## Overview

#### **International Overview**

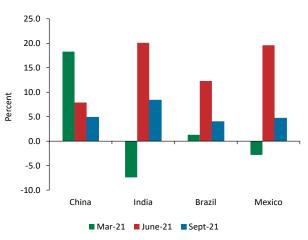

The global economy continued to rebound during the third quarter of 2021, but was slowed by persistent supply bottlenecks and the emergence of Omicron-a new 2019 coronavirus disease (COVID-19) variant of concern. Growing supply disruptions in advanced economies and worsening pandemic dynamics in lowincome developing economies caused the International Monetary Fund (IMF) to lower its July global growth projections in October by 0.1 percentage point to 5.9% for 2021. This outcome was partially offset by the expectations that output in some commodity-exporting emerging markets and developing economies would strengthen.

Growth momentum among advanced economies weakened significantly during the third quarter. United States (US) real gross domestic product (GDP) grew by 4.9% year-on-year in the third quarter, following a 12.2% second-quarter expansion on the

same quarter one year ago. The deceleration in output was partially attributable to reduced spending on goods—as the Government's assistance programme waned—and on services—as a resurgence of COVID-19 cases resulted in new restrictions and delays in reopening establishments. US unemployment continued to trend downward, falling to 4.8% in September, but still lagged pre-pandemic levels. Driven by rising energy and food prices, the US allitems consumer price index rose 5.4% for the 12 months ending September. The United Kingdom's (UK) economy expanded by 6.6% year-on-year in quarter three, after a 23.6% increase the quarter before when many COVID-19 restrictions were eased. Among G7 countries, the UK had experienced the deepest contraction in output over the first three quarters of 2020. By September though, the level of GDP had improved to 2.1% below the pre-pandemic level of December 2019. Similarly, real GDP growth in the euro area moderated, decelerating

**Chart 1.2:** Quarterly GDP Growth Rates Over the Same Quarter of the Previous Year for Selected Emerging Economies

to 3.9% in the third quarter after a 14.4% lift in June relative to the same quarter of the previous year. Challenged by supply bottlenecks and increased COVID-19 infections, the Japanese economy inched up by only 1.4%.

The growth pace among most emerging economies cooled as well. China's thirdquarter expansion slowed to 4.9%, hampered by energy shortages, headwinds in the residential property sector, and renewed COVID-19 outbreaks. Similarly, Brazil and India's output decelerated sharply from second-quarter double-digit gains to growth rates of 4.0% and 8.4%, respectively. Declines in agricultural production in the former and net exports in the latter weighed down the countries' performance. Mexico's GDP growth slid from 19.6% in the second quarter to 4.8% in the third quarter when compared to the same quarter a year ago. As growth tempered, the country recorded increases in service activities, industrial output, and agricultural production to a lesser extent.

In the Caribbean region, activities in tourism-dependent economies continued to strengthen, albeit at varying speeds. Barbados' economy expanded by 10.0% between July and September, relative to the corresponding period in 2020. However, for the first nine months of the year, the nation's output was 3.2% below the corresponding period of 2020. As the economy further re-opened, Jamaica's GDP increased by 5.8% during the third quarter of 2021 when compared to the third quarter of 2020. Increased activities in the services sector and goods-producing industries contributed significantly to the measured performance.

#### **Domestic Overview**

#### Real Sector Developments

Belize's nascent economic recovery from the dynamics of the pandemic continued into the third quarter of 2021. The country's real GDP expanded by 15.2% between June and September relative to the same quarter one year ago. The strong outturn primarily reflected the positive economic impact associated with the easing of strict COVID-19 measures. Hence, most of the contribution to the solid quarterly outturn stemmed from the revitalisation of service-based industries severely affected by lockdown measures. In addition, construction activities regained momentum, while agricultural production rebounded modestly from weather-related shocks. For the first nine months of the year, the economy grew by 9.5% year-onyear.

Employment conditions also strengthened. Stimulated by the economic recovery, the unemployment rate fell by 2.0 percentage points to 9.2% in September, down from 11.2% in April. New hirings were concentrated mainly among service industries amid rising job losses in the primary and secondary sectors.

Pressured by increasing food, fuel, and liquified petroleum gas prices, the consumer price index (CPI) rose by 2.6% on average over the review period. This jump is the largest on record over the same nine-month period since 2008.

#### Central Government Operations

Although the COVID-19 crisis continued to impact public finances adversely, critical indicators of the Central Government's fiscal performance strengthened. Central Government operations yielded a primary surplus of 0.2% of GDP for the first six months (April to September) of the 2021/2022 fiscal year (FY) compared to a deficit of 4.4% of GDP during the same FY 2020/2021 period. Concurrently, the overall deficit lessened to 0.7% of GDP from 5.4% of GDP in the comparative period. This sharp turnaround was driven by the solid economic rebound and new fiscal consolidation measures to restore fiscal sustainability. The overall fiscal deficit was financed solely from external debt proceeds.

By extension, the external public sector debt rose by 4.4% to \$3,035.7mn (81.2% of GDP), and Central Government's domestic debt inched up by 0.2% to \$1,316.1mn (35.2% of GDP) from January through September.

#### Balance of Payments

The external current account deficit increased slightly to \$146.3mn, up from 3.8% of GDP over the first nine months of 2020 to 3.9% of GDP during the same period of 2021. The external imbalance worsened mainly because of a widening trade deficit even as service-export revenues strengthened with the rebound in tourism. However, net financial inflows contracted sharply. The rebound in direct investments was overshadowed by the reduction in net public sector borrowings that coincided with the buildup in domestic banks' foreign assets. Nevertheless, net financial inflows

(inclusive of a new Special Drawing Rights (SDR) allocation) supported a \$125.5mn increase in the Central Bank's gross international reserves to \$823.4mn—the equivalent of 5.1 months of imports.

