

# MONTHLY ECONOMIC REPORT

November 2011

# **Summary of Economic Indicators**

# **Monetary & Financial Sector Developments**

The broad measure of money edged upward in November following three consecutive months of decline. Year-to-date growth of 4.2% contrasted with the 0.6% decline recorded over the same period of 2010 and was driven solely by a 16.9% expansion in net foreign assets since net domestic credit contracted by 2.2%.

The \$106.1mn expansion in net foreign assets reflected increases of \$65.6mn and \$40.5mn in the net holdings of the Central Bank and commercial banks, respectively. Bouyant CFZ sales, tourism inflows and export receipts (citrus and banana) pushed commerical banks' foreign assets up by \$29.3mn and facilitated an \$11.2mn reduction in their foreign liabilities. Meanwhile, the Central Bank's foreign asset position improved by \$64.3mn as foreign exchange purchases of \$277.2mn outpaced sales of \$212.9mn. Almost one-third of the foreign exchange receipts was from taxes and royalties on oil production, while loan disbursements, receipts from sugar exports and foreign exchange purchases from commercial banks accounted for 20.6%, 16.0% and 12.6%, respectively. Of total sales, Central Government received \$169.0mn, largely to meet external debt payments, while smaller amounts were allocated to commerical banks and statutory bodies. Since the start of the year, gross international reserves increased by \$49.2mn to \$485.2mn, the equivalent of 4.5 months of merchandise imports.

Net domestic credit of the banking system fell by \$43.5mn as a \$36.7mn contraction in net financing to Central Government accompanied decreases in credit to the private sector and statutory bodies of \$6.0mn and \$0.8mn, respectively. Despite higher year-on-year debt servicing costs, Central Government's net borrowing fell as heightened receipts from oil production, loan

Chart 1.1: Net Foreign Assets & Net Domestic
Credit

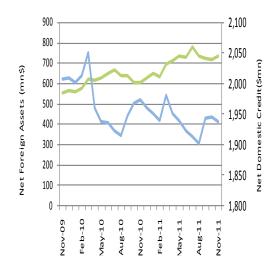

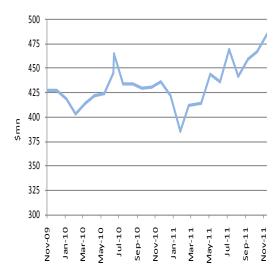

Chart 1.2: Gross
International Reserves

disbursements and proceeds from the sale of BTL shares boosted deposit holdings.

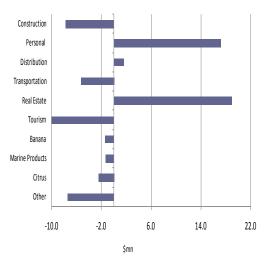

Meanwhile, the decline in private sector credit was largely influenced by a \$24.4mn contraction in November, as loan write-offs totalling \$35.0mn for entities involved in tourism, construction, agriculture and manufacturing wiped out the modest credit growth that had occurred since the second quarter. Credit declined across all economic sectors except the personal loans category, which rose by \$17.2mn, almost three times the growth recorded over the same period of 2010. The secondary sector recorded the largest decline of \$17.5mn, as reductions for manufacturing and construction activities eclipsed disbursements to utility providers. In the tertiary sector, repayments by transporters and loan write-offs for tourism-related projects outweighed advances for real estate transactions and distribution.

Loans and advances from the five largest credit unions increased by 5.3% or \$18.2mn during the year, compared to growth of \$19.9mn in 2010. Most of the credit unions' loans was to finance home improvements and personal consumption which offset net repayments on mortgages.

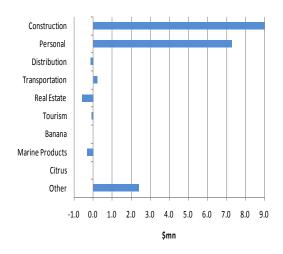

High levels of excess liquidity persisted in the banking system throughout the year, reflecting above average foreign exchange inflows and subdued credit demand. Excess statutory liquidity rose by 38.6% to \$221.9mn at the end of November, while cash balances stood at \$283.5mn, some 62.4% above the required level.

