Money & Credit

Broad money grew by 5.3% during the first five months of 2012 due mostly to a 15.4% expansion in net foreign assets and, to a lesser extent, a marginal 0.1% increase in net domestic credit.

The \$115.9mn expansion in net foreign assets reflected increases in commercial banks' and Central Bank's net holdings of \$82.3mn and \$33.6mn, respectively. In the case of the commercial banks, increased outlays on import payments were more than offset by higher inflows from tourism, direct investments, business services and Commercial Free Zone sales. The Central Bank received inflows of \$139.7mn versus payments abroad of \$105.0mn. Most of its foreign exchange inflows came from domestic oil taxes (30.1%), loan disbursements (23.5%) that featured a \$20.0mn loan from ROC/Taiwan for budget support in May, sugar receipts (21.9%) and purchases from commercial banks (12.9%). Central Government accounted for \$80.8mn of the Central Bank's total outflows, of which 76.9% was used for external debt servicing.

Net domestic credit edged up by \$1.3mn as increases in loans to the private sector (\$10.1mn) and other public sector bodies (\$4.5mn) outweighed a \$13.3mn reduction in net credit to Central Government. Commercial banks' loans were channelled into increases of \$20.6mn for construction, \$9.8mn for real estate activities, \$4.1mn for utility companies and \$0.9mn for marine producers. Net repayments were made by agricultural producers (\$6.7mn), manufacturers (\$5.2mn), individuals as well as entities in transportation and the tourism industry. Lending by the five largest credit unions grew by a modest \$5.5mn as new loans for real estate, professional services and entertainment outpaced repayments for home improvement and manufacturing.

Chart 1.1: Net Foreign Assets & Net Domestic Credit

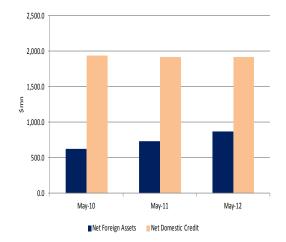

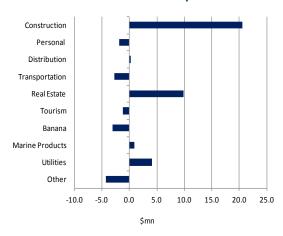

Chart 1.2: Gross International Reserves

Chart 1.3: Changes in Commercial Banks'
Loans & Advances
December 2011 - May 2012

Continued softness in credit demand and higher foreign exchange inflows underpinned a 33.0% increase in excess statutory liquidity as a \$96.5mn rise in average holdings of approved liquid assets outpaced the \$23.5mn increase in the required level. Excess cash balances rose by 8.6% to \$103.8mn, which was 56.6% above required levels.

While commercial banks' Treasury bill holdings dipped by \$3.6mn to \$147.4mn during the period, the weighted average yield also declined from 2.21263% at the last auction in 2011 to 2.12079%. The latter was 1 basis point higher than the preceding auction and 32 basis points below the average yield recorded in May 2011.

At 12.57%, the fall in the weighted average lending rate reflected rate cuts of 59 basis points for personal loans and 57 basis points for residential construction. At the same time, steep declines in time deposit rates underpinned the 61 basis points reduction in the weighted average deposit rate to 3.04%. As a result, the weighted average spread increased by 17 basis points to 9.54%.

Average Lending and Deposit Interest Rates

Real Sector Developments

Output of the major agricultural export commodities rose during the five month period while petroleum's downturn was steeper than anticipated. Sugar, molasses and citrus juice production rose on the back of double digit increases in sugarcane and citrus deliveries, respectively. Favourable agronomic conditions boosted banana production following a storm-induced downturn in the previous year. Despite the agricultural gains, revenues from selected domestic exports contracted by 10.4% to \$251.6mn as a \$54.7mn decline in oil exports offset a \$25.4mn increase in receipts from sugar, banana and citrus juices.