#### Money and Credit

Broad money supply (M2) grew by 8.9% year-on-year over the first three quarters of 2021. The quick growth pace was driven by an unprecedented increase in net foreign assets as the growth in net domestic credit moderated. The rapid foreign asset accumulation underpinned the \$230.9mn expansion in domestic banks' excess liquid holdings to 88.8% above the secondary reserve requirement. Excess cash reserves grew by \$18.5mn, and was 163.1% above the primary reserve requirement. Even though bank liquidity expanded, interest rates rose, underscoring the uneven deposit distribution among banks and tightened credit conditions since the onset of the pandemic crisis. Accordingly, the 12-month weighted average interest rates on new loans ticked up by four basis points to 8.54%. The corresponding rate on new deposits rose by 15 basis points to 2.16%, narrowing the interest rate spread by 11 basis points to 6.38%.

## **Money and Credit**

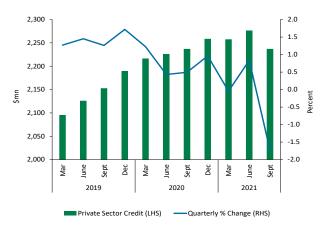

#### **Money Supply**

conditions Monetary continued be to influenced by the economic recovery from the health and economic crisis. Shaped by an unprecedented rise in foreign assets whilst credit expansion trailed, M2 increased by 8.9% during the year's first three quarters. This performance marked the most robust growth over this period since 2008. Both components of M2 expanded strongly. First, narrow money (M1) grew by 10.0% or \$195.6mn, reflecting a \$201.9mn rise in demand deposits. Demand deposits skyrocketed due to a sharp buildup of foreign currency deposits and local currency deposits for business enterprises, non-depository financial institutions, and credit unions. In addition, savings/chequing deposits grew by \$5.8mn, reversing the marginal contraction recorded during the same period last year. The expansion in those two sub-categories easily outweighed a \$12.0mn contraction in currency with the public, which retreated from its seasonal high. Second, year-end quasi-money increased at a slightly slower pace, up 7.6% or \$118.6mn. Time and savings deposits, the two sub-components of quasi-money, rose by \$79.1mn and \$39.5mn, respectively. Of note, the marked increase in time deposits was due to a one-off transaction associated with the sale of a banking institution earlier this year.

#### **Net Domestic Credit**

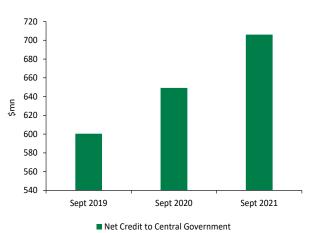

Net domestic credit growth slowed considerably through September. Aggregate credit growth increased by only \$16.7mn (0.5%) to \$3,056.5mn, down considerably

from \$73.6mn in the same period a year ago. This outturn was a consequence of subdued lending to the private sector, while credit to Central Government and other public bodies contracted. Net credit to Central Government fell by \$16.1mn, as an \$18.8mn reduction in domestic bank financing overshadowed a \$2.7mn uptick in financing from Central Bank. Concurrently, domestic credit to other public sector entities slipped by \$10.8mn with net repayments of \$10.5mn and \$0.2mn by state-owned utilities and other statutory bodies exceeding net disbursements of \$1.3mn to local governments. Private sector credit grew by \$43.6mn, marginally lower

#### Chart 2.2: Net Credit to Central Government

than the \$47.4mn expansion recorded during the comparable period of 2020. Net disbursements were mainly for tourism (\$42.1mn), construction (\$22.3mn), and agricultural (\$5.1mn) activities. Increased lending to these sectors was partly offset by a \$42.5mn decline in outstanding personal loan balances.

COVID-19 loan forbearances granted by domestic banks continued to slow. Loan forbearances issued during the third quarter summed to \$14.7mn, raising the total to \$851.3mn, representing approximately 36.4% of their loan portfolio since the pandemic outbreak. Write-offs more than doubled to \$27.3mn compared to the \$12.4mn written off during the analogous period of 2020. Consequently, domestic banks' nonperforming loans (net of specific provisions) to total loans (NPL ratio) improved from 4.4% in December 2020 to 2.5% at September end, well below the 5.0% prudential benchmark. Furthermore, domestic banks' return on assets ratio (ROA) strengthened from 0.4%

in December 2020 to 0.6% at the end of September, albeit still below the 1.0% benchmark.

#### **Net Foreign Assets**

The net foreign assets of the banking system ballooned over the review period, increasing by \$347.1mn (34.7%) to \$1,347.1mn. The strong upturn was underpinned by a pronounced rise in domestic banks' foreign holdings and, to a lesser extent, that of the Central Bank. Domestic banks' foreign balances grew to a high of \$522.8mn after rising by \$222.0mn (73.8%), of which 85.4% of that growth occurred between April and September. The relaxation of COVID-19 restrictions led to a strong rebound in foreign exchange earnings from export-oriented service industries, including tourism and wholesale and retail Inward remittances and foreign trade. direct investments, as well as revenue from business process outsourcing firms, also contributed to the upturn in banks' foreign assets. Outflows were also tightly managed to ensure monetary and financial stability.

#### Chart 2.4: Net Foreign Assets of the Banking System

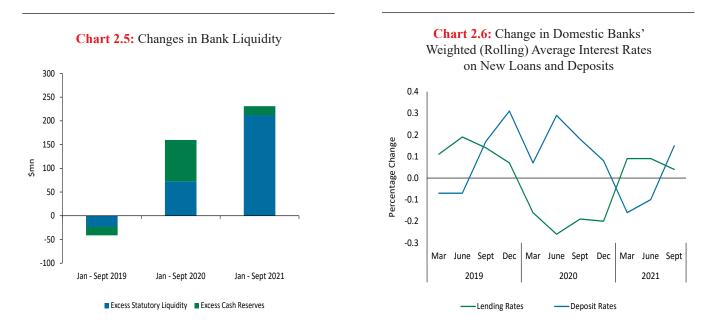

The Central Bank's foreign currency holdings increased by \$125.1mn (17.9%) to \$824.3mn between January and September. Gross foreign currency inflows amounted to \$311.9mn, mostly emanating from \$97.2mn in external loan proceeds, a \$72.6mn SDR allocation from the IMF in August, \$69.5mn in sugar export receipts, and \$20.3mn in grants from development partners. Gross foreign currency outflows summed to \$186.4mn. Although less than inflows, outflows were 2.5% greater than the amount recorded in the same period of 2020. Outflows mainly comprised Central Government's external debt service payments, which at \$108.1mn, was 25.5% below the amount at the same point last year. The falloff in debt service payments reflected the cash relief Central Government obtained from debt service moratoriums granted by external creditors. In addition, a regional entity was paid \$24.0mn to settle the redemption of its Treasury bills (T-bills).

