CENTRAL BANK OF BELIZE MONTHLY ECONOMIC REPORT 
FEBRUARY 2012

# **Money & Credit**

The 1.8% expansion in the broad money supply during the first two months of the year featured increases of 3.2% in net foreign assets and 1.6% in net domestic credit.

In contrast to a \$0.8mn decline in the comparable period of 2011, net foreign assets expanded by \$24.1mn as a \$43.0mn build-up in the net holdings of commercial banks eclipsed an \$18.9mn reduction in that of the Central Bank. In the case of commercial banks, inflows from tourism and business services facilitated a \$33.1mn increase in foreign assets and a \$9.9mn fall in short term foreign liabilities to a historical low of \$10.5mn. Compared to a \$43.0mn contraction last year, the Central Bank's net foreign assets fell by a lesser \$18.9mn, as foreign exchange sales of \$64.7mn outpaced purchases of \$45.6mn. Of total outflows, sales to Central Government amounted to \$54.9mn, with external debt servicing (inclusive of the \$33.1mn 'super bond' interest payment) accounting for 84.9%. More than one third of foreign inflows came from tax related receipts on domestic oil production. Sugar exports and purchases from commercial banks accounted for 22.3% and 19.8%, respectively.

Government activities fuelled a \$31.1mn growth in net domestic credit since there was no net increase for the private sector. A \$27.7mn increase in Central Government's net borrowing was financed by the Central Bank through a \$17.2mn drawdown of deposits and a \$10.7mn increase in the overdraft to meet super bond interest payment and election expense. Credit to other statutory bodies also rose by \$3.4mn. Commercial banks' loans to the private sector principally focused on construction and real estate activities with increases for these two being offset by contractions in most of the other lending categories. Personal loans dipped by

Chart 1.1: Net Foreign Assets & Net Domestic Credit

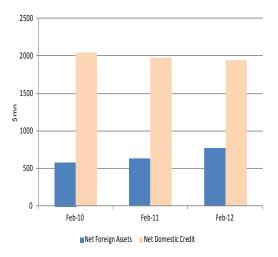

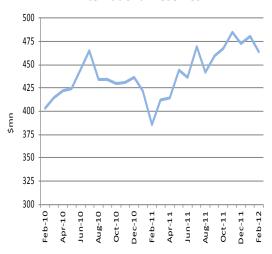

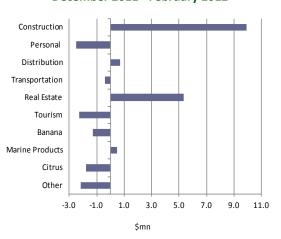

Chart 1.2: Gross International Reserves

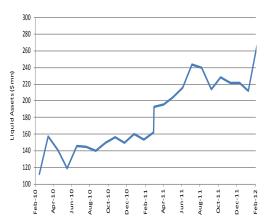

\$2.5mn, while net repayments of \$4.9mn from farmers caused loans to the primary sector to fall by \$4.4mn. Lending by the five largest credit unions contracted by \$1.9mn mostly due to repayments on personal and home improvement loans.

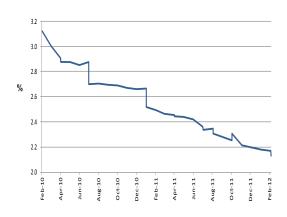

After dipping in the three previous months, statutory liquid asset holdings surged upward in February resulting in a year-to-date increase of 2.3%. At the end of February, statutory holdings exceeded requirements by 47.6%. Concurrently, cash balances rose by 1.7% to \$97.2mn, which was 55.4% above required levels. Meanwhile, commercial banks' Treasury bill holdings increased by \$1.5mn, and the weighted average yield on Treasury bills sank further to 2.21263% at the last auction in November 2011 to 2.13079% in February 2011, which was 4.0 basis points lower than the preceding auction earlier in that month. There was no Treasury bill auction slated for March.

At 12.84%, the weighted average lending rate fell below the 13.0% threshold to its lowest point since 1979. Across the board cuts pushed the weighted average lending rate down by 18 basis points with rates for residential construction and personal loans down by 29 and 26 basis points, respectively. Meanwhile, the weighted average deposit rate fell by 30 basis points to 3.35%. The largest decline was in the weighted average rate for time deposits, which fell by 36 basis points to 5.01%. The rate on savings deposits also declined by 9 basis points to 2.89%.

