, including:

- \$10.3mn for the Climate Resilient Infrastructure Project,
- \$7.6mn for the Caracol Road Upgrade Project,
- \$4.8mn for the Coastal Highway Project,
- \$4.6mn for the Strengthening of Tax Administration Project, and
- \$3.0mn for the Sarteneja Road Upgrade Project.

Turning to the non-financial and financial public sectors, the Belize Electricity Limited received \$0.4mn to fund their ongoing Electricity System Upgrade and Expansion Project, while the Development Finance Corporation acquired \$1.2mn to boost their consolidated line of credit.

Loan amortization amounted to \$65.4mn. Central Government made \$62.6mn in principal payments, entailing \$11.1mn and \$27.5mn to bilateral and multilateral creditors, respectively. The CCCCC also redeemed \$24.0mn in T-bills. As for the non-financial and financial public sectors, they repaid \$2.0mn and \$0.8mn, respectively, on their loans.

Interest and other payments summed to \$14.0mn, given the \$13.5mn interest payment that was deferred on the 2034 US dollar bond. When disaggregated, the public sector's interest payments to multilateral creditors amounted to \$10.1mn; bilateral creditors, \$3.8mn; and commercial creditors, \$0.1mn.

⁽¹⁾ Since September 2017, debt service payments for oil imports have been suspended due to U.S. sanctions on Petroleos de Venezuela, S.A. Unpaid debt service payments up to the end of May 2021 amounted to principal of \$63.3mn and interest of \$13.9mn.

⁽²⁾ In accordance with the agreed amendments set forth in the Consent Solicitation Statement dated August 2020, disbursement of \$13.5mn represents the capitalised interest for quarter one, 2021.