#### **Bank Liquidity**

Buoyed by the upswing in domestic banks' net foreign assets, domestic bank liquidity expanded strongly amid tightened credit conditions. Domestic banks' excess liquid assets increased by \$230.9mn over the three quarters to \$651.2mn. As a result, excess liquid assets were 88.8% above the secondary reserve requirement. However, the growth in excess cash reserves was lesser, up \$18.5mn to \$370.4mn, but standing at 163.1% above the 6.5% primary reserve requirement.

#### **Interest Rates**

With deposit rates rising faster than lending rates, domestic banks' interest rate spread narrowed by 11 basis points over the review period to 6.38% at September end. The 12-month (rolling) weighted average interest rate on new loans inched up by four basis points over the past nine months to 8.54%, with higher rates in three of the four major loan categories. Weighted average lending rates rose by 28, 35, and 39 basis points on personal, residential construction, and other

miscellaneous loans, respectively. These upward rate movements were almost offset by a 12-basis point decline in commercial loan rates.

Concurrently, the 12-month (rolling) weighted average interest rate on new deposits rose by 15 basis points between January and September to 2.16%. The upward momentum in deposit rates was solely based on a 19-basis-point rise in time deposit rates. This outcome outweighed a 27-and 20-basis-point reduction on savings/ chequing and savings deposits, respectively. Meanwhile, demand deposit rates remained unchanged at zero basis point.

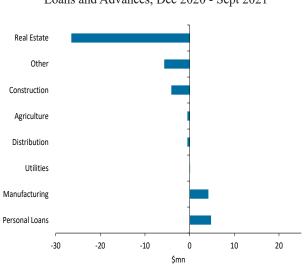

#### **Credit Union Lending**

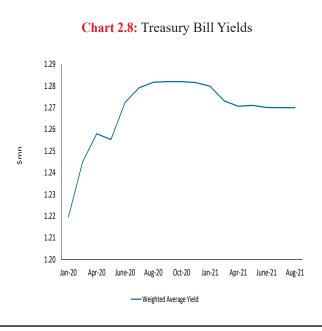

Aggregate credit union lending continued to contract. Credit unions' outstanding loan balances fell by \$23.6mn over the first three quarters of 2021, marking the sixth consecutive quarterly decline. The credit downturn reflected reduced outstanding balances in two main loan categories: real estate (\$26.5mn) and building and construction (\$4.1mn). The combined impact of repayments and write-offs within these categories easily overshadowed net disbursements of \$4.8mn and \$4.2mn for personal and manufacturing purposes.

Credit unions' COVID-19 loan forbearances summed to \$154.0mn, equivalent to 25.2% of their aggregate loan portfolio. Loan writeoffs amounted to \$13.2mn, more than triple the position accumulated during the same period of 2020. This sharp increase in write-offs contributed to the lowering of credit unions' aggregate NPL ratio from 2.0% in December 2020 to 1.7% at the end of September. Meanwhile, credit unions' ROA dipped marginally from 3.7% in December 2020 to 3.3% at the end of September.

#### **Open Market Operations**

Lukewarm demand for low-risk T-bills resulted in a dip in yields. Transactions in

rollover auctions caused the distribution among the three main institutional units to vary. Over the review period, domestic banks' aggregate T-bill holdings grew by \$2.1mn to \$208.1mn, tilting their share of total outstanding T-bills upwards by 0.9 percentage points to 84.9%. In contrast, non-bank entities lowered their holdings by \$24.4mn to \$5.1mn, culminating in a 10.0-percentage-point reduction to 2.1%. The Central Bank acquired most of the securities surrendered by non-bank entities. Hence, its holdings rose by \$22.3mn to \$31.8mn, lifting its share by 9.1 percentage points to 13.0%. Competitive bidding in auctions led to a onebasis-point decline in the weighted average yield to 1.27000%.

# **Domestic Production and Prices**

#### **Real Gross Domestic Product**

Belize's economy continued to rebound strongly from the adverse effects of the pandemic. In the third quarter of 2021, the country's real GDP increased by 15.2% when compared to the same period of 2020. The major impetus behind the quarterly increase stemmed from value-added gains in distributive trade and tourism activities, boosted by the vacination rollout and the loosening of COVID-19 restrictions.

For the first nine months of 2021, the economy grew by 9.5% year-on-year. This outturn resulted from the low base arising from the deep 16.9% contraction recorded in the same period of 2020 when lockdown measures were much stricter. Robust outturns in agriculture, construction, trade, distributive and transportation contributed significantly to the overall increase amid a sharp decline in government services. Nevertheless, output was 9.0% less than the pre-COVID-19 level of 2019.

Primary sector output increased by 12.3% over the first three quarters of the year compared to the same period of 2020. Led by a recovery in sugarcane and banana yields from weather-related damages and an upsurge in cattle exports with the lifting of trade barriers, output in the "Agriculture, Hunting, and Forestry" industry rose by 12.8%. Concurrently, large conch hauls countered falloffs in farmed shrimp production and wild lobster catches, giving way to a 6.3% increase in "Fishing." Secondary sector output grew by 4.7% over the three quarters, driven by a resurgence in construction and manufacturing activities, which overshadowed a modest decline in electricity generation. "Construction" grew by 19.2%, as works on large infrastructural projects and tourism-related investments picked up after the initial disruption caused by lockdown measures. "Manufacturing" inched up by 3.6%, owing to heightened sugar, beer, rum, flour, and oil output, while the production of citrus juices and fertilisers declined. Conversely, "Electricity and Water Supply" contracted by 3.8%, owing to a marked decline in biomass energy output.