Arrivals of stay-over tourists expanded by 6.7% to 119,625 with a 14.2% increase in visitors entering through the international airport outweighing sharp declines in arrivals through the sea and land ports. However, notwithstanding a four-ship increase in port calls, cruise ship disembarkations declined by 0.1% to 303,774 as smaller vessels were utilized in comparison to the previous year (average maximum capacity of 2,391 for 2012 in comparison to 2,602 in 2011). The latter also appears to be the result of a dampening in demand for cruises due to the capsizing of the Costa Concordia in January - a shock from which the industry has not yet recovered.

Sugar

At 1,051,160, sugarcane deliveries for the crop year up to May surpassed the 2010/11 harvest by some 38.9%. Production of sugar rose by a less than proportional 25.2% to 112,373 long tons as excessive rains diluted the crop's sucrose content and caused an 11.6% decline in the cane/ sugar ratio. Even so, sugar production exceeded the 100,000 long ton mark for the first time since the 2005/06 crop. Molasses production also rose in tandem with the processing

Table 2.1 Production of Selected Domestic Exports

	Jan-May	Jan-May
	2011	2012
Sugarcane Deliveries (long tons)	691,370	909,904
Sugar (Long tons)	84,005	100,320

Chart 2.1: Tourist Arrivals

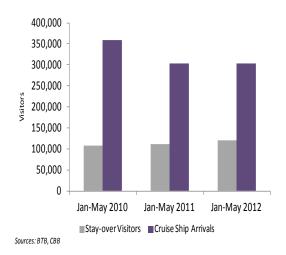

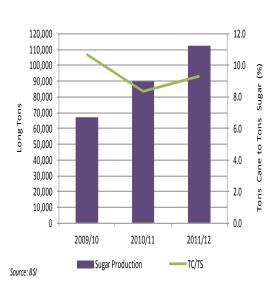

Chart 2.2: Sugar Production December to May

volume and posted a 24.1% gain to 29,745 long tons.

The hike in sugar production facilitated a 12.2% increase in export volume to 64,485 long tons, and with the average price up by 1.0%, a 13.3% increase in revenues was recorded. Rising world prices since early 2011 prompted traditional buyers such as Tate & Lyle to offer a premium on the base reference price of €335.0 per metric ton in order to attract and retain suppliers. The average price received consequently increased to €400.0 per metric ton. The additional motivating factor of the EU's 'Fair Trade' premium of US\$60.0 per metric ton resulted in 99.9% of sales being directed to that market with Canada receiving the residual 40 long tons. Molasses exports fell by 27.0% to 9,356 long tons, while improved prices due to production shortfalls in major molasses producers such as India and Afghanistan caused revenues to decline by a lesser 1.1% to \$1.6mn.

Citrus

The 2011/12 citrus harvest up to the end of May was 25.0% higher than that of the comparable period of the previous crop year, which had ended earlier than usual on May 11, 2011. Orange deliveries rose by 20.4% to 5.4mn boxes, and grapefruit rebounded from hurricane damages to post a 63.3% increase to 0.9mn boxes. Citrus juice production, however, rose by a lesser 21.9% to 37.1mn pound solids (ps) due to a 2.5% fall in the average juice out-turn per box of fruit. At 33.5mn ps, orange concentrate represented 91.1% of juice production, while grapefruit concentrate came in at 3.3mn ps. Grapefruit not-from concentrate (NFC) accounted for the remaining 0.3mn ps. By-products included 2.9mn pounds of pulp and 2.0mn pounds of oil, most of which were from orange.