In response to the sharp and sustained increase in the commercial banks' demand for government securities, the Central Bank reduced their required holdings to zero on October 1. This followed the gradual lowering of this requirement from 6.5% to 5.0% in January and from 5.0% to 3.0% in April. Given the dearth of investment opportunities,

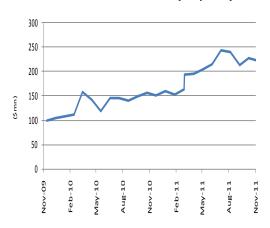

Chart 1.3: Changes in Commercial Banks' Loans & Advances December 2010 - November 2011

Loans & Advances
December 2010 - November 2011

**Chart 1.5: Excess Statutory Liquidity** 

commercial banks maintained their average percentage share of the available Treasury bills at approximately 86% over the eleven month period. At the end of November they were holding \$153.5mn worth, slightly higher than the amount held at the end of 2010.

Responding to the Central Bank's policy initiatives, the commercial banks' weighted average lending rate tumbled by 66 basis points to 13.12% with declines in all loan categories. The largest was in residential mortgages, which fell by 117 basis points to 11.99%. The interest rate on personal loans also registered a reduction of 108 basis points. Meanwhile, the combination of high liquidity and the Central Bank's directives to lower the minimum interest rate on savings deposits underpinned a drop of 180 basis points in the weighted average deposit rate to 3.8%. Interest rates on savings and time deposits rates fell by 226 basis points to 2.72% and 185 basis points to 5.57%, respectively, and this contributed to a widening of the weighted average interest rate by 114 basis points to 9.31% at the end of November.

High levels of excess liquidity provided the backdrop and impetus for the downward drift in the Treasury bill yield over the year. On November 30, issue number 15/2011, valued at \$42.4mn, was rolled over with a yield of 2.21263%. This was lower than the 2.23969% registered for the previous issue and well below the 2.66172% yield recorded for the last issue of 2010.

## **Real Sector Developments**

During the eleven-month review period, sugar production, citrus deliveries and citrus juices increased, while output of papaya, sugarcane, molasses, marine products and petroleum declined.

With increased export earnings from sugar, petroleum and other miscellaneous exports outweighing lower receipts from papaya, citrus juices, marine products and molasses, revenues from domestic exports were up by 12.6% to \$569.4mn.

Gross imports (excluding electricity) for January through November increased by 19.2% to \$1,514.3mn. Heightened cross border trade spurred a 57.5% surge in commercial free zone imports, which accounted for 54.8% of the import increase. Higher acquisition costs for gasoline and diesel inflated outlays on 'Minerals, Fuels and Lubricants', which was responsible for another 24.2% of this increase. 'Manufactured Goods' and 'Food, Beverages and Tobacco' accounted for 9.8% of the import surge, with the remaining 11.2% dispersed unevenly amongst the remaining categories.

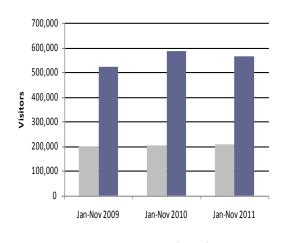

For January through November, stay-over arrivals grew by 2.4% as visitors through the sea ports and international airport expanded by 18.3% and 3.8%, respectively, while visitors through the land borders fell by 6.3%. With a 32.3% surge in cruise disembarkations during November partly compensating for the cancellation of eleven port calls at the start of the year due to the controversy between local tender operators and the Carnival Cruise Line, year-to-date cruise ship disembarkations fell by a modest 3.7% to 568,059.

**Table 2.1 Production of Main Domestic Exports** 

	Jan-Nov	Jan-Nov
	2010	2011

## Sugar

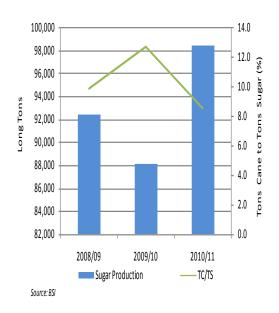

The 2011/2012 sugarcane harvest commenced on November 30th, almost three weeks earlier than the 2010/2011 crop, whose start was delayed due to crop financing difficulties. Deliveries amounted to 1,199 long tons but no sugar was produced. The industry is expecting sugarcane deliveries to expand by 24.0% to 1,050,000 long tons, and sugar production to increase by 6.6% to 105,000 long tons.