The tertiary sector expanded by 7.4%, with mixed results across service industries. The reopening of the commercial free zone, alongside the pick-up in aggregate demand, underpinned a 25.1% expansion in the "Wholesale and Retail Trade" industry. Meanwhile, the upsurge in sugarcane deliveries, alongside the resumption in tourism, contributed to the 19.9% outturn in "Transport and Communication." On the downside, "Hotels and Restaurants" dipped 1.4% as the recommencement of international travel continued to be affected by the emergence of new COVID-19 variants. "Producers of Government In addition, Services" plunged 20.8%, reflecting the effects of the public workers' wage cut on indicators used to compute the value added of this item.

#### Sugarcane and Sugar

Sugarcane deliveries for the 2020/2021 crop year grew by 23.2% relative to the previous period, to a record high of 1,863,756 long tons. The historic outturn reflected a sharp rebound from drought damages in the north and increased production arising from investments in new production acreage out west. Accordingly, sugarcane deliveries to the northern mill surged by 36.2% to 1,198,072 long tons over 213 days of harvest (from 28 December to 28 July). Meanwhile, sugarcane deliveries to the western mill increased by 5.2% to 665,685 long tons over 178 days of harvest (from 25 January to 21 July).

In line with the movement in deliveries, sugar production rose by 23.5% to 175,065 long tons. Favourable weather conditions contributed to the boost in sugar yields in the north, while the reverse occurred in the western region. Hence, sugar production spiked 40.9% in the north to 121,751 long tons, resulting in a 3.3% improvement in the long tons cane to long ton sugar (TC/TS)ratio to 9.8. In contrast, sugar production contracted by 3.7% out west, as heavy precipitation triggered a fungi outbreak that reduced the cane's sugar content. As a result, the milling efficiency deteriorated, with the TC/TS ratio declining markedly to 12.5.

Furthermore, aggregate molasses production rose by 8.4% to 67,763 long tons.

The final estimated average unit price for deliveries at the northern mill fell by \$0.68

to \$54.56 per long ton. Payments to farmers weakened as the benefits from cane quality improvements were eroded by rising freight costs.

#### Citrus

Devastated by citrus greening, citrus deliveries plummeted by 45.3% for the 2020/2021 harvest season to a record low of 1,401,148 boxes. The poor outturn occurred even though harvesting was extended into September to accommodate sporadic fruit production for the second consecutive year. Consequently, the harvest period was lengthened by 17 days to a new high of 347 days, beginning on 19 October and culminating on 30 September. When disaggregated, orange deliveries plunged by 46.5% to 1,283,640 boxes, while grapefruit deliveries contracted by 27.4% to 117,508 boxes.

In tandem, citrus juice production nosedived 47.2% to 7.7mn pound solids (ps). This performance reflected a 3.3% decline in average juice yield to 5.5 ps. Orange juice production plunged by 47.7% to 7.3mn ps, as the average juice yield slid 2.3% to 5.7 ps. Grapefruit juice production fared worse, down 35.1% to 0.4mn ps, exacerbated by a 10.7% contraction in juice yield to 3.7 ps.

The manufacturing of citrus by-products also fell steeply. Over the period, citrus pulp and oil output declined by 34.8% to 1.1mn ps and 50.1% to 0.4mn ps, respectively.

The final price for orange deliveries surged by \$0.34 to \$2.14 per ps. The positive development was due to tightened orange concentrate juice supply, as the US and Brazil faced weather-related disruptions amid heightened demand for vitamin-C-rich foods during the pandemic. Conversely, the final price for grapefruit deliveries contracted by \$0.58 to \$3.81, as consumer preference waned worldwide.

#### Banana

Underscoring the industry's gradual recovery from Hurricane Nana damages, heightened production outturns over the last two quarters outweighed the marked decline in the first quarter. Consequently, banana production grew by 4.6% to 3.9mn boxes from January to September. Investments to increase production acreage along with improved weather conditions contributed to the favourable outturn.

#### Petroleum

Over the nine-month review period, crude oil extraction dipped by 10.3% to 130,551 barrels, reflecting a 53-barrel decline in the daily extraction rate to 478 barrels per day. Spanish Lookout's oil fields accounted for virtually all the production, since only 914 barrels were recovered from wells in Never Delay. Notably, after peaking in 2009 with 1,183,194 barrels, oil production has progressively declined for 12 consecutive years, with both oil fields now passing through their final production stage.

#### Tourism

The World Tourism Organisation estimated a 20.0% downturn in international tourist arrivals over the first nine months of 2021 vis-à-vis the same period in 2020. Owing to relaxed travel restrictions for immunised travellers in tandem with more comprehensive vaccine roll-out programs, overnight visitors to the Americas registered a 1.0% uptick, while those to Europe were down by 8.0%. Notably, arrivals to the Caribbean had increased by 55.0% because of heightened travel demand during the summer months, though this outcome was 38.4% below 2019's figures.

Back home, the number of confirmed COVID-19 cases more than tripled to 7,550 during the third quarter when compared to the same quarter of last year. In turn, the Centers for Disease Control and Prevention raised the country's travel health notice threshold from Level 2 to Level 4 between 1 July and 13 September.

Stay-over arrivals contracted by 10.1% to 54,323 in the third quarter of 2021 relative to the second quarter of the year. This decline was partly influenced by seasonality effects and the upswing in COVID-19 infections. Significant falloffs were recorded in August and September after July recorded the largest monthly increase in international visitors since February 2020.

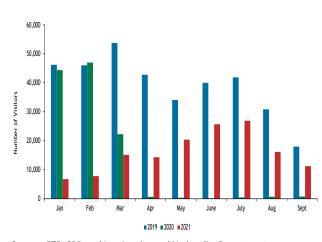

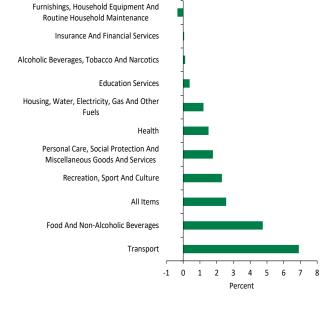

Chart 3.1: Stay-Over Arrivals

Notwithstanding, stay-over arrivals rose by 23.7% to 144,467 for the first nine months of 2021 compared to the same period of 2020. However, arrivals nosedived by 59.1% visà-vis the first nine months of 2019 before the pandemic struck. The US remained the top source market for stay-over arrivals, as their market share increased by 20.8 percentage points to 85.2%. However, the share of visitors from Europe and Canada contracted to 2.5% and 1.1%, respectively, owing to relatively tighter travel restrictions in those countries.