For January through May, a 97.7% increase in grapefruit concentrate exports outweighed a 3.8% decline in those of orange and resulting from this, sale volume grew by

Chart 2.3: Sugar Exports

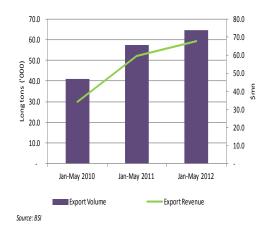

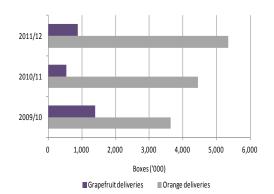

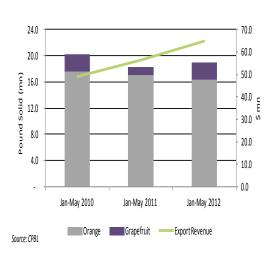

Chart 2.4: Citrus Deliveries
October to May

Sources: CGA & CPBL

Chart 2.5: Citrus Juice Export Volume & Revenue

3.3% to 18.9mn ps. Concurrently, revenues expanded by 15.1% to \$65.0mn, as lower global stocks underpinned a general rally in concentrate prices. The US was the largest market for orange concentrates, with the volume and value of sales rising by 19.3% and 42.7%, respectively. Price improvements in this market resulted from reports of lower beginning juice stocks in Florida as well as the rebuilding of depleted inventories by Brazilian producers. A smaller grapefruit harvest in Texas combined with lower beginning juice stocks in Florida supported a further strengthening of grapefruit prices, hence, revenues from grapefruit concentrate rose by 136.5% to \$9.0mn.

Banana

Banana production grew by 31.6% during the first five months of the year due to the rehabilitation of storm-damaged acreages and favourable weather. However, the average price per box declined by 2.2% to \$8.85 due to an increase in the quantity of third class bananas in the export mix. Revenues consequently grew by a smaller 28.7% to \$40.7mn. The Banana Growers Association and Fyffes entered the final year of their exclusive marketing contract with negotiations for the extension of this agreement having already begun.

Petroleum

With output from the Spanish Lookout and Never Delay oil fields down by 27.8% and 22.5%, respectively, total oil production declined by 27.5% to 460,478 barrels when compared to 2011. Oil exports declined even more sharply by 41.8% to 351,517 barrels, as supply constraints allowed only one export shipment per month instead of the customary two. Since the price of petroleum was virtually unchanged at US\$109.10 per barrel, export revenues fell by an almost identical 41.6% to \$76.7mn.

Central Government Operations

Government operations for January through May resulted in current and primary surpluses of \$29.7mn and \$38.4mn, respectively, and an overall deficit of \$10.2mn that was covered by financing from external sources. Revenues rose by \$14.1mn with increases from import duties and grants more than compensating for declines in receipts from the oil industry and non-tax revenues. Current and capital expenditure rose by \$11.5mn and \$10.9mn, respectively. Driving the upturn in current spending was a 6.2% increase in emoluments that reflected the payment of annual increments and new hiring to implement capital projects as well as a 12.6% increase in transfers to municipalities and grants for education and health. Cost controls on public utilities reduced outlays on goods and services, while interest expenses were down due to a fall in lending rates that were tied to LIBOR.

In the first two months of the 2012/13 fiscal year, revenues were \$0.4mn above the same period in 2011 with an upswing in the general sales tax (GST) collections, grants, modest uptick in taxes on international trade and marginal gains in income tax being partly offset by an \$11.4mn fall in non-tax revenues. The decline in non-tax revenues reflected the absence of BTL dividends and a one-time receipt in 2011 of \$2.4mn in abandoned property from the commercial banks. Expenditure also fell by \$3.6mn as a \$5.3mn decline in capital spending outweighed a \$1.7mn gain in current expenditure. Increased outlays on salaries, pension, interest payments and transfers were partly offset by savings realised in outlays on goods and services. As a consequence, the fiscal out-turn yielded current, primary and overall surpluses of \$22.6mn, \$13.8mn and \$7.9mn respectively, when compared to the same period in 2011. The overall surplus coupled with new borrowings facilitated a reduction in domestic financing and a build up in deposits with the Central Bank.