The export volume for the first eleven months of the year was 13.3% higher, year on year with receipts up by 40.2% to \$82.7mn due to the additional boost received from a 23.7% improvement in the average price. The latter was linked to the increased sales of value added products, the revival of sales to the US market where average unit prices were 80.3% higher than those in the EU, and exchange rate gains from the average Euro price negotiated on the futures market. The EU with its Fair Trade premium of US\$60 per metric ton remained the dominant market with 83.1% of sales, while the US accounted for 16.8%, and Canada received the remaining 120 long tons. Hampered by lower production, the volume of molasses exports fell by 50.4%, while revenues declined by a smaller 32.2% to \$2.9mn due to higher prices.

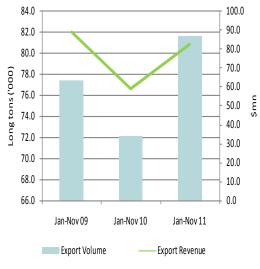

#### **Citrus**

In comparison with the previous crop which had suffered from hurricane losses, citrus production for the 2011/2012 crop year is expected to rebound with increases of 16.5% and 82.4% in deliveries of orange and grapefruit, respectively. Furthermore, low beginning stocks of orange and grapefruit juices combined with low grapefruit yields and a small increase in orange production in Florida is expected to signal higher prices in 2011/12. Consequently,

Chart 2.2: Sugar Production
December to November

**Chart 2.3: Sugar Exports** 

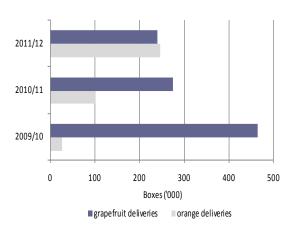

Source: BSI

prices paid to farmers for the new crop year are expected to increase from \$2.00 to \$2.30 per pound solid (ps) for oranges and from \$1.57 to \$2.01 per ps for grapefruit.

The 2011/2012 crop year began in the first week of November compared to the previous crop which started in October due to the need for early deliveries of grapefruit that had been affected by the hurricane. A comparison of the same two month period for 2010 and 2011 showed that deliveries were up by 29.5%, as a two-fold increase in orange deliveries outweighed a 12.6% decline in those of grapefruit. Boosted by a 4.7% improvement in the juice out-turn per box of fruit, juice production rose further by 44.1% to 22.3mn ps. Output of citrus oil and pulp amounted to 0.08mn pounds and 0.3mn pounds, respectively.

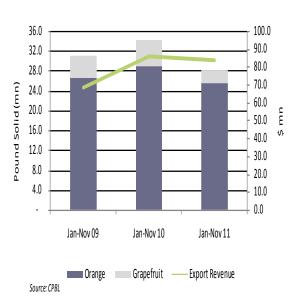

The volume of citrus juice exports declined by 20.5% year-on-year for January through November. Although production of citrus juices increased in the first semester, low beginning juice stocks affected overall export availability and sale schedules. Buoyed by higher international prices, revenues decreased by a softer 3.4% to \$86.3mn. Notwithstanding good orange harvests and juice production in Florida and Brazil, orange concentrate prices strengthened in response to an upswing in demand from the major importing countries. Revenues from orange concentrate consequently rose by 8.7% to \$78.4mn as the 23.4% price increase more than compensated for the 12.0% reduction in export volume. In the case of grapefruit, the average concentrate price rose by 15.0% due to low beginning US juice stocks and a smaller crop in Florida. However, the price hike could not fully compensate for a 50.0% decline in the volume of grapefruit exports, so revenues fell by 42.5% to \$7.8mn.

October to November

Sources: CGA & CPBL

Chart 2.5: Citrus Juice Production and Export
Revenue

#### **Bananas**

Banana production during November was 35.2% lower than that of November 2010 due to the production losses that stemmed from three days of thunderstorms in the first week of September. As a result, banana output for the first eleven months of the year fell by 4.8% to 69,874 metric tons, and revenue fell in tandem by 5.2% to \$64.4mn.

#### Petroleum

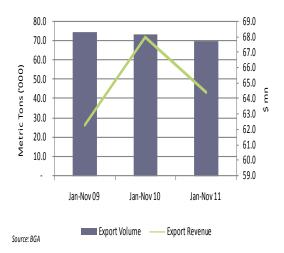

Petroleum production decreased by 5.9% to 1,299,882 barrels for January through November, with the 87,290 barrels from the Never Delay field only partially compensating for the 10.8% fall in Spanish Lookout production. Petroleum exports also fell by 7.0%. Since the beginning of the year, Louisiana Light Sweet spot prices, the new benchmark for Belize's petroleum, has consistently remained above the West Texas Intermediate price. Historically, light sweet crude has fetched a premium over heavier grades of oil due to the higher valued light products that it yields. Export revenues therefore rose by 42.3% to \$260.9mn as the average price of oil spiked by 52.9% to US\$107.58 per barrel, US\$17.58 above the threshold price at which the petroleum surcharge becomes available.