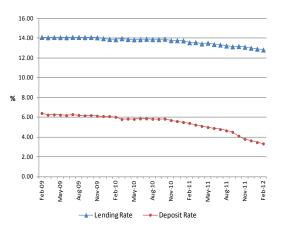

**Chart 1.4: Excess Statutory Liquidity** 

#### Chart 1.6: Commercial Banks' Weighted Average Lending and Deposit Interest Rates

## **Real Sector Developments**

In the first two months of the year, citrus deliveries to the factory contracted by 9.5%, citrus juice production fell in consonance by 9.1%, and petroleum production plummeted by 21.9%. On the other hand, sugarcane, sugar, molasses and banana all expanded significantly.

Revenues from the country's main domestic exports were down by 6.1% due to a fall in petroleum export volume and receipts. In contrast, earnings from sugar, molasses, citrus juice and banana expanded. Stronger prices were responsible for higher citrus juice receipts, while the increase in sugar and banana earnings reflected larger sales volume.

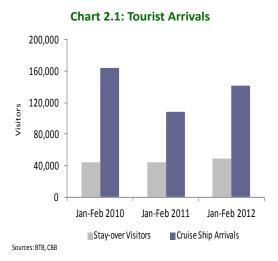

Stay-over tourist arrivals expanded by 10.2% with a 20.4% increase in visitors entering through the international airport outweighing sharp declines in arrivals through the sea and land ports. Cruise ship disembarkations rose by 29.9% to 141,155 reflecting the return to normalcy in the shipping schedule (68 port calls) over the previous period (49 port calls) when several port calls had been cancelled due to a controversy involving local tender operators.

The higher acquisition cost of petroleum products helped to push the consumer price index (CPI) up by 0.5% over the quarter (November-11 to February-12) and by 1.9% over the year (February 2011 to February 2012). Price increases were broadbased , excluding only 'Clothing & Footwear' and 'Household Goods & Maintenance'. 'Transport and Communication' experienced the largest growth of 4.9% with higher pump prices for gasoline. The next largest increase of 3.6% was in 'Food, Beverages and Tobacco' that reflected higher prices for red kidney beans, whole chicken, tomatoes and eggs. The cost of

#### Chart 2.2: Consumer Price Index Annual Percentage Change: February 2012 over 2011

'Personal Care', 'Rent, Water, Fuel and Power', 'Health Care' and 'Recreation, Education & Culture' also rose by an average of approximately 1.0%.

#### Sugar

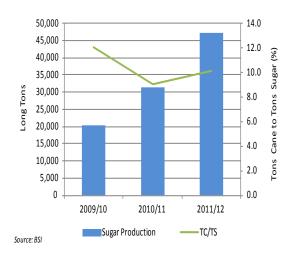

Sugarcane production in February more than tripled that of February 2011 when the breakdown of the cogeneration plant's two steam turbines had brought factory operations and sugarcane deliveries to a standstill. Consequently, sugarcane deliveries for this crop year to date (December - February) totaled 484,634 long tons, a 70.6% increase over the comparable period of the previous crop year. At 50.2%, the increase in sugar production was disproportionately lower due to the 11.7% reduction in the cane/sugar ratio, as excessive rains in December diluted the sucrose content of the sugarcane and lowered the extractable sugar per ton of sugarcane. Molasses production amounted to 12,516 long tons.

For January through February, sugar exports rose by 32.3% to 32,539 long tons valued at \$32.6mn, when compared to the first two months of 2011. The EU's 'Fair Trade' premium (US\$60.0 per metric ton) on sugar sales was once again a motivating factor for export destination, as 99.9% of sales went to that market with Canada receiving only 20 long tons. There were no exports of molasses over the period.

#### Citrus

Citrus deliveries for the first four months of the 2011/12 harvest were 7.2% higher than the comparable period of the previous crop year. Orange deliveries rose by 3.5% to 2.9mn boxes, and grapefruit, recovering from hurricane damages, grew by 30.1% to 0.5mn boxes. A lower juice out-turn per box caused juice production to rise by a less

**Chart 2.4: Sugar Exports** 

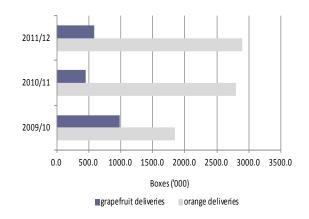

than proportionate 6.9% to 20.6mn pound solids (ps). Most of the outturn was concentrates, of which 18.1mn ps were orange and 2.3mn ps were grapefruit. Grapefruit not-from concentrate (NFC) accounted for the remaining 0.2mn ps. By-products included 1.2mn pounds of pulp and 1.1mn pounds of oil, most of which was orange.