On 7 July, cruise line services to Belize resumed after a 16-month suspension dating back to 13 March 2020. This led to 22 port calls yielding 43,662 cruise ship disembarkations over the third quarter. At this level, disembarkations plummeted 85.9% over the first nine months of 2021 to 43,662 visitors. The Belize City and Harvest Caye ports harboured 17 and 5 ships, respectively, when disaggregated.

#### **Consumer Price Index**

Inflation surged as the CPI rose by an average of 2.6% over the first nine months of 2021 relative to the same period of 2020. The inflation rate was the highest observed over the same period since 2008 amid headwinds stemming from the Global Financial Crisis. Like 2008, the current cost pressure was mainly attributed to fuel and food price hikes. Accordingly, significant price increases were observed for imported petroleum byproducts in *"Transport"* (6.9%) and fresh fruits and vegetables in *"Food and Non-Alcoholic Beverages"* (4.8%). Furthermore, upswings for liquefied petroleum gas lifted

"Housing, Water, Electricity, Gas, and Other Fuels" (1.2%). The upward price momentum was softened by reduced prices for tablets, external storage devices, and television sets in "Information and Communication" (3.9%); men and women's clothing in "Clothing and Footwear" (0.6%); and hotel accommodation in "Restaurants and Accommodation Services" (5.9%).

#### Employment

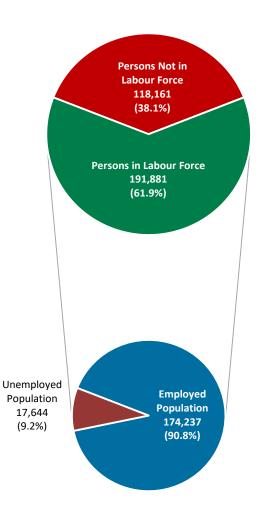

At 9.2% in September 2021, the unemployment rate fell by 2.0 percentage points relative to April 2021 and by 4.5 percentage points compared to September 2020. Over the most recent six-month period, the number of unemployed persons declined by 13.2% to 17,644, as the relaxation of lockdown measures spurred an increase in consumer-facing jobs alongside an uptick in labour force participation.

New hires outpaced an upswing in labour force participation. Between April and

September, the number of employed persons rose by 7.9% to 174,237. Employment growth was limited to the services sector, which rose by 16.5% to 118,204 persons. Significant gains in jobs within the tourism, wholesale and retail trade, and real estate industries contributed significantly to this outcome. Conversely, the number of employed persons in the primary and secondary sectors fell by 1.2% and 10.4% to 28,004 and 27,782, respectively. Fewer jobs in agriculture explained the decline in the former, while reduced employment in manufacturing and construction activities was responsible for the latter. Meanwhile, the labour force participation rate rose by 2.2 percentage points to 61.9%, driven by an upsurge of persons who rejoined the labour force after being displaced by the pandemic. The number of persons who stopped working because their employer closed or lost business due to COVID-19 shrunk by 39.0% to 5,206.

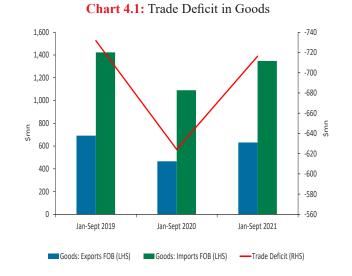

# **International Trade and Payments**

The external current account deficit on the balance of payments widened marginally over the review period. The deficit rose from \$127.3mn (3.8% of GDP) over the first nine months of 2020 to \$146.3mn (3.9% of GDP) during the same period of 2021. The growing imbalance was driven mainly by increased payments for foreign goods and profit repatriation to a much lesser degree. The rise in outlays was partly offset by increased revenues from the rebound in tourism, an expansion in outsourcing services, and heightened inward remittances. In addition, net capital inflows inched up to \$20.3mn, boosted by a boon of infrastructural-related grants. Meanwhile, the financial account balance contracted modestly to \$206.1mn, reflecting a slowdown in the incurrence of foreign liabilities. This outcome was due to a cutback in public sector external borrowings and a spike in domestic banks' foreign assets as net foreign direct investments strengthened. The surplus in financial inflows led to a \$125.5mn increase in the Central Bank's gross international reserves to \$823.4mn—the equivalent of 5.1 months of imports.

#### **Merchandise Trade**

The deficit on trade-in-goods expanded by 14.7% to \$716.3mn during the first nine months of 2021, as imports increased more than exports. Gross imports, FOB, rose by \$257.6mn to \$1,347.9mn. An upsurge in domestic imports into the customs territory was chiefly responsible for this result, as imports into the Corozal Free Zone expanded by only \$32.4mn to \$183.3mn. Gross exports, FOB, increased by \$168.9mn to

\$631.6mn with contributions from all three major export components. First, domestic exports rose by \$38.6mn to \$336.2mn, driven mainly by higher sugar and animal feed receipts. Second, Corozal Free Zone sales increased by \$100.1mn to \$236.2mn after reopening on 1 February 2021. Notably, the upsurge in free zone sales accounted for almost three-fifths of the overall rise in exports. Third, other re-exports more than doubled to \$59.2mn, spurred by heightened sales of imported beer to a neighbouring country and fuel to international aircrafts.