## **Marine Exports**

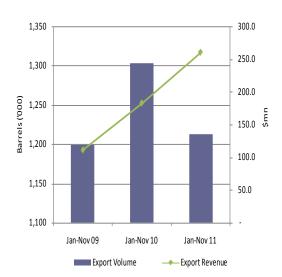

The volume of marine exports fell by 6.9% to 11.4mn pounds with revenues down 9.6% to \$45.0mn.

Shrimp exports fell by 13.3% to 8.6mn pounds, and receipts were further hit by a 25.2% fall in the average unit price. On the other hand, exports of fish increased by 24.3% to 1.5mn pounds with revenues up by 73.8% to \$2.1mn, as southern fishing cooperatives, after several years of directing their supply to hotels and the local market, renewed production for the foreign market under the

**Chart 2.6: Banana Exports** 

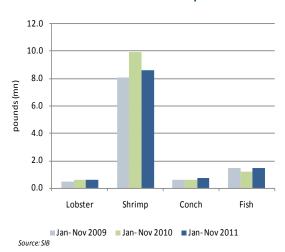

**Chart 2.7: Petroleum Exports** 

Source: Geology & Petroleum Dept.

**Chart 2.8: Marine Exports** 

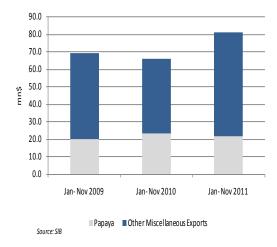

efforts of an export company. Sales of conch and lobster also increased by 23.8% to 0.8mn pounds and 7.5% to 0.6mn pounds, respectively.

## **Other Domestic Exports**

The value of other domestic exports rose by 40.7% to \$59.8mn due to higher receipts from sawn wood, pepper sauce, fresh oranges, grains and other miscellaneous non-traditional exports. On the other hand, earnings from papaya declined by 7.3%, as ring spot disease reduced production, and prices in the US, our main export market, weakened in the face of abundant supply.

**Chart 2.9: Other Domestic Exports** 

# **Central Government Operations**

### January-November

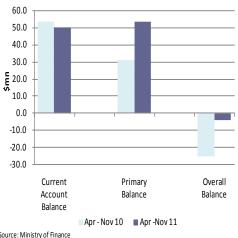

Central Government's revenues and grants were up by 4.5% over the year mainly due to higher receipts from the petroleum industry and import duties. Expenditure fell by \$1.8mn as a \$31.1mn decline in capital outlays more than offset the \$29.3mn growth in current spending. The latter resulted in increased current and primary surpluses of \$59.8mn and \$91.3mn, respectively, and a reduced overall deficit of \$9.9mn, compared to the \$43.3mn recorded for the comparable period of 2010.

### **April-November**

In the first eight months of fiscal year 2011/2012, Central Government realized current and primary surpluses of \$49.9mn and \$53.1mn, respectively. The overall deficit of \$4.1mn was financed by external borrowings, as domestic financing contracted due in part to the build-up of deposits with the Central Bank, which was facilitated by external loan disbursements and sales of BTL shares.

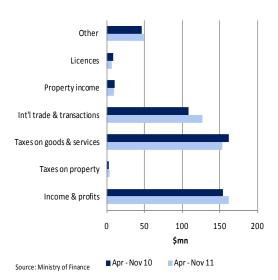

Somewhat below expectations at 61.6% of budget, fiscal revenues nonetheless increased by \$18.1mn, when compared to the same period of the previous fiscal year, as intake from the petroleum industry and import duties more than compensated for lower revenues from the General Sales Tax (GST), business tax, transfers from government departments and grants. The increase in the price of crude oil boosted oil receipts by \$19.9mn to \$62.2mn, which included \$11.2mn in windfall receipts. Higher imports and the replacement of the GST with a fixed tax on fuel imports increased import duty collections by 19.9%. As a result of the decision to zero rate petroleum products, GST collections fell by \$15.4mn. Other noteworthy revenue developments included loan repayments from the DFC as well as increases in receipts from motor vehicle licenses, lottery, stamp and excise duties.