Citrus sales were down by 14.1% to 7.6mn ps relative to the same period of 2011 as the deterioration in the pound solid yields per box of fruit prompted the processor to store the lower grade products for blending later in the crop year. Receipts increased by 5.6% to \$26.0mn as lower global stocks caused prices for concentrate juices to strengthen across all markets. Exports to the US, the principal buyer of orange concentrate, rose by 40.0% to 4.3mn ps valued at \$15.3mn, while sales to the Caribbean halved to 1.4mn ps valued at \$4.6mn, as the processor focused on supplying the US market. Notwithstanding forecasts of larger output in Florida and Brazil for 2011/12, orange juice prices strengthened on reports of lower beginning juice stocks in Florida and Brazil's rebuilding of its depleted inventories. A smaller grapefruit harvest in Texas combined with lower beginning juice stocks in Florida saw grapefruit prices strengthen further, so revenues from grapefruit concentrate rose by 148.6% even as sale volume increased by a lesser 103.4%.

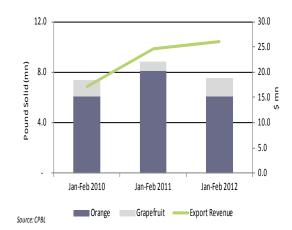

#### Banana

Banana output grew by 27.6% to 15,517 metric tons, facilitated by the rehabilitation of storm damaged acreages from the previous year and good weather. Notwithstanding a 1.8% dip in the box price due to the inclusion of third class bananas in the export mix, revenues increased by 25.3% to \$15.2mn as the improvement in volume outweighed the fall in prices.

#### Chart 2.5: Citrus Deliveries November to February

Sources: CGA & CPBL

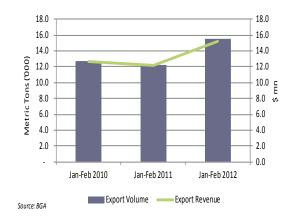

#### Chart 2.6: Citrus Juice Export Volume & Revenue

For 2012, Fyffes is maintaining its exclusive marketing contract with the Banana Growers' Association.

#### Petroleum

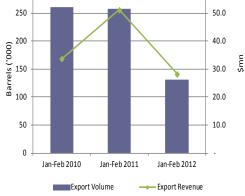

Petroleum output fell by 21.9%, as the 14,340 barrels produced from the Never Delay field was unable to compensate for the steeper than anticipated decline (27.8%) in Spanish Lookout production. Oil exports declined by 49.0% to 131,574 barrels, as supply constraints allowed only one export shipment during January and February, respectively, instead of the customary two. Export revenues fell by a less than proportionate 44.9% to \$28.2mn due to an 8.2% increase in the average price to US\$107.15 per barrel.

# 300 60.0

**Chart 2.8: Petroleum Exports** 

Source: Geology & Petroleum Dept.

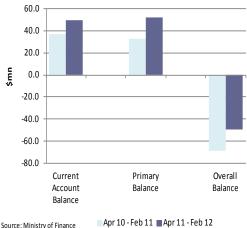

# **Central Government Operations**

Revenues in the first two months of 2012 were up by 16.1% due to higher receipts from import duties, the petroleum industry, non-tax receipts and grants. BTL dividends, license fees from money lenders and loan repayments by BTL accounted for most of the increase in non-tax revenues. Grants were mainly from the US and were to be used to purchase and other equipment for the Coast Guard. Expenditure rose by 10.9% with increases in current and capital spending of \$4.3mn and \$13.9mn, respectively. While current expenditure outpaced current revenue, the fiscal outturn improved nonetheless, with a primary surplus of \$3.1mn and the current and overall deficits contracting to \$19.0mn from \$29.8mn and to \$38.5mn from \$40.7mn, respectively.

During the first eleven months of fiscal year 2011/2012, Central Government's operations resulted in current and primary surpluses of \$49.2mn (1.8% of GDP) and \$51.7mn (1.9% of GDP), respectively. With the increase in revenues offsetting a modest growth in expenditure, the overall deficit stood at \$49.5mn compared to \$69.0mn during the same period of the previous year. The deficit was financed by foreign loan disbursements and the use of the Central Bank's overdraft facility.

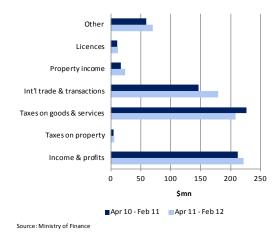

Revenues were 87.9% of budget and 6.8% higher than the comparable period of the previous fiscal year as higher receipts from the petroleum industry, import duties and property income more than compensated for lower revenues from the General Sales Tax (GST), business tax and transfers from government departments. The growth in imports and replacement of the GST with a fixed duty on fuel boosted import duties by 24.1%. Concurrently, the decision to zero rate petroleum products caused the GST to fall by 11.6%. Dividends from BTL boosted property income. Revenues were further enhanced by

#### Chart 3.1: Central **Government Operations**

Apr 10 - Feb 11 Apr 11 - Feb 12

loan repayments from DFC and BTL, a US grant to assist the coast guard and the institution of a social fee on EPZ imports.