#### <u>Gross Imports</u>

Gross imports, FOB, increased by 23.6% compared to the first three quarters of 2021, as the pickup in aggregate demand coincided with inflationary pressure among the country's main trading partners. The impact was broad-based, as the value of imports rose across all major categories of goods. Spending on *"Manufactured Goods"* rose by the most significant margin, increasing by \$71.4mn with additional purchases of construction materials, including corrugated steel rods, stainless steel pipes, and cement. "Mineral Fuels and Lubricants" grew by \$60.8mn, pressured by rising demand and soaring prices of fuel products. "Machinery and Transport Equipment" and "Commercial Free Zone" increased by \$53.4mn and \$43.9mn, respectively. While heightened purchases of sealing machines, food and beverage processing machinery, and motor vehicles lifted the former. the procurement of additional footwear, bags, and clothing pushed up the latter. "Chemical products" climbed \$30.1mn with increased purchases of diagnostic testing kits and fertilisers. Lastly, "Other Manufactures" grew by \$25.4mn, propelled by higher outlays on surveying instruments and optical equipment.

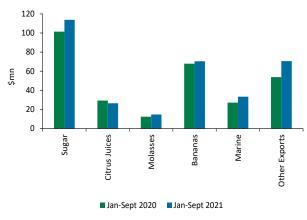

#### Domestic Exports

Domestic exports grew by 13.0% over the same nine months of last year, largely reflecting benefits from a strong rebound in agricultural and fisheries production from adverse weather-related events. Increased earnings from sugar, molasses, banana, marine products, and other miscellaneous products were the main drivers behind this improvement, while citrus and petroleum revenues declined.

#### Sugar and Molasses

Sugar exports grew by 18.8% to 137,332 long tons in volume, underpinning a disproportionate 12.2% rise in earnings to \$113.8mn, as bulk sugar prices weakened. Europe remained the leading destination for this commodity. Exports to that market was 81.1% of the sale volume and consisted solely of bulk sugar, valued at \$83.8mn.

Chart 4.2: Domestic Exports

#### Sources: SIB and CBB

The US, the second-largest market, bought 14,616 long tons, valued at \$17.4mn under the country's tariff-rate quota programme. The balance was distributed between the Caribbean Community (CARICOM), who purchased 11,265 long tons of bagged sugar valued at \$12.6mn, and Canada, who bought 22 long tons of bagged sugar valued at \$0.1mn. Molasses exports were also robust, increasing by 26.3% to 55,394 long tons for \$14.7mn.

#### Citrus Juices and Pulp

Citrus juice exports declined by 18.6% to 8.4mn pound solids (ps), while earnings fell by only 9.8%. The disproportionate falloff in revenues was due to improvements in orange concentrate juice prices on the US market, where demand strengthened amid the pandemic. Hence, orange concentrate earnings were down 7.0% at \$24.5mn, despite a 17.9% decline in sale volume to 8.1mn ps. In contrast, average grapefruit concentrate prices slid marginally, as a 35.7% downturn in sale volume to 0.3mn ps resulted in a 37.1% revenue decline to \$1.7mn.

#### Marine Exports

Although marine export volume dipped by 1.5% to 1.4mn pounds, revenues grew by 23.0% to \$33.3mn, supported by heightened lobster and conch prices. Lobster receipts increased by 18.5% to \$25.4mn, even though its sale volume fell by 8.5% to 0.7mn pounds. Similarly, conch receipts more than doubled to \$6.6mn, following a 96.3% boost in export volume to 0.5mn pounds. On the downside, farmed shrimp earnings virtually halved to \$1.3mn, with its export volume down 39.5% to 0.3mn pounds.

#### Banana

Banana export receipts grew by 3.7% to \$70.4mn. The modest revenue increase was driven by a 4.6% expansion in export volume to 71,505 metric tons.

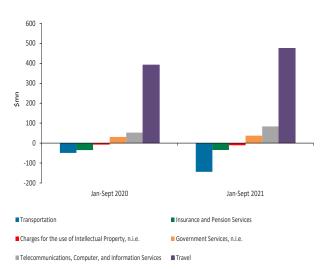

#### Crude Oil

Crude oil exports were negligible. Only 5,719 barrels were sold to Guatemala. This yielded \$0.6mn in revenue at an average price of US\$101.11 per barrel, spurred in part by the global recovery.

#### Services

The services surplus increased by 16.7% to \$481.3mn over the first three quarters of 2021. Service exports were boosted by an upturn in tourism earnings and an expansion in other services receipts, which together outweighed a ramp-up in freight payments. Travel receipts grew by 27.6% or \$108.2mn to \$500.0mn with the resurgence in international air travel as COVID-19-related restrictions eased. In addition, net inflows for other miscellaneous services rose by \$55.3mn to \$125.6mn, driven

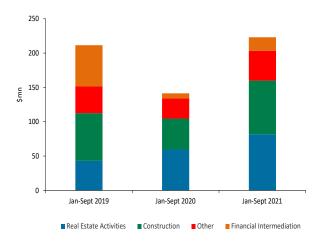

mainly by the growth in business process outsourcing services and, to a lesser extent, inflows to a regional organisation headquartered in Belize. However, the near tripling of net transportation payments to \$144.3mn moderated the surplus buildup. International transportation costs soared, as the demand for ocean freight intensified amid the global pandemic recovery.

#### **Primary and Secondary Income**

Net outflows on the primary income account increased by 19.1% (\$18.7mn) to \$116.9mn. Outflows rose as reinvested earnings from domestic banks more than doubled, and profit repatriation from the energy sector resumed following the pause when the pandemic began. The upswing in returns on foreign capital easily outweighed the decline in interest payments on Central Government's liabilities arising from debt suspension initiatives with non-commercial external creditors. In contrast, net inflows on the secondary income sub-account rose by 12.6% (\$22.9mn) to \$205.5mn. Heightened inward remittances and in-kind donations

Net Disbursements

Chart 4.4: FDI Breakdown by Sector

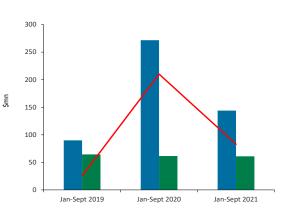

to the health sector to combat COVID-19 were primarily responsible for the rise in current transfers.

#### **Capital and Financial Account**

The balance on the capital account recorded a surplus of \$20.3mn, up \$1.2mn compared to the same period the year before. Inward capital transfers were mainly tied to grants from the United Kingdom's Caribbean Infrastructure Fund that supported the Phillip Goldson and Coastal Highways upgrade.