Chart 3.1: Central **Government's Operations** 

Source: Ministry of Finance

Chart 3.2: Central Government's **Current Revenue** 

At 58.9% of budget, expenditures declined by \$3.0mn year-on-year, as a \$22.2mn increase in current spending was outweighed by a \$25.2mn fall in capital expenditure that pointed to the continuation of capacity constraints and administrative delays in accessing funds. In the case of current outlays, the largest increase of \$10.5mn occurred in 'Wages & Salaries'. 'Goods & Services' was \$6.1mn higher due to increased payments to contractors and other costs associated with maintenance, materials and supplies, while interest payments edged up by \$0.7mn. Grants to municipalities and contributions to Caribbean organizations explained the increase in subsidies and current transfers.

Capital expenditure amounted to \$60.9mn, of which \$4.0mn were transfers to DFC, Belize Water Services (BWS) and a loan to the San Pedro Town Council. Of the \$56.9mn in developmental projects, \$16.6mn went on the completion of the Southern Highway, Placencia road upgrade, infrastructural works in the southside of Belize City and maintenance of streets and drains. Waste management and land development projects received a combined \$9.8mn, while \$5.4mn went on environmental protection projects. Youth, sports and culture accounted for \$4.4mn. Outlays on education, health, social protection, agriculture, housing, security and defence amounted to \$12.4mn, and the remainder was spent on furniture, equipment, contribution to international agencies and the upgrading of office buildings.

#### **Central Government's Domestic Debt**

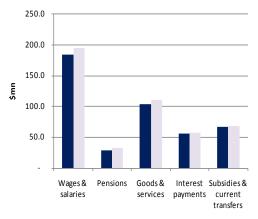

From January to November, Central Government's domestic debt rose by \$16.7mn to \$384.5mn, as a \$17.3mn hike in overdraft financing from the Central Bank was partly offset by \$2.1mn in amortization payments to BSSB, the Debt for Nature Swap, Fort Street Tourism Village and commercial banks. Increased reliance on overdraft financing from the

Central Bank reflected higher debt servicing, electricity prepayments, and transfers for salaries. With the growth in the Central Bank overdraft accounting for most of the new financing, the share of Central Government's debt held by the Central Bank rose from 41.6% at the end of 2010 to 42.6% at the end of November. Of the \$17.0mn in interest payments, Central Bank received \$4.5mn on short-term credit provided by way of the overdraft and Treasury bills and \$5.9mn on its holdings of long-term government securities. Commercial banks received \$4.6mn, while non-bank entities received \$2.0mn.

#### **Public Sector External Debt**

The public sector external debt rose by \$17.6mn to \$2,039.0mn as disbursements of \$63.1mn, a one-off shift of \$21.9mn from the private sector to public sector debt due to the nationalization of the electricity company and upward valuation adjustments of \$1.1mn (due to the depreciation of the US Dollar against the Euro, SDR and Kuwait dinar) exceeded amortization payments of \$68.8mn.

Disbursements included \$20.0mn from ROC/Taiwan for budget support, \$17.5mn from IDB as the second tranche of a policy based loan and for projects involving solid waste management and land management, and \$17.8mn from CDB for the Kendall Bridge, SIF, health reform project, DFC and water expansion. Of the \$50.2mn amortized by Central Government, \$26.7mn was repaid to multilateral creditors and \$23.5mn to bilateral lenders. The DFC amortized \$9.1mn to the Belize Mortgage Company for the North American Securitization and \$1.6mn to CDB, while the non-financial public sector paid \$4.0mn to multilateral creditors and \$3.1mn to commercial banks. Interest and other payments totaled \$87.6mn, of which \$66.1mn was for the 'super bond'. Bilateral lenders received \$8.1mn, of which \$6.5mn went to ROC/Taiwan, while the \$11.9mn in payments to multilateral lenders went mostly to CDB and IDB.

<sup>(1)</sup> Effective 21st June 2011 the nationalization of BEL caused the increase (\$21.9mn) in debt, which was matched by GOB's aquisition of assets of equal value.

<sup>(2)</sup> Effective October 3rd 2005, loans to BWSL were reclassified as public sector debt as a result of Government of Belize repurchase of the company.

 $<sup>^{(3)}</sup>$  BMC is the issuer of the DFC North American Securitization Loan through the Bank of New York.

 $<sup>^{(4)}</sup>$  IMF SDR Allocation is included as part of financial public sector external debt obligation.