At \$791.4mn, total expenditure was 3.6% higher than the comparable period of the previous fiscal year and 88.9% of budget as current spending rose by \$30.2mn and capital outlays fell by \$2.7mn. About half of the current increase was in wages and salaries, followed by a \$6.6mn rise in goods and services that reflected higher spending on contractors, training and maintenance. Interest expense was 0.6% lower mainly due to a fall in the lending rate (which is tied to LIBOR) on loans extended by the country's largest foreign creditors. Grants to individuals, mostly for education and health, accounted for the increase in subsidies and current transfers.

Capital expenditure amounted to \$119.1mn (74.3% of budget) and included \$4.8mn in transfers to Belize Water Services Limited and a loan to San Pedro Town Council. Approximately \$31.0mn went on infrastructure projects such as the completion of the southern highway, infrastructural works on the south-side of Belize City, upgrading of the Placencia road, Kendall Bridge, maintenance of roads, culverts, streets, drains and causeways. Another \$14.9mn was spent on land development and solid waste management, while \$11.4mn went on environmental protection projects. Security/defense and youth, sports and culture were allotted \$11.1mn and \$6.3mn, respectively. Housing also received \$5.1mn and outlays on education, health, social protection, tourism and agriculture amounted to \$19.9mn. The remainder was spent on furniture, equipment, upgrading of buildings and contribution to international agencies.

Source: Ministry of Finance

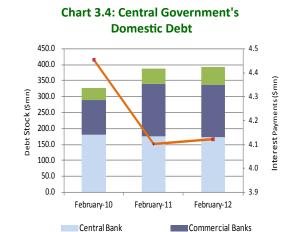

spending contributed to a \$10.8mn rise in the government's overdraft to \$58.9mn. After taking into account \$0.3mn in amortisation payments, Central Government's domestic debt rose by 2.7% to \$391.7mn at the end of February. Fluctuations in the overdraft dominated the changes in the share of domestic debt held by the Central Bank, which increased to 43.9% from 42.7% in December 2011. Correspondingly, the commercial banks' share fell from 43.2% to 42.4% over the same time period.

Interest payments summed to \$4.1mn, which included \$3.1mn that was paid to the Central Bank for credit provided through the overdraft and its holdings of Treasury bills and Treasury notes. Some \$0.8mn went to the commercial banks on their Treasury bill holdings and the balance went to the BSSB and Guardian Life.

#### **Public Sector External Debt**

The external public sector debt fell by \$6.9mn to \$2,038.6mn, as amortization payments of \$12.6mn exceeded disbursements from multilateral sources of \$3.9mn and upward valuation adjustments of \$1.7mn that was due to the depreciation of the US dollar against the Kuwait dinar, the Euro and SDR. Central Government repaid \$6.8mn to bilateral creditors, including \$5.7mn to ROC/Taiwan for housing and highway rehabilitation. Multilateral lenders received \$4.2mn, including \$2.4mn to CDB and \$1.7mn to IDB. CDB received a combined total of \$1.5mn from DFC and the non-financial public sector.

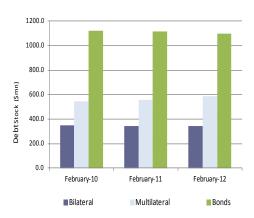

Interest payments amounted to \$37.8mn, \$0.8mn lower than the comparable period in 2010, due to a fall in the lending rates of the country's largest creditors. The latter rates are tied to LIBOR, which averaged 1.40% for the first two months compared to an average of 2.67% for the same period of 2011. Of total interest payments, the 'super bond' accounted for 87.4% (\$33.1mn). Payments to

Interest Payments

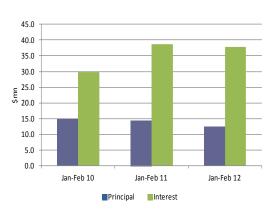

Other

bilateral creditors were \$2.6mn, of which \$2.1mn went to ROC/Taiwan, while the \$2.1mn in payments to multilateral lenders went mostly to CDB.

#### Table A.14: Public Sector External Debt by Creditor

<sup>(1)</sup> Effective June 21st 2011 the nationalization of BEL caused the increase (\$23.1mn) in debt , which was matched by GOB's aquisition of assets of equal value.

(2) Effective October 3rd 2005, loans to BWSL were reclassified as public sector debt as a result of Government of Belize repurchase of the company.

 $^{\scriptscriptstyle (3)}\,$  BMC is the issuer of the DFC North American Securitization Loan through the Bank of New York.

<sup>(4)</sup> IMF SDR Allocation is included as part of financial public sector external debt obligation.