The overall balance on the financial account resulted in net borrowings of \$164.1mn, down 40.9% relative to the first nine months of 2020. The steep decline in financial inflows reflected a marked decrease in government borrowings against a substantial increase in domestic banks' foreign asset accumulation. Over the period, net public sector borrowings contracted nearly four-fold to \$59.0mn, while domestic banks' foreign assets almost quintupled to \$222.0mn. However, a near doubling in net foreign direct investments, coupled with a

Amortisation Payments

Disbursements

Chart 4.5: Central Government Net External Loan Disbursements

sharp upturn in private sector borrowings, partly offset those effects. Notably, net foreign direct investments of \$190.7mn were channelled mainly into tourism-related construction and real estate activities. Concurrently, net private borrowings of \$65.4mn were directed to the tourism and distributive sectors.

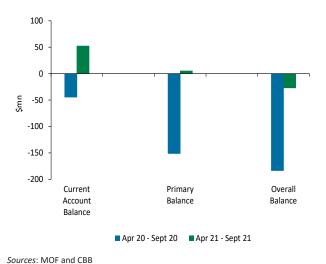

## Government Operations and Public Debt

#### **Central Government Operations**

Fiscal operations were dominated bv the nascent economic recovery and the Government's fiscal consolidation plan. Between January and September, Central Government's revenue and grants fell by 1.1% or \$8.4mn to \$734.3mn when compared to the same period of 2020. the Central Government's However, implementation of a "Medium-Term Recovery Plan" at the start of the new fiscal period vielded a 16.6% or a \$168.0mn reduction in total expenditure to \$843.2mn. Over this period, the primary deficit narrowed by \$132.0mn to \$61.3mn (1.6% of GDP) and the overall deficit improved by \$159.6mn to \$108.9mn (2.9% of GDP). Net borrowings from abroad covered the overall deficit.

The strong economic rebound, which started in the second quarter of the calendar year, supported a favourable turnaround in Government's net operating balance. Central Government's revenues strengthened steadily, while expenditure restraint was maintained. Hence, for the first six months of the FY 2021/2022, fiscal operations generated a primary surplus of \$5.7mn (0.2% of GDP), a reversal of the \$151.6mn (4.4% of GDP) deficit recorded in the first half of the FY 2020/2021. Concurrently, the overall deficit improved to \$27.4mn (0.7% of GDP) from \$184.0mn (5.4% of GDP) in the comparative fiscal period.

Total revenue and grants had increased by \$60.9mn to \$512.4mn relative to the same

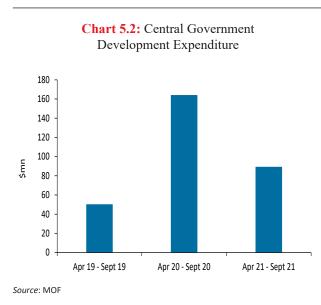

#### Chart 5.1: Central Government Operations

fiscal period a year earlier. At 49.4% of the budgeted amount, the revenue upturn was driven solely by heightened tax receipts, since non-tax revenue and grants declined. Tax receipts surged by 21.6% or \$83.1mn to \$467.4mn, owing mainly to increases in excise duties (\$26.6mn), general sales tax (\$22.1mn), import duties (\$19.6mn), and stamp duties (\$16.1mn). The ongoing economic recovery, which drove up the importation of fuel and other goods, underpinned the growth in sales taxes, excises, and customs and import duties. Stamp duties soared with the clearing of land transactions and other government services that were backlogged. However, income and business taxes remained depressed, down \$5.1mn and \$11.8mn, respectively. Altogether, income and profits were down by 17.5% relative to the period before when lockdown measures were relatively tighter, underscoring the distance from complete recovery to pre-crisis levels. Meanwhile, non-tax revenue narrowed by

\$3.5mn to \$35.3mn. This outcome resulted as the reduction in profit transfers from quasi-public corporations and receipts from international businesses eclipsed the upturn in licence fees and other income transfers from various Government departments. Furthermore, grants contracted by \$9.7mn to \$8.1mn.

Total expenditure fell by 15.1% or \$95.7mn to \$539.7mn, owing to cuts in current spending and capital spending to a more significant extent. At 52.1% of budgeted outlays, current expenditure contracted by 3.9% or \$18.0mn to \$449.9mn. "Wages and Salaries" declined by \$21.3mn because of the 10.0% cut in public officers' wages whose emoluments were equal to or greater than twelve thousand dollars per annum at the end of the previous fiscal period. This austerity measure, which took effect on 1 June, was implemented to help put the public debt on a downward trajectory by way of the Public Sector Emoluments and Allowances Reduction Act, 2021. "Transfers and Subsidies" trailed, down \$3.2mn.

In contrast, the remainder of recurrent outlays expanded marginally with "Goods and Services," "Interest Payments," and "Pensions," rising by \$6.5mn combined.

Capital expenditure plunged by 46.4% or \$77.7mn to \$89.8mn but accounted for only 30.0% of the budgeted line item. The steep cutback reflected reduced spending on COVID-19-related social safety net programmes, as well as delays linked to project execution. Development spending amounted to \$89.4mn. Infrastructural work on various road and highway projects accounted for approximately 41.0% of this amount. In addition, 20.0% was spent on environmental and land management projects, while 21.0% was allotted to COVID-19-related programmes.

Central Government's financing requirements for the first half of FY 2021/2022 summed to \$63.5mn. Financing came entirely from external sources, as net borrowings from domestic sources fell.