Central Government Domestic Debt

In the first five months of the year, Central Government's domestic debt rose by 1.1% to \$385.3mn as a \$3.3mn rise in overdraft financing from the Central Bank and disbursements of \$1.8mn eclipsed amortization payments of \$1.0mn. The latter reflected payments to commercial banks, Belize Social Security Board (BSSB), the Debt for Nature Swap and the Fort Street Tourism Village. Of total disbursements, \$1.2mn was acquired on behalf of the Belize City Council, which will reimburse government for the debt servicing, and \$0.6mn was from Fort Street Tourism Village for dredging at the mouth of the Belize River. A reduction in their holdings of government securities was mostly responsible for the decrease in the commercial banks' share of domestic debt, which fell from 43.2% in December 2011 to 42.0%. At the same time, nonbank entities' holdings of domestic debt rose from 14.1% at the end of December 2011 to 14.9% at the end of May.

Interest payments summed to \$6.9mn, with \$5.0mn going to the Central Bank for credit provided through the overdraft and its holdings of Treasury bills and notes. Commercial banks were paid \$1.6mn on their Treasury bill holdings and loans. The balance went to the BSSB, the Debt for Nature Swap and Guardian Life.

In secondary market activities, the Central Bank increased its Treasury bill holdings by \$3.5mn and sold \$4.1mn worth of Treasury notes to non-bank entities.

Public Sector External Debt

In the first five months of the year, public sector external debt fell by \$1.2mn to \$2,043.6mn, as disbursements of \$34.0mn were more than offset by amortization payments of \$33.1mn and downward valuation adjustments of \$2.0mn that were due to the appreciation of the US dollar against the SDR, Euro and Kuwait dinar. Disbursements

Chart 3.4: Central Government's Domestic Debt

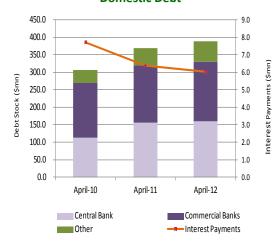

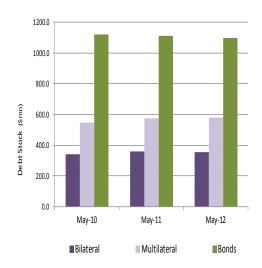

Chart 3.5: Public Sector External Debt

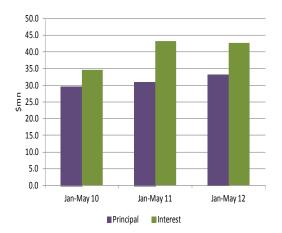

consisted of \$20.0mn from ROC/Taiwan for budget support and \$14.0mn from multilateral lenders such as the Inter-American Development Bank (IDB) and the Caribbean Development Bank (CDB) for projects such as solid waste management, sustainable tourism, health sector reform, Kendal Bridge, Santa Elena/San Ignacio bypass and the Social Investment Fund.

Central Government repaid \$10.8mn to bilateral creditors, of which \$8.7mn went to ROC/Taiwan for hurricane relief, housing and highway rehabilitation. Multilateral lenders received \$12.5mn that included \$4.8mn for CDB, \$4.3mn to IDB, \$1.7mn for the International Bank for Reconstruction and Development (IBRD) and \$1.0mn for OPEC Fund for International Development. The Development Finance Corporation (DFC) amortised \$3.2mn to the Belize Mortgage Company for the North American securitization and \$0.8mn to CDB. The International Monetary Fund (IMF) received the first payment of \$1.8mn for the Emergency Assistance for Natural Disasters (ENDA) financing. The non-financial public sector repaid \$2.9mn to multilateral lenders, \$0.8mn to commercial banks and \$0.4mn to the Government of Kuwait.

At \$42.7mn, interest payments were \$0.6mn lower than the amount paid during the comparable period of 2011 due to a fall in the lending rates of some external loans that are tied to LIBOR rates. Holders of the 'super bond' received 77.5% of total interest. Payments to bilateral creditors were \$3.8mn, of which \$3.1mn went to ROC/Taiwan, while the \$5.6mn in payments to multilateral lenders went mostly to CDB.