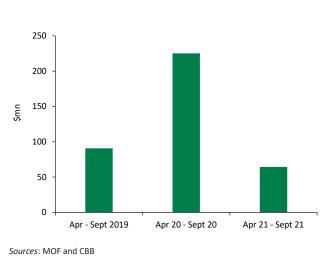

Chart 5.3: Gross Financing Needs

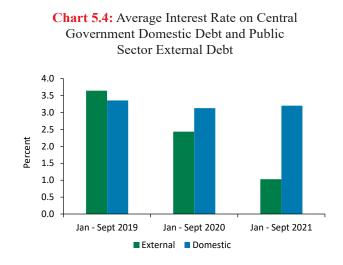

#### **Total Public Sector Debt**

Driven by a modest increase in external debt, total public sector debt rose by 3.1% or \$131.7mn between January and September to \$4,351.8mn. Consequently, the share of external debt to total public sector debt rose 0.9 percentage points to 69.8%, and in turn, that of domestic debt dipped slightly to 30.2%. Notwithstanding, the projected expansion in GDP growth caused the public sector debt-to-GDP ratio to improve to 116.4% at September-end from 127.7% at the end of 2020.

#### Domestic Debt

Central Government's domestic debt edged up by 0.2% (\$2.9mn) to \$1,316.1mn, equivalent to 35.2% of GDP. This marginal uptick in net domestic borrowings stemmed from March's forty-million-dollar Treasury Note (T-note) issuance and Central Bank's acquisition of \$24.0mn worth of T-bills from a regional organisation. These transactions were almost offset by the payoff of \$61.8mn in overdraft advances with the Central Bank.

Central Government's interest expense increased by 4.7% over the review period to \$30.9mn relative to the same period of 2020. Interest payments rose on account of the sizeable expansion in last year's debt stock to fund the Government's COVID-19 response. In addition, a 0.1 percentage point increase in the annual average effective interest rate to 3.2% contributed to the uptick in interest costs. The largest share of the Central Government's interest payments went to the Central Bank. The monetary authority was paid \$15.4mn for overdraft advances and Treasury securities holdings

combined. Interest payments to non-bank entities and domestic banks amounted to \$9.4mn and \$6.1mn, respectively.

In T-bill rollover auctions, the Central Bank and domestic banks increased their securities uptake by \$22.2mn and \$2.2mn, respectively, while non-bank entities' amount dipped by \$0.4mn. On the secondary market for T-notes, the Central Bank acquired \$9.9mn in March and \$3.0mn in August, all of which were surrendered by non-bank entities.

Consequently, the Central Bank maintained its position as the largest domestic creditor to Central Government. During the nine months, its share of domestic debt expanded by 0.9 percentage points to 42.9%. In turn, the portion held by domestic banks edged up by 0.1 percentage point to 34.7%. Meanwhile, the amount owned by non-bank entities tumbled 1.0 percentage point to 22.5%.

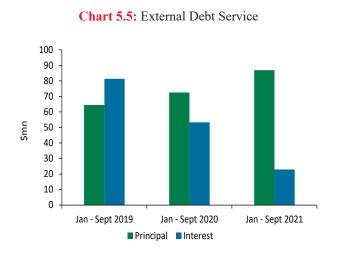

#### Public Sector External Debt

On 14 September 2021, the Government formally launched a cash tender offer to

purchase, redeem, and cancel all of the outstanding 2034 US Dollar Bonds. Under this offer, bondholders would receive a cash payout equal to 55 cents on each dollar of the outstanding bond that would result in a significant haircut. On 24 September 2021, the Government announced that it received tender offers, representing 84.4% of the aggregate principal amount, exceeding the minimum criterion. Bonds that have not been tendered before the offer's expiration date will be redeemed and cancelled on the date of settlement. Belize planned to finance the 2034 US Dollar Bond purchase with financing provided by The Nature Conservancy's "Blue Bonds for Ocean Conservation" programme.

Over the first nine months of 2021, the public sector's external debt grew by 4.4% or \$128.8mn to \$3,035.7mn, 81.2% of GDP. The rise in net borrowings resulted as gross external loan disbursements of \$216.8mn exceeded aggregate principal repayments of \$86.9mn.

Disbursements to Central Government totalled \$135.9mn. Roughly half of these

inflows (\$69.7mn) were sourced from multilateral (\$66.5mn) and bilateral (\$3.2mn) creditors to fund various capital investment projects, including:

- \$15.9mn for the Caracol Road Upgrade Project,
- \$11.6mn for the Coastal Highway Project,
- \$9.3mn for the Strengthening of Tax Administration Project,
- \$4.2mn for the Education Sector Reform Project, and
- \$3.0mn for the Sarteneja Road Upgrade Project.

Concurrently, \$66.2mn were received for designated COVID-19-related measures, including:

- \$23.3mn from the International Bank for Reconstruction and Development (IBRD) to finance the Belize COVID-19 Cash Transfer Program and to support agricultural households,
- \$16.1mn from the Caribbean Development Bank (CDB) to cover debt service payment deferrals,
- \$13.5mn to capitalise February's interest payment that fell due on the 2034 US Dollar Bond, and
- \$13.3mn from the Organisation of the Petroleum Exporting Countries to finance the Food Assistance Programme.

In the non-financial public sector, Belize Electricity Limited received \$1.0mn to fund their ongoing Electricity System Upgrade and Expansion Project. The public financial sector received \$79.6mn, comprising \$72.6mn from the IMF in a SDR general allocation and \$7.0mn from CDB.

Principal payments amounted to \$86.9mn. Central Government repaid \$15.0mn to bilateral creditors, \$41.8mn to multilateral lenders, and \$24.0mn to the Caribbean Climate Change Centre upon redemption of their matured T-bills. Concurrently, the non-financial and financial public sectors repaid \$4.9mn and \$1.2mn, respectively, on their outstanding loans.

Interest and other payments totalled \$24.1mn, down significantly from \$54.7mn over the comparative period a year ago. The difference reflects the interest payment deferrals on the 2034 US Dollar Bond. This accommodation effectively reduced Central Government's interest pay outs to \$20.0mn over the review period compared to \$50.8mn in the previous nine-month period. When disaggregated, Central Government's interest payments to multilateral institutions amounted to \$13.6mn; bilateral partners, \$5.2mn; and commercial creditors, \$1.2mn. Furthermore, the financial and nonfinancial public sectors paid \$1.1mn and \$3.0mn, respectively.

At September end, Central Government held 92.2% of the total public sector external debt stock. In comparison, the financial and nonfinancial public sectors had much smaller shares of 5.6% and 2.2%, respectively.
